Dear Gary:

I inspected this permit which is on water entering the East Fork of Big Wood River and find that a measuring device and control gate would not be required at this time by Water District #37 - 37-M.

Mr. Collins intends to install a pump to divert this water from the springs to his place of use. Because of the nature of the springs a measuring device and means of control would disrupt too much of the aesthetics.

Sincerely,

Reid J. Newby

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

MICROFILMED

APR 13 1986

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Dear Mr. Collins:

Re: Permit No. 37-7792

Enclosed is a copy of the approved request for extension of time. The time within which to submit the statement of beneficial use postcard is extended to September 1, 1985. Please note that the permit has been reinstated with an advance in priority since the extension of time request was submitted after the proof due date.

In connection with the development of a water right under this permit, the department wishes to call to your attention an Idaho Supreme Court decision issued in November 1982 which could affect your future use of water.

The decision in the case of Idaho Power Company vs the State of Idaho, et al stated in part that Idaho Power Company's use of water for power generation purposes at the Swan Falls dam on the Snake River is not subordinated to upstream depletion by later-in-time uses. Ongoing negotiations to resolve this water right controversy without further court action has resulted in the signing of a contract in October 1984, between the State of Idaho and Idaho Power Company. The contract essentially describes certain categories of water uses from which the company will seek no restitution for depletion of water availability at Swan Falls Dam in exchange for certain concessions. In addition, an agreement was also signed by the Attorney General, Governor, and Idaho Power Company. The agreement outlines additional actions which could be implemented to further resolve the Swan Falls controversy. Some of the additional actions include suggested changes in legislation, suggested changes in the State Water Plan, and the reduction of Idaho Power Company's water rights provided certain concessions are made to the company.

The Department urges you to follow the actions taken relative to the contract and agreement, since your water use could be affected.

Your extension request indicates that you question the necessity of a lockable device at your diversion point and request the department to contact you for an on-site inspection. My staff discussed the necessity of this requirement

with Loren Holmes of our Southern Regional office and on several occasions, Mr. Holmes attempted to contact you to discuss the situation and was not able to reach you. I suggest if you wish to pursue this matter, you contact our Southern Regional office in Twin Falls at 734-3578.

Dear Mr. Collins,

RE: Permit No. 37-7792

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval as listed on the fourth page. Be sure to note the special condition requiring you to install a lockable device on your diverting works.

Please be advised that there is insufficient natural flow available in the Big Wood River and tributaries to provide water for a new appropriation throughout the entire season of use.

During the spring run-off each year, there may be a period of time in which the prior rights to the use of antural flow and storage are filled leaving water available for your later-in-time permit. As the natural flow diminishes, however, there would be no water available for your right unless you had arranged for an additional source of water as a supplemental supply.

This information is provided so that you will not be mislead into thinking that this permit will provide sufficient water through the entire season of use. If you have any questions regarding this matter, please feel free to contact this office.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power company's water rights on the Snake River are protected against subsequent appstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

RE: Permit No. 37-7792

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

RECOMMENDEDCONDITIONS OF APPROVAL

1. For licensing purposes a scientific measurement of the diversion rate of the system as it is normally operated shall be provided by either properly installing an approved type of measuring device or by having a professional engineer certify the rate of diversion to the Department prior to submitting proof of beneficial use of water.
- X 2. A measuring device of a type approved by this Department shall be permanently installed and maintained as part of the diverting works.
(TO BE USED WITH THE WATERMASTER CONDITION ONLY)
3. Measuring devices of a type approved by this Department shall be permanently installed and maintained at the point of diversion and the point of effluent discharge.
4. The rate of diversion of water for irrigation under this permit and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
5. The issuance of this permit in no way grants any right-of-way or easement across the land of another.
- X 6. Use of water under this permit is subject to control by the watermaster of State Water District No. 37, BIG WOOD River.
7. The maximum rate of diversion shall not exceed _____ cubic feet per second.
8. The permit shall not be assigned or sold without first securing the written approval of the Department of Water Resources.
9. This permit cannot be assigned, mortgaged, or conveyed without complying with Section 42-208, Idaho Code.
10. Return water shall be treated to insure that the effluent meets (interstate) (intrastate) stream water quality standards.
11. Settling ponds shall be installed which are capable of reducing the silt load in the return water to such a level that the quality of the waters of _____ Creek will not be impaired for other beneficial users.
12. Use of water under this permit is supplemental to all existing water rights with the same purpose and place of use.
13. The proposed well shall not be drilled within _____ feet of another well.
14. The permit holder must obtain adequate supplemental water for the irrigation season that natural flow is not available.
15. Water shall not be diverted under this permit unless the flow of the Snake River at the U. S. Geological Survey stream gaging station at Murphy exceeds 3,300 c.f.s. and at Weiser exceed 4,750 c.f.s.
16. That should the use of the water on this permit reduce the quality of water available to prior water rights and make it unusable to satisfy the prior appropriations, then the diversion under this permit must cease.
17. There is not sufficient water available in the _____ River and tributaries that is not appropriated by prior water rights.
