Dear Mr. Hutchison:

Proof of completion of works and application of water to beneficial use for the above referenced permit is due not later than November 23, 1967.

Under the terms of your permit, it is required that a notice be published once a week for four consecutive weeks in a local newspaper showing your intent to submit proof. The proof will consist of depositions which the permit holder and two disinterested witnesses must complete before the listed notary public, and must be accompanied by an affidavit of publication of the legal notice.

We have prepared the enclosed notice from the information on your permit. The complete name and address of a notary public of the State of Idaho must be entered together with a date for you to appear before the notary. Allow at least 40 days from the date the notice is mailed to this department for your appearance before the notary.

If you find any discrepancy in the notice or have made any changes, please advise this department and we will assist you in doing whatever may be necessary to assure correct publication.

If the enclosed notice is correct, complete the blank spaces and sign the form authorizing us to publish the notice at your expense and return all forms. At the time we send the notice to the newspaper, you will be supplied with further instructions.

If you do not desire to complete the proofs and obtain a license of water right, you are requested to complete the relinquishment portion of this form below and return it to the Department of Reclamation.

We enclose Permit No. G-30820 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

We also enclose Departmental Receipt No. G-6461 which was issued covering payment in the amount of \$6.00 for the filing fee of the above mentioned permit. ~~was returned to you~~

Well logs are an important part of your recorded water right and State Statutes require that well drillers' supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office.

RE: Application No. G-38148

Earl Hutchison
Gannett, Idaho

Dear Mr. Hutchison:

The legal notice of the above numbered application has evidently been published as required by law for applications for permits to appropriate subterranean water from within a critical ground water area.

No protests were received in regard to this application. Idaho Code 42-233b provides that, in this case, the application can be approved for full amount of water claimed, or for a lesser amount of water, if the State Reclamation Engineer has determined that there is such an amount of water available, or the application can be denied.

A hearing will be held in regard to other applications for permit in the same area. All interested parties will be permitted to testify at the hearing. Until after evidence introduced at this hearing has been studied it is not possible to determine what additional amount can be safely diverted from subterranean waters in this critical ground water area.

Your application will be held until the determination as to availability of unappropriated water.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer

RE: Application No. G-38148

Earl Hutchison
Gannett, Idaho

Dear Mr. Hutchison:

Enclosed is a copy of the application you filed August 18, 1961, which has been cancelled, and Order of Cancellation of Permit No. G-30116.

Your application for permit was filed in the drawer with the applications which could be approved. As your application could not be legally approved prior to publication of the legal notice and any hearing in regard to the application, it was necessary to cancel the permit; however the same application number and date of priority will be retained.

Also enclosed are original and two copies of a legal notice to be published in a Blaine County paper. You sign and date the acknowledgement of service on all copies and have the paper complete the other three dates of first and last publication and last date for protest. Leave original notice with the paper, return one copy to this office and retain a copy for your file. Also send us the affidavit of publication from the paper.

In case the approval of your application is protested, a hearing will be held. After the hearing your application may be approved for full amount of water claimed, the amount of water may be reduced or the application may be denied.

Kindly sign the enclosed application No. G-38148 and return it to this office with the copy of the legal notice.

Very truly yours,
