SUBJECT Field Exam, 37-8051

Per your request, I have conducted a field inspection of this BLM permit to verify that the long pipeline does indeed exist. Accompanied by BLM employee Bill Harris, I rode the whole system from the well to the ends of the pipelines. The pipeline is 1½" PVC. Stock tanks are large truck tires with a cement bottom. A valve at each trough allows water to enter thru a pipe that comes up in the bottom of the trough. A few pictures were taken to show the well, storage tank, and trough design. The system exists as shown on my original exam.

Gentlemen:

Enclosed are copies of your approved Applications for Permit. We direct your attention to the conditions of approval on the fourth pages.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permits were issued and you must proceed diligently until the projects are completed. The enclosed blue cards must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permits were approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop these permits into licenses.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section
