CONDITIONS OF APPROVAL

a. Modifications to or variance from this license must be made within the limits of Section 42-222, **Idaho Code,** or the applicable Idaho Law. This right may be forfeited by five years of non-use.

b. The right to the use of the water hereby confirmed is restricted and appurtenant to lands or place of use herein described, and is subject to all prior water rights, as provided by the laws of Idaho.

c. Any water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water other than hydropower, within the State of Idaho initiated later in time than the priority of this license.

Re: Permit No. 37-7587

Dear Mr. & Mrs. Bell:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

SUBJECT Application for Permit No. 37-7587 - Verl C. Bell, Ancie P. Bell (Amended)

Springs arise at the location identified in the application; the springs are sufficient to supply the amount of water applied for. It is very difficult to follow the water for more than 100 yards, due to the location of the springs and the tendency of the water to rise and sink in short distances. It does not appear there are any other users of the water.

I would recommend the application be approved.

Re: Application For Permit No.

Dear Mr. Bell:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 37-7587 . You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?

2. Is the proposed water supply insufficient for the purposes intended?

3. Is the application made in good faith or for delay or speculative purposes?

4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of .02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required. (Section 42-202, Idaho Code).

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right of way over private or governmental lands. Any right of way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

Very truly yours,

Re: Application No. 37-7587-Verl C. Bell, Ancie P. Bell

Dear Mr. Standal:

This is to acknowledge receipt of the protest filed to issuance of a permit pursuant to the above-refeenced application. The following are the principle items that can be considered at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?

2. Is the proposed water supply insufficient for the purposes intended?

3. Is the application made in good faith or for delay or speculative purposes?

4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

The Department suggests that you contact the applicant directly in an effort to determine what is proposed in the application and to attempt to resolve the protest.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right of way over private or governmental lands. Any right of way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Very truly yours,
