RE: CHANGES TO CERTIFIED EXAMINERS REPORT

DATE: May 7, 1990

=====

Some minor corrections and additions were made to recommendations submitted by Gerald Martens the field examiner on this right.

1. Power is the only use to be licensed because the fish propagation use from this source was already identified under right 37-7862.

2. Storage for Recreation use was omitted because the volume of the pond is only 0.03 acre feet.

3. Recreation use was not recommended by the field examiner and no reference to this use was included on the field exam.

4. Volume was based upon 24 hr/day
usage not valued by amount required
by the permit. 3/15 to 11/01,
 $0.71 \times 231 = 164$

1/02 to 3/14

$0.30 \times 134 = 40.2$

MEMORANDUM

TO: FILES 37-7809, 37-7719, 37-7756, 37-7861, & 37-7862

FROM: JIM JOHNSON

RE: CONVERSATION WITH JAMES MECHAM

DATE: April 26, 1990

=====

Mr. Mecham came in today to determine status of the above referenced water rights. Following is a summary status for each right.

37-7809

This permit is waiting for proof of beneficial use to be submitted. The due date is December 1, 1990.

37-7719

A field examination has been submitted. Some deficiencies were noted on the Examiners' report, such as, no information on the power generation facilities. Mr. Mecham will provide the missing information. Power generated is for private use only.

37-7756

This right had been prepared for license, when a question arose as to correspondence in the file indicating that the permit was to be relinquished. Mr. Mecham explained that litigation (Hamilton vs Standal) over the water source had caused some confusion as to which water rights were required to reflect the uses made of the water. When the court provided him with a decreed right for 35.7 inches for irrigation season use and 15 inches for non-irrigation season stockwater use he thought that he no longer needed this permit and was going to relinquish it. He later became aware that his decree did cover domestic and irrigation season stockwater uses identified in this permit. Therefore the permit should not be relinquished.

37-7861

This permit identifies fish propagation use not covered by any of the previous rights. This permit has an exam completed and is ready for final license processing.

37-7862

This permit is identical to 37-7861 in that a field examination is complete and ready for final license processing.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Examination Fee Notice
Page 2

Certified water right examiners are licensed engineers or geologists certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department office.
