Dear Mr. Hibbard:

One of the conditions of approval of your water Permit No. 37-7199 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Mr. Gary J. Hibbard
Box 514
Hailey, ID 83333

Dear Mr. Hibbard:

I am returning your Application for Permit and check No. 92-232 to have some points in your application clarified. Also enclosed is an application which I have taken the liberty of typing.

Under item No. 3 of the application, your original application did not show a point of diversion. However, from the map it would appear that it is in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, of Sec. 32. The map indicates that the township is 5. However, it does not say whether it is north or south of the Boise baseline. If your property is near Shoshone, it would be south. Under item 8b the amount of land listed for irrigation does not agree with your map. On the new application I have penciled in my estimates of the amount of land to be irrigated based on the map. If these are not correct, please put the right amount in and change the map to agree with the figures that are correct. I have left the amount of water to be used under item 4 and 5a blank. We are limited by law to allowing .02 cubic feet per second per acre of irrigation. With 180 acres that I have estimated from the map, the 3.6 c.f.s. would be the proper amount and I have penciled this in. Would you please indicate in item 8c if there are any other water rights used for the same purposes on this land. Please indicate under items 9a and b whosowns the property at the point of diversion and the place of use.

If you will supply the needed information together with a check for the proper amount of the filing, we will process it promptly. For your convenience I have enclosed a fee schedule should the amount of water you decide to appropriate fall in a different category than what had been indicated.

If we can be of any assistance, don't hesitate to contact us.

Very truly yours,

Bob Haynes
