Re: Permit # 21820

J. Eugene Fredrickson
Cannett, Idaho

Dear Mr. Fredrickson

Statutes requires a field inspection in connection with the proofs on Permit # 21820 before license and certificate of water right can be issued.

Such inspection and report on same is required for any and all permits being brought to license within this State.

An inspecting Engineer from this Department requests that you or someone familiar with the terms of the permit and representing you be prepared to accompany him on the inspection, on Tuesday

August 6th.

If he cannot get in touch with you by phone or otherwise he will drive to the well location or point of diversion given in the permit.

Dear Mr. Fredrickson:

We acknowledge receipt of the depositions of yourself and two witnesses, also affidavit of publication in *The Hailey Times*, all submitted in proof of Beneficial Use on Permit No. 21820.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Boise, Idaho

Dear Sir:-

Under the terms of your permit No. 21820 you are required to complete your diversion works on or before December 16, 1955. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Fredrickson:

In reply to your letter of November 8, 1950, we enclose herewith an Application for Permit to appropriate the Public Waters of the State of Idaho, together with a pamphlet giving regulations and instructions in regard to filing same.

The same form is used for filing on a well as for surface water, but in describing the point of diversion as called for in Question 4, you should give the location of the well by subdivision, Section, Township and Range.

When this application is approved, it will be signed by the proper State Officials and sent you as a use permit under which you may proceed with the construction of the work described in the application. In order to complete your water right, two proofs are required as follows:

First, proof of completion of works which is made by affidavit before a Notary Public. The time required for making this proof should be stated under Question 12 in the application.

The final proof is made when the water has been completely applied for irrigation or whatever purpose it is intended. Notice of such proof must be published for four consecutive weeks in a county newspaper at your expense, and at the time set for proof, depositions are to be executed by yourself and two witnesses in proof of such beneficial use. The additional time required for making this proof should be stated under Question 13 of the application.
