Mr. Lowell D. Anderson

Dear Mr. Anderson:

I am writing in regards to Permit No. 37-2669 to appropriate water.

This last irrigation season I contacted you concerning installation of a measuring device as a condition of your permit. As of that date, there wasn't a measuring device installed.

This letter is to inform you that as of July 1, 1975, if a measuring device is not installed, we will consider this as grounds for cancelling the permit.

If you have any questions, please don't hesitate to contact us.

Thank you.

Dear Mr. Anderson:

It is my understanding that you have had a new well drilled in the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 26, T 6S, R 18E. We have a field exam to be completed on Permit 37-2669. Have you installed a pump at this location and are you irrigating lands presently described under this permit?

Please contact me and let me know whether you plan to use this well or whether I should cancel this permit. It would be wise if you would contact me as soon as possible. A measuring device may be required to be installed at the point of diversion.

Sincerely,

Gary Funderburg

Dear Alan:

I apologize for being so late in responding to your letter of 9-24-74, concerning Lowell Anderson. We will not be able to complete the field exam for licensing on this application this year. However, a preliminary field inspection indicates that an amendment on the location of the point of diversion will be necessary before licensing can be accomplished. I would propose that no amendment be filed until the field exam is made in case some other facet of the application needs to be changed.

If I can be of any further assistance, don't hesitate to contact me.

Sincerely,

Re: Permit No. G- 29907

Lowell Anderson
Dietrich, Idaho

Dear Mr. Anderson:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 29907 are due not later than **July 11, 1966**

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated -- all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

Carl E. Tappan
