Ans. -----

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ques. 2. Are you acquainted with Mrs. D. H. Crone, the holder of Permit No. G25639? How long have you known him and where does he reside?

Ans. Yes. Mrs. Crone resides at Holcolm Road Oregon City, Oregon

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Water comes from well in NW corner of NW 1/4 Sec. 4 Twp 1S.R. 19 E.B.M Blaine County, Idaho; Water is raised by electric pump and discharges into ditch system on land where it is used to irrigate

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Pump will pump about 250 to 300 inches, and ditches can adequately handle this amount. I have seen 250 to 300" so pumped and conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

R. 19 E.B.M. This is all cultivated land, and the use of this water makes the difference between a profitable operation and a losing operation. the 69" of 1883 water is just not enough to irrigate; after the 1886 rights are cut, you can't even get this down to the property.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. -----

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. This land is rather level, gravelly in some spots and takes a good head of water to cover it. At least 160" over the decreed rights is necessary to profitably cultivate the land.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No. During year 1955 and crop season 1956 I leased property on share crop basis, but my lease has terminated.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I had property leased when well was put on by Mrs. Crone. It was first used about July 5, 1955, and used continuously after that date about October 15 1955; in 1956 it was turned on about June 20, and used until October 1st. The amount of water used has been at least 160" at all times.

Dear Mr. McFadden:

In reply to your letter relative to Mrs. Alva M. Crone's Permit in which you state that Mrs. Crone is presently living in Oregon City, Oregon and it is doubtful if she can be here on October 24, 1956, the date set for hearing of application for proof of beneficial use of water. And that you are requesting to know if it would be possible for her depositions to be taken in Oregon City, Oregon, before a Notary Public and the depositions of the two witnesses taken in Hailey before you.

We have allowed this to be done in a couple of cases and in one case we had so much trouble that since that time we have not allowed the same. We would suggest that she give some one who knows the terms of the Permit and the lands and water rights in question, the power of attorney to sign said proofs.

The publication Notice is sent to the paper for publication purposes. The land description reads as follows; NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 3, NE $\frac{1}{4}$ SE $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 4, Township 1 South, Range 19 East. B. M.

Dear Sir:

Enclosed herewith you will find application of Mrs. D. H. Crone for well waters. You will note that the question as to annual withdrawal of acre feet per annum has not been fully answered as we have not been able as yet to get any data as to how much water will be needed on this ground. This ground is south of the Baseline and there are certain calendar years that a great deal more water is required. If you feel it necessary to insert a figure in here, please put in such figure as your experience has lent to be a reasonable figure for what would be customarily required.
