Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. From a drilled well in NE 1/4 Sec. 18, T 6 S - R 14 E. The works consist of
a well drilled to a depth of 115' with a 75' lift, 10" hole cased 3'. This is
all by gravity ditches.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate these works will convey 225" of water to the place of use.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I have seen the pump deliver 225" of water. I am familiar with irrigating and
from seeing other wells measured, I would estimate this would produce 225", and
I know Greta Graves uses 100" of this on her land.

G 24774

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This is used for irrigation on SE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 7, 15 acres. In Section 18, NE $\frac{1}{4}$ NW $\frac{1}{4}$, 35 acres, SE $\frac{1}{4}$ NW $\frac{1}{4}$ 15 acres; NE $\frac{1}{4}$ SW $\frac{1}{4}$, 10 acres; SE $\frac{1}{4}$ SW $\frac{1}{4}$, 15 acres, Lot 2, 10 acres, Lot 3, 7 acres and Lot 4, 15 acres. There is no natural meadow here, and all the improvements made have been as a direct result of said use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. This is a sandy loam soil, and I figure this will take at least 5/8" per acre

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Since they first started this in 1954, I have been familiar with this and have seen it at least one a week.
