Dear Mr. Molina:

On July 24, 1967, the Shoshone District Manager issued an Initial Decision approving your desert land petition Idaho 017429.

According to your plan of development, water for irrigation is to be obtained from a well to be drilled. You must submit evidence of your right to appropriate and use the water. The evidence should consist of a copy of a State water permit approved by the State Reclamation Engineer. Attached is an extra copy of this letter. The copy should be submitted to the State Department of Reclamation at the time you apply for a permit. Unless they have knowledge that the land of the desert land application has been classified as suitable for entry, they may decline to issue the water permit. You should make arrangements with the State Reclamation Engineer to have a copy of the permit sent to this office.

We would appreciate receiving a copy of the permit as soon as possible.

Sincerely yours,

Re: Permit No. 37-7009

Route # 1
Gooding, Idaho 83330

Dear Mr. Stevenson:

One of the conditions of approval of your water Permit No. 37-7009 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

Through a cooperative arrangement with the well drillers licensed in Idaho, notice is supplied to this agency prior to the construction of wells drilled in connection with exploration for groundwater.

We were notified that you are constructing a well located in Twp. 6S, Rge. 15E, B.M., Sec. 14, NE $\frac{1}{4}$ NW $\frac{1}{4}$. We have reviewed our records, and the preliminary check has failed to indicate that you have filed an application with this agency. If we have overlooked your permit, please advise us of the number by return mail. If you have indeed not filed an application for permit, and your diversion is other than a single family domestic unit and producing less than 13,000 gallons/day, then you are required to file an application before construction starts and receive a valid permit from this agency before groundwater may be diverted.

Idaho has been under a mandatory permit system for groundwater since March 25, 1963: Reference: Carl Tappin, State Reclamation Engineer, v.s. Clyde Smith and Bonny Smith, Idaho Supreme Court, 1967. Therefore, it is held by this agency as an illegal act to divert groundwater without the aid of a valid permit or a license on appropriations with a priority junior to March 25, 1963 for other than excluded above.

We will supply you with an application for permit and instructions if you so request. Please contact us for forms or if we can be of any service.

Very truly yours,

Donald W. McEldowney
Water Rights Supervisor
