Remarks I have worked w/ Mr. Stevenson for 18 months to have proper measuring devices installed. He claims that additional water enters his system above his lowest fish pond. But since he did not install a measuring device at this point, I recommend that only the water diverted from the Montana Ditch be licensed.

Re: Water Permits 37-7216; 37-7217; 37-7218; & My Letter of November 08, 1979

Dear Mr. Stevenson:

Since this is the third field season since you filed proof on these permits, I feel it is necessary for these exams to be completed this year. As I discussed in my letter of November 8, 1979, measuring devices need to be installed before the field work can be completed. Once this is done, we should discuss my findings to be sure that I have interpreted your diversion systems and water usage correctly.

Please contact me when you are ready to complete these exams. Unless this is done in 1980, I will have to recommend that the permits be cancelled due to lack of cooperation and failure to comply with requirements.

Sincerely,

James E. Stanton
Senior Water Resource Agent

Re: Water Permits 37-7216, 37-7217, 37-7218

Dear Lynn:

I've done as much of the field work as I could on these permits, and 37-7216 should be ready for licensing if you concur with my findings. Additional measuring devices need to be installed before the other two license exams can be completed. A weir plate needs to be installed at your main diversion from the Montana Mining Ditch for 37-7217 and 7218. The water that enters the two ponds in the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 8 from the Montana Mining Ditch also needs to be measured; a weir at the inlet or outlet of these ponds should suffice, or you may wish to install a flume in the Montana Ditch itself.

Since the number of irrigated acres I found is much less than what was filed on, I would like to meet with you to discuss this. Perhaps we could do this and complete the remaining field exams at the same time.

Sincerely,

James E. Stanton

Dear Mr. Fleming:

One of the conditions of approval of your water Permit No. 37-7218 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before May 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
