THIS IS TO CERTIFY, that HAROLD R. TURNER
of Gooding, Idaho, has complied with the terms and conditions of Permit
No. 37-7160 issued pursuant to Application for Permit dated August 30, 1972,
and has submitted proof to the Department of Water Resources on January 9, 1974,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.30 cfs of water from a groundwater source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>April 1</u> to <u>October 15</u>	at <u>0.30</u> cfs and	<u>90</u> acre feet
<u>Stockwater</u>	from <u>January 1</u> to <u>December 31</u>	at <u>0.02</u> cfs and	<u>0.4</u> acre feet
	from _____ to _____	at _____ cfs and	

(both dates inclusive)

Subject, however, to the condition that no more than 0.30 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
90.4 acre feet per year, said waters to be diverted within the NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 34, Twp. 5S,

Dear Mr. Turner:

A representative of this Department made an examination of the works covered by your Permit No. 37-7160 on August 8, 1976, and has found the following:

Amount of water that can be recognized as beneficially used under Idaho law: 0.30 cfs Source: groundwater

The maximum quantity diverted shall not exceed 90.4 acre feet per year.

Point of diversion: NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 34, Twp. 5S, Rge. 15E, B. M.

Beneficial use: Stockwater and irrigation of 30 acres within the NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 34, Twp 5S, Rge. 15E, B. M.

Priority date established: September 14, 1972 (late proof)

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

Dear Mr. Clifford:

You are the permit holder of record of water right Permit No. 37-7160, which is in danger of being lost for failure to install a measuring device.

Have you been able to locate a measuring device yet? If not, we would suggest that you contact Ames Irrigation Service in Twin Falls as an alternate supplier of a measuring device.

Another alternative solution to the problem would be the removal of the measuring device requirement from your permit as alluded to by Mr. Funderburg in his letter of September 29, 1974, to you. This condition may be removed if your rate of diversion does not exceed 0.30 cfs of water or about 135 gallons per minute. You could estimate the output of your system from the pump capacity to determine if it is less than 135 gpm.

If you determine that the capacity of your system is less, then please request by letter that the measuring device requirement be removed from your permit. If you determine that the capacity is greater than 135 gpm you should continue with the installation of your measuring device.

Please let us hear from you before February 1, 1976, requesting the removal of the measuring device condition or stating that a measuring device has been installed otherwise, we will have to proceed with the cancellation of your permit.

Sincerely,

Dear Mr. Clifford:

I am writing in regards to Permit No. 37-7160 to appropriate water.

This last irrigation season I contacted you concerning installation of a measuring device as a condition of your permit. As of that date, there wasn't a measuring device installed.

This letter is to inform you that as of July 1, 1975, if a measuring device is not installed, we will consider this as grounds for cancelling the permit.

If you have any questions, please don't hesitate to contact us.

Thank you.

Dear Mr. Clifford:

I received your letter of October 23, 1974, and would like to express to you that we are trying to complete our file records here in this office. Our correspondence with you dates back to May 28, 1974. We understand the circumstances that you are having with selling your property, and with getting a measuring device installed. One of the conditions of your permit is to have a measuring device installed along with your diverting works. It is not up to the buyer to install this measuring device, it is up to who filed beneficial use on this permit.

An assignment of a permit is used when the owner has sold his property to a buyer. It is not used before the property is sold unless it is used for collateral. You will still be liable for this permit which is in your name until we have received on record assignment of a permit that you have sold your land.

I will recommend to the State Office to cancel this permit, if for some reason, we cannot complete the requirements established by the department on such permit before this irrigation season is completed.

I will be more than happy to try to work with you to maintain this permit, but we do have our requirements as field examiners to meet. Please contact me at your earliest convenience.

Dear Mr. Clifford:

I received your letter of September 26 and would like to express my appreciation for your contacting me concerning the letter I wrote to you.

You asked my advice pertaining to ordering the 2½" measuring device. Since you are in the process of selling your property, I suggest your let the new owner take over the permit and enclosed you will find an assignment of permit. This will assign the rights that you have filed over to purchaser of your ranch. Would you please have him contact us as soon as the escrow has been signed so I will be able to communicate with formal information concerning the permit. If you are unable to install a measuring device, there may be a way in which the Department may accept a letter of waiver to exclude the measuring device for this small system. We would preferably have the measuring device as it is a statutory requirement. We may wait until spring of 1975 to complete the field exam for this permit.

Please contact me at your earliest convenience.

Dear Gary,

In reference to your recent letter. Wish to inform you again I have been trying for some time now to receive and install a measuring device. Again because of a 2 1/2" small meter, Ranchers Irrigation have not been able to fulfill the order after a great deal of inquiring through other sources. etc. I am fully aware of my responsibility and wish to fulfill my obligation according to your conditions. I am also fully aware it is not up to the buyer. We certainly tried to meet your requirements. That's the way it stands so far.

Any suggestions would be appreciated.

Dear Mr. Clifford:

One of the conditions of approval of your water Permit No. 37-7160 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Clifford:

We are returning your Application for Permit with you check No. 92-166 in the amount of \$25.00 along with a new Application for Permit which we have taken the liberty to type for you.

We have made a few changes which we want you to note before signing and returning the application to our office. Under Item 3a, we have typed in the point of diversion. Under Item 4, we have changed the amount of water from .50 to 0.02 because .50 is excessive and 0.02 is enough water to provide for 100 head of cattle adequately. Also, we have typed Jan. 1 to Dec. 31 as the period of time used for stockwater. Under Item 7a, we have typed 1 year as the time required for completion of the works. Under Item 8b, we have typed the amount of acres in the NE 1/4, Sec. 34, T. 5S, R. 15E, D.M. subdivision of the chart.

If you have any questions, please feel free to call or come into our office. Our phone number is 734-3578 and we are located at 1041 Blue Lakes Boulevard North, Twin Falls, Idaho.

Very truly yours,

Bob Maynes
District Engineer
