RE: Transfer Review (No. 4004)

The above referenced transfer application proposes to change the place of use under this right.

Advertising was completed correctly. Proof of ownership of the lands to which the water is being transferred is evidenced by a Warranty Deed. Proof of ownership of the lands from which the transfer is taken is evidence by a QuitClaim Deed which specifically lists this right.

The original lands are also irrigated with water from American Falls Reservoir District. The new lands are also presently irrigated with district water, therefore, the issue of expansion is not of concern.

The transfer can be approved with the following conditions:

- T07 The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
- T08 Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.

Last month I inspected this irrigation system. A re-lift pump on the canal ditch pressurizes sprinklers that irrigate about 392 acres. The well discharges into the ditch just above the re-lift pump. According to Mr. Pavkov, the pump & sprinklers went in about 1971 & the well went in in 1973. Although the well is only licensed for 240 acres, it appears that it has been historically used on the whole 392 acres as needed in conjunction with the canal water. I don't believe that the system could be operated so as not to irrigate ^{all} ~~some~~ of the original land. On the other hand, all the land involved has been irrigated with canal water. So the total number of irrigated acres should not change if this transfer is approved; no new land will go into production. Without a watermaster to control the well, any conditions of approval would just be a paper exercise on our part. But at least a totalizer meter should

Dear Mr. Pavkov:

We have received your amendment application and check for \$20.00. However, we cannot accept the changes that have been made on the application. When our field examiner did the examination of your system, he did not find the 120 acres you indicate.

Are you no longer irrigating the 120 acres within the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 9; and in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 10, Twp. 6S, Rge. 15E?

If you wish to have a re-examination of this property, please contact us within 10 days and we will inform our regional office. However, if after reviewing your land you find that the original amendment is correct, please make the corrections to show it as originally sent and return it and the \$20.00 check within the 10-day period and a license will be issued.

Dear Mr. Pavkov:

One of the conditions of approval of your water Permit No. 37-7255 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before September 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
