Under the terms of your permit No. R-1023 you are required to complete you diversion works on or before November 4, 1958. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

GEO. N. CARTER

EASEMENT AND AGREEMENT

THIS INDENTURE, Made this 12 day of September 1957, by and between the BIG WOOD CANAL CO., a corporation, organized and existing under the laws of the State of Idaho and having its principal place of business at Shoshone, Lincoln County, Idaho, hereinafter referred to as the Party of the First Part, and THE STATE OF IDAHO, Department of Fish and Game, hereinafter referred to as the Party of the Second Part;

WITNESSETH:

That the Party of the First Part, for and in consideration of ONE AND NO/100 DOLLARS, cash in hand paid by the Party of the Second Part, the receipt of which is hereby acknowledged by the Party of the First Part, does hereby grant to the Party of the Second Part an easement for the purposes of construction, operation and maintenance of a dam on, over and across its lateral, designated "Old Lateral #1685", located in Lot 3, Section 1, Township 5 South, Range 14 East, Boise Meridian, and being 70 feet in width, together with the right to inundate said lateral by storage of waters within the reservoir area of said dam.

It is understood and agreed by both parties hereto that in the construction of said dam the Party of the Second Part will install and maintain a 12-inch corrugated metal pipe headgate at the present elevation of said Old Lateral #1685 where the same intersects the damsite. The proposed headgate and its location is to provide for continuance of the carriage of water in Old Lateral #1685 at the discretion of the Party of the First Part. However, the Party of the First Part in no way claims water storage in the dam reservoir and agrees further that in the event water is withdrawn from said reservoir, said flow of water withdrawn shall not be in excess of that which it has caused to enter said reservoir through Old Lateral #1685 within the last past 24-hour period of time.

It is further understood and agreed that the Party of the First Part may waste water from its canal into Old Lateral #1685 at any time at its discretion.

The Party of the Second Part agrees to install a water measuring weir in Old Lateral #1685 to be placed below the gate outlet of said dam. Said weir is for the purpose of determining the flow of water from the reservoir when said water is to be withdrawn as hereinabove specified.

It is further understood and agreed by the parties hereto that the Party of the Second Part may remove and borrow material from the right of way of Old Lateral #1685, provided that in the event the project is abandoned or vacated, the Party of the Second Part will cause to have filled with materials all pits within said right of way from which materials have been borrowed by said Party of the Second Part.

IN WITNESS WHEREOF, The parties hereto have set their hands and seals the day and year in this instrument first above written.
