Dear Mr. and Mrs. Farr:

Re: Permit No. 37-7710

Enclosed is a copy of the approved request for extension of time. The time within which to submit the statement of beneficial use postcard is extended to August 1, 1985.

In connection with the development of a water right under this permit, the Department wishes to call to your attention an Idaho Supreme Court decision issued in November 1982 which likely could affect your future use of water.

The decision in the case of Idaho Power Company vs the State of Idaho, et al stated in part that Idaho Power Company's use of water for power generation purposes at the Swan Falls dam on the Snake River is not subordinated to upstream depletion by later-in-time uses. The question of whether Idaho Power's 8,400 cfs water right at Swan Falls dam has been diminished by subsequent development, however, was remanded back to district court for determination. The findings of the district court could restrict water availability or require compensation to Idaho Power Company for uses developed later in time than Idaho Power Company's water right at Swan Falls dam.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

Department of Water Resources

Dear Sir:

We have received a summons dated January 11, 1984, involving Idaho Power Company as plaintiff vs. the Idaho Department of Water Resources and numerous defendants, case #81375. We received the summons from a process server on March 21, 1984.

We purchased our 6.25 acre tract in the Muldoon Subdivision II east of Bellevue, Idaho, in 1977 and here we built our retirement home. In the fall of 1978 we had an 8" well drilled for the purpose of culinary usage and irrigation for agricultural purposes. The well driller's report to the Dept. of Water Resources is dated November 4, 1978. On April 4, 1978, we made application for a permit with the State of Idaho, Dept. of Water Resources, to appropriate the public waters of the State of Idaho. Our application is #37-7710. The application was subsequently approved by the Director, Dept. of Water Resources, State of Idaho on August 3, 1978. The approval of our application is subject to the following limitations and conditions: a) subject to all prior water rights, b) proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 1983. In July of 1983, I requested an extension of time to complete our irrigation developments and to submit the statement of beneficial use. By letter dated August 4, 1983, from the Dept. of Water Resources we received approval of our request for extension of time. The time was extended to August 1, 1984.

The purpose of the above recapitulation of our actions toward the development of water for agricultural use is to establish that we have been following and abiding by the laws of the State of Idaho to establish a water right for agricultural purposes on our 6.25 acre tract. We have acted in good faith and are totally realistic in recognizing that in this geographical location, agricultural development of land is totally dependant upon the availability of a reliable source of irrigation and culinary water.

We agree that Idaho Power, as stated in their suit, does have a problem of assuring that they have a reliable supply, to the limits of their water rights, of Snake River water for the generation of electrical power. Only the court can resolve the question of subordination and whether Idaho Power has abandoned or forfeited alleged previous water rights. We must depend on electricity to pump ground water for culinary purposes and irrigation of agricultural land. For the purpose of agricultural development we have no other source of irrigation water except our access to the ground water supply. It seems to me on the other hand that Idaho Power has access to several sources of energy which could be used

U.S. DEPARTMENT OF AGRICULTURE

toward the development of an electrical supply for its customers. Idaho Power must realize that it may not be able to continue development of hydroelectric power where the supply of stream water is finite. Idaho Power must also realize that our efforts and aspirations toward agricultural development of our acreage will be severely curtailed if we are unable to perfect our water right as applied for. We are committed in our retirement to use and agricultural development of our tract of land and the future value and use of our tract is dependant upon the availability of water for agricultural use.

Sincerely,

Gilbert L. Farr

Dear Mr. and Mrs. Farr:

Re: Permit No. 37-7710

PROOF DUE NOTICE

One of the conditions of approval of your water permit No. 37-7710 was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1984. (See last page of your approved permit or your last approved extension request). Enclosed is a postcard which may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time provided the delay is for reasonable cause as described in Section 42-204, Idaho Code. If you have been prevented from proceeding by a government agency or by litigation, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either the beneficial use postcard or a request for an extension of time must be received by this department on or before the above-described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK

Dear Mr. and Mrs. Farr:

Your approved copy of Application for Permit No. **37-7710** is enclosed and we direct your attention to the conditions of approval on the fourth page.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit.

MICROFILMED

However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

L. GLEN SAXTON
