Re: Permit No. 37-7541

Dear Mr. Jensen:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.

Sincerely,

Gary L. Funderburg

SUBJECT

Surface Water Application No. 37-7541 - Everand Jensen

On 12-15-76, I made a field trip to the proposed place of use and point of diversion of permit 37-7541. The applicant proposes to use Birch Creek water, which is a tributary to Snake River, for fish propagation in existing fish ponds. The applicant already has a water right 37-7174 for the same type of use. The proposed point of diversion is on the tail end of Birch Creek where the applicant is the last water user of Birch Creek. There are other users above the point of diversion but none below. These uses are irrigation and stock water. There appears to be sufficient amount of water for the applicants proposed use.
