Gentlemen:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

Gentlemen:

On June 22, 1982 this office received from you a Statement of Beneficial Use regarding the above-referenced permit. We note that on the postcard you have indicated the source of water to be Purdy Canal.

The source of water shown approved on the permit is groundwater. Therefore, we must determine the connection between Purdy Canal and groundwater. If the Purdy Canal comes from a surface water source you must develop a totally separate water right for that source, since the source of a permit cannot be altered.

Please respond to this correspondence within 25 days of the date of this letter to maintain your permit in a valid status.

Dear Water user:

The enclosed Order removes the measuring device requirement as a condition of approval from your permit.

If you have already installed the measuring device, the field examination can be more quickly conducted by the Department's field examiner. You will also derive benefit from water management information which may be obtained from the installed meter.

If you have questions regarding this matter, please contact this office or one of our regional offices.

Sincerely,

DAVID R. TUTHILL JR., P. E.
