TO: FILES 37-7809, 37-7719, 37-7756, 37-7861, & 37-7862

FROM: JIM JOHNSON

RE: CONVERSATION WITH JAMES MECHAM

DATE: April 26, 1990

=====

Mr. Mecham came in today to determine status of the above referenced water rights. Following is a summary status for each right.

37-7809

This permit is waiting for proof of beneficial use to be submitted. The due date is December 1, 1990.

37-7719

A field examination has been submitted. Some deficiencies were noted on the Examiners' report, such as, no information on the power generation facilities. Mr. Mecham will provide the missing information. Power generated is for private use only.

37-7756

This right had been prepared for license, when a question arose as to correspondence in the file indicating that the permit was to be relinquished. Mr. Mecham explained that litigation (Hamilton vs Standal) over the water source had caused some confusion as to which water rights were required to reflect the uses made of the water. When the court provided him with a decreed right for 35.7 inches for irrigation season use and 15 inches for non-irrigation season stockwater use he thought that he no longer needed this permit and was going to relinquish it. He later became aware that his decree did cover domestic and irrigation season stockwater uses identified in this permit. Therefore the permit should not be relinquished.

37-7861

This permit identifies fish propagation use not covered by any of the previous rights. This permit has an exam completed and is ready for final license processing.

37-7862

This permit is identical to 37-7861 in that a field examination is complete and ready for final license processing.

Dear Mr. Mecham:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to your Application No. 37-7862. The Department suggests you contact the protestant directly in an effort to determine the nature of the protest and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?

If this office can be of further assistance, please contact us.
