6. General Information:

a. Description of diversion system 6 connected wells & pumps, mainlines to city water system. A million-gallon storage tank, & 5,000-gallon tank.

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or N/A contracts? N/A Yes _____ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer: N/A

d. Remarks:

Of the six wells claimed, only two pump into the pressure tank. Their measured capacity (1981 exam) is 4.15 cfs, but we need 5.57 cfs to keep the tank full. Eventually all wells will go directly into the main tank.

Section 42-225a, Idaho Code

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

RE: Transfer of Water Right Nos. 37-04080/37-07585/37-07586

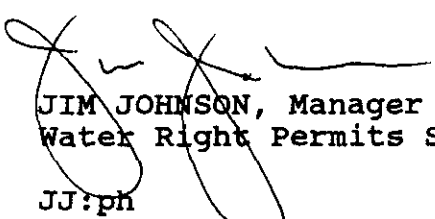

Dear Water Right Holder(s):

Enclosed is a copy of your approved Transfer of Water Right for the above referenced water rights (Transfer No. 4857). Please be sure to thoroughly review the "Conditions/Remarks:" as listed on the transfer.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR to July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

MEMORANDUM

TO: FILE NOS. 37-04080, 37-07585 & 37-07586

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER NO. 4857

DATE: September 4, 1996

=====

Transfer No. 4857 was filed by the City of Gooding to combine their municipal rights into a single combined system, combining all the existing wells and adding a proposed new well. Six total wells will be combined to serve municipal uses.

The transfer application originally included two SRBA Claims associated with the historic use of two wells identified as the Lincoln Inn well (A37-11204) and the TB Hospital well (A37-11210). Review and investigation by the region office found that these wells had not been used for many years, if ever in the case of the Hospital well, by the city for municipal use. The Lincoln Inn well had the pump removed about 25 years ago and the site has since been paved over. These two SRBA Claims are being recommended disallowed by the Southern Region manager and are not a part of this transfer approval.

The two licensed rights are both from four existing wells and the statutory claim identifies the two oldest of these wells. The total rate of diversion confirmed and licensed is 5.90 cfs. The total capacity of the four wells was found to be 7.05 cfs (See region memo dated 8-9-96). The combined total of the licensed rights and the claim are limited to the capacity of these wells or 7.05 cfs under this transfer approval.

The priority date of Statutory Claim No. 37-04080 was retained as originally claimed. The SRBA Claim for this right identifies an earlier priority and will be evaluated through the adjudication process. All three rights are for Municipal use within the city of Gooding.

Recommended conditions include drilling permit requirements, non-confirmation of claim, multiple points of diversion/measuring devices, future annual reporting and standard transfer conditions.

SUBJECT: Review and Recommendation

The purpose of this transfer is to add a new well to the delivery system of the city and possibly link all wells to all rights.

The transfer was advertised without protest.

Review of the water rights finds that the capacity of the system appears to be over stated. A tabulation of the well capacities is listed below:

Well Name	location	water rights	meas cap
Water Tank #1	NESESW S32	A37-04080 37-07585 37-07586	2.45 cfs

Lincoln Inn	NESESE S31	A37-11204	(not meas.) Claimed 2.80 cfs
TB Hospital	NENWNW S8	A37-11210	(not meas) Claimed 0.36 cfs

7.05 cfs

*Note that licenses 37-07585 & 37-07586 are combined in an SRBA claim A37-11221 and A37-11210 is related to statutory claim 37-04089.

It appears that the capacities of the first four wells is well documented. On 8/6 I asked Jim Stanton to investigate further the Lincoln Inn well and the TB Hospital well. His memos are attached regarding his investigation. Based on Jim's findings I recommend that claims A37-11204 and A37-11210 be disallowed in the SRBA and that their associated capacities not be included with approval of this transfer.

I recommend that the transfer be approved with deletion of rights A37-11204 and A37-11210. The approved capacity should be limited to 7.05 cfs.

Additional recommended approval conditions include:

- The new well must have a valid drilling permit for construction.

- All wells must have a measuring device with totalizing meter installed.

- Additional diversion capacity for the system must be obtained by either obtaining a water permit or transferring other rights to the system. At present the system is limited to 7.05 cfs capacity.

SUBJECT: App. for Transfer #4857, City of Gooding

Today I spoke with Howard Kestie of the Dept. of Lands in Gooding. He gave me some history on the well located at the old TB hospital south of town. The well may have been put in as early as 1920 to serve a Methodist school that existed on the west part of the property, or it could have been put in for the hospital that was built in 1957. With the hospital in place, the city system was deficient in the case of fire fighting. So a removable connection was built between the hospital well and the city system. Howard thought that the connection was used very little if ever, so the historic use by the city would be minimal at best.

The main purpose of this well was to supplement canal water for irrigation of the hospital property (about 30 acres of the 40). A ditch pump served a sprinkler system with buried mainline, and the well was available to supplement this if the canal flow went down for some reason. This would prevent the ditch pump from burning up. Again, the well was used very little for irrigation.

The well has not been used at all since the Dept. of Lands moved out of the property in 1983 or '84. So any right that might have existed on this well in the past should be considered as forfeited for non-use under Sec. 42-222 of the I. C. I can take a look at this well if you want, but the evidence of forfeiture seems to be pretty clear. Howard wasn't sure of the pump size, but said he would go out with me to take a look if needed. The pump is in a locked building.

SUBJECT: App. for Transfer #4857, City of Gooding

Today I talked to the city water department about the Lincoln Inn well and the well at the old TB hospital. I was told that the pump was removed from the Lincoln Inn well 25 years ago or more, and that the well site is now a paved parking lot with a microwave tower on it. He said that the city water system operates under 72 psi. At 72 psi & 160' lift, the 125 hp pump would have a theoretical capacity of 2.36 cfs. However, there seems to be indisputable evidence that the pumping capacity for this well has been forfeited due to many years of non-use.

I was also told that the city never operated the hospital well, but that it was run by the Dept. of Lands. I will be contacting them for additional information. However, it doesn't seem right to let the city transfer the right from this well (if any exists) if they never owned it.

The purpose of this transfer is to add a new well to the delivery system of the city and possibly link all wells to all rights.

The transfer was advertised without protest.

Review of the water rights finds that the capacity of the system appears to be over stated in literal reading of the rights in that if you take the face rate of the rights and add them up, as the transfer application indicates, the total exceeds the actual capacity of the system. This came about in that licenses 37-07585 and 37-07586 were licensed on wells that also have beneficial use claim 37-04080

SEP 12 1996

Jim,

Please gather information sufficient to do 2 theoretical calculations for these two wells or obtain 2 measurement of capacity. Also determine if wells can presently be used for fire protection.

City of Gooding Water Right Analysis 8-13-93

1. Claim A37-04080

Both wells pump sand, so are only used for irrigation. Line to municipal system cut in 1992. Only one well used at a time, so only capacity of larger well is claimed. Larger well measured at 2.45 cfs in 1981 licensing exam, but 2.8 cfs claimed in SRBA. Wells now water about $1\frac{1}{2}$ acres of park & lawn

2. License 37-7585

Permit was for well in NE/NE Sec. 6 at 2.7 cfs. Exam Found 2.43 cfs. License was issued for 2.7 cfs on all wells in system (4) - pure garbage, & not the intent of the permit. Used for municipal by pumping into storage tank. Original 50,000-gallon tank replaced by million-gallon tank in 1988 or 89

3. License 37-7586

Permit was for well in SE/NE Sec. 6 at 3.2 cfs. Exam Found 1.72 cfs. License was issued for 3.2 cfs on all 4 wells in system - pure garbage, & not intent of permit. Used for municipal by pumping into same big tank as 7585 (pumped directly into mainline at time of licensing).

4. Claim A37-11221

Claim covers wells in Sec. 6 only but aims to combine 37-7585 & 7586. Claims a capacity for these 2 wells of 5.57 cfs instead of the licensed flow of 5.9 cfs. Actual measured capacity is 4.15 cfs. Only these 2 wells supply the million-gallon tank. Rest of licensed rate came from original city wells in Sec. 32 (see A37-04080 above).

5. Claim A37-11204

Claims 2.8 cfs from old well at the Lincoln Inn. City has stated that well was contaminated by sewage from nearby septic tanks so has not been used for over 30 years. The pump is still in place, however, so the City thinks this is still a valid right.

6. Claim A37-11210

Claims 0.36 cfs from well at old TB hospital. City has stated that well has not been used for at least 8 years. Pump is still in place, so City claims right is still valid.

MEMORANDUM

TO: City of Gooding Transfer File

FROM: Corey Skinner *CS*

DATE: June 11, 1996

SUBJECT: Staff Review

The enclosed transfer application, filed by the City of Gooding, seeks to add diversion points to licenses 37-07585 and 37-07586 (SRBA claim A37-11221 and part of claim A37-04080) and SRBA claims A37-11204 and A37-11210.

Apparantly the City of Gooding currently has six wells that are listed as diversion points in the licenses and claims mentioned above. These well locations and corresponding licenses and/or claims are as follows...

WELL LOCATION	LICENSE	SRBA CLAIM
NESESW, Section 32 (two wells)	37-07585 37-07586	A37-04080
SWNESE, Section 6	37-07585 37-07586	A37-11221
SWSENE, Section 6	37-07585 37-07586	A37-11221
NENWNW, Section 8	none	A37-11210
NESESE, Section 31	none	A37-11204

The four wells covered under licenses 37-07585 and 37-07586 were measured in the 1981 licensing field exam and were found to have a total system capacity of 7.05 cfs. The section 32 wells were measured at 2.9 cfs (one at 2.45 cfs and the other at 0.45 cfs) and the section 6 wells were measured at 4.15 cfs (one at 2.43 cfs and the other at 1.72 cfs). However, 37-07585 and 37-07586 were originally permitted for only 2.7 cfs and 3.2 cfs respectively, and were licensed for these amounts.

In addition, SRBA beneficial use claims for the wells in section 8 and 31 are also involved with this particular transfer. However, the "part 2's", of the enclosed transfer application, for these two claims (A37-11210 & A37-11204) state that these two wells have experienced longer than five consecutive years of non use and are subject to forfeiture.

SEP 12 1996

T # 4857

Page 2
Gooding Transfer Memo
06/11/96

The enclosed transfer seeks to add a new point of diversion (in the NWSWSW of Section 32) along with the existing wells in section 32 (two wells), section 8, and section 6 (two wells) to the licenses and claims listed on the previous page. The individual flow rates for these licenses and claims add up to more than the "total amount of water being transferred" as listed on part one of the application. However, the total amount of water being transferred (10.21 cfs) is based on the 7.05 cfs system capacity (from 1981 field exam) of the existing wells in sections 6 and 32, the 2.8 cfs claimed under A37-11204, and the 0.36 cfs claimed under A37-11210.

Since the wells for claims A37-11204 and A37-11210 have not been used and appear forfeited, it appears to me that only the measured 1981 system capacity of 7.05 cfs for the sections 6 and 32 wells could possibly be available for transfer. However, this amount is only licensed for 5.9 cfs (2.7 + 3.2). Based on this information, I see the rights and claims involved with this transfer as follows...

License 37-07585..... 2.7 cfs

License 37-07586..... 3.2 cfs

Total licensed amount for sections 6 & 32 wells = 5.9 cfs

Claim A37-11221..... 4.15 cfs
(system capacity of the section 6 wells in 1981 licensing exam)

Claim A37-04080..... 1.75 cfs
(licensed amount 5.9 - 4.15 = 1.75 cfs. However if City of Gooding can prove the section 32 wells were present prior to 1963, then A37-04080 would be 2.8 cfs, the amount claimed since 1981 exam measured 2.9 cfs on section 32 wells)

Claim A37-11210..... FORFEITED
(Due to more than five consecutive years of non-use as stated on Part 2 of enclosed transfer application.)

Claim A37-11204..... FORFEITED
(Due to more than five consecutive years of non-use as stated on part 2 of enclosed transfer application.)

Re: Applications for Transfer No. 4857 & 4858

Dear Mayor Adair:

The Department of Water Resources acknowledges receipt of your Applications for Transfer.

This office has scheduled advertising the applications in The Gooding County Leader for 7/3 and 7/10/96.

The advertisements will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If an application is protested, you will be sent a copy of the protest. The protest must be resolved before an application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

State Office personnel will conduct a complete review prior to final processing of an application and will notify you of the outcome of this review.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely yours,

Corey Skinner, E.I.T.
Safety of Dams Engineer
