Re: Permit 12879

Mr. S. T. Baer
Manager, Big Wood Canal Company
Shoshone, Idaho

Dear Sir:

Our records disclose that Permit 12879 was filed in this office March 16, 1917 and that a license was issued thereon to Birdie Bossuet October 24, 1919 for 41 miners inches of water, priority March 16, 1917, for use upon NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 34, 25 acres, SW $\frac{1}{4}$ Section 34, 8 acres, and SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 33 9 acres, all in Township 4 South, Range 19 East. In the original permit, two points of diversion were designated, both in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 34, 10 inches of water being claimed from an unnamed stream, and 60 inches of water from an unnamed slough, presumably the license allowing a proportionate amount at each point of diversion, although no statement is made to that effect, or otherwise.

You ask for present office policy as regards accepting applications for permit to appropriate water from unnamed streams which water is in fact waste water from a Carey Act project distribution system. Please be advised that such applications are not approved by this Department, unless it can be shown that the water which was originally appropriated by the Carey Act company has passed from their control and possibility of gathering for reuse. So far we have been quite successful in maintaining this policy in spite of the rather strenuous opposition which has developed in some parts. Had such policy been in effect at the time the above mentioned application for permit was filed, it is likely same would not have received approval. Whether or not any rights have become vested by virtue of the said permit and license, I am not prepared to say. In any event, it has now passed from the jurisdiction of this department.

Very truly yours,

Dear Sir:

Before license can issue under the above numbered permit, the statutory fee of \$2 for each 40, or fraction thereof, reclamation, must be submitted to this office. The report of our examining engineer shows a portion of three 40s covered by the permit; so accordingly the fees amount to \$6.

Instructions To Examiners

- 1. Examiners will not be permitted to examine any of the records in the office pertaining to this permit. They are to furnish a report of the facts and conditions as they exist, from their own observations and inquiries.
- 2. Always carefully note the location of the point of diversion, and accurately plat same.
- 3. Find out how many parties own rights in the ditch or canal and give their names and amount of right.
- 4. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
- 5. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
- 6. If any unusual conditions are discovered, make a plain statement of them under remarks.
- 7. Always see the holder, if possible, and go over the whole ground with him, and make your report only upon actual existing facts and conditions.

State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. For irrigation purposes. It is now used on the SE 1/4 SE 1/4 of Sec. 33,
and W 1/2 SE 1/4 of Sec. 34, Township 4 South, Range 19, containing 120 acres.
SE 1/4 SE 1/4 of Sec. 33, has 25 acres; SE 1/4 SW 1/4 of Sec. 34 has 25 acres, and
NW 1/4 SE 1/4 of Sec. 34 has 25 acres. A portion of the land has been in
alfalfa for three years, and the remainder is newly seeded.

Ques. 7. If for other than irrigation purposes, state how applied, amount of horse power generated, etc.

Ans. _____

Ques. 8. What is the minimum amount of water required for the use specified above?

Ans. One inch per acre.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. _____

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. For past three years it has been used to irrigate 12 acres of alfalfa and 5 acres of wheat, and the remainder is now being seeded to clover and five acres additional in alfalfa. About 12 inches is claimed from the un-named stream and the remainder from the un-named slough.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. None at all.

Permit No. 12879

Proof of Application of Water to Beneficial Use

DEPOSITION OF WITNESS

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Alexander H. McKee, age 38 years. Richfield, Idaho, occupation farmer. Richfield, Idaho.

Ques. 2. Are you acquainted with Birdie Bossuet, the holder of Permit No. 12879? How long have you known her and where does she reside?

Ans. Yes, I have known her for over 3 years and her husband and family for several years. She lives on the land that is irrigated from this water and it is located about 2 1/2 Southwest of Richfield, Idaho.

Ques. 3. Have you read or heard read said Permit No. 12879, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Source of water is from an un-named slough, and is diverted in the SE 1/4 NW 1/4 of Sec. 34, Twp. 4 S. Range 19 E. B. M. There is a head gate about 2 feet square. A main ditch about 1 mile long, 2 to 3 feet wide on bottom, 1 1/2 feet deep, and will carry 4 or 5 feet of water. There is a stone and concrete flume about 110 feet long, 2 feet wide and 1 foot deep. Also a flume carrying the water across the river. It is about 1 foot square, and about 70 feet long. Also from the un-named stream is a ditch 40 rods long, 2 ft wide, 1 ft deep and will carry about 1 ft of water.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. It will carry about 200 inches or 4 feet. I have seen that much water.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. It is used for irrigation on the SE 1/4 SE 1/4 of Sec. 33 and W 1/2 SW 1/4 of Sec. 34, Twp. 4 South, Range 19 E. B. M. On each of these three forties there is about 25 acres of land irrigated. Crops have been raised on a portion of this land to my personal knowledge for past 8 years. A part of it has been in alfalfa for 8 years. It is now in alfalfa, wheat and clover.

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The soil is a sandy loam. It should have one inch to the acre for its profitable cultivation.

12879

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None at all.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen water used from this source on the land described, or a portion thereof each year for past 8 years. There was used about one inch to the acre or more all of this time, using at least 75 inches of water. 13 inches of water are claimed from the un-named stream and the remainder from the slough.

Permit No. 12879.

Proof of Application of Water to Beneficial Use

DEPOSITION OF WITNESS

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Charles S. McFarland, 54 years, residence, Richfield, Idaho, occupation farmer, P. O. Address, Richfield, Idaho.

Ques. 2. Are you acquainted with Birllie Bossuet, the holder of Permit No. 12879? How long have you known her and where does she reside?

Ans. Yes. I have known her about 4 years. She lives on the land covered by this water and about 2½ from Richfield, Idaho.

Ques. 3. Have you read or heard read said Permit No. 12879, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Source is an un-named slough, and an un-named stream. Both points of diversion are in the NW¼ Sec. 34, Twp. 4 S. Range 19 E. B. L. There is a head-gate about 2 feet wide and 3 feet high. A stone and concrete flume about 2 feet wide on bottom, 1½ deep, and will carry over 3 feet of water. A ditch about ¾ of a mile 3 to 3 feet wide on bottom, 1½ feet deep, and will carry 3 feet of water. Also a board flume carrying the water across the Little Wood River. It is a foot square and 70 feet long with a 125 foot fall. From the un-named stream, a ditch about 3 ft. wide 1 ft. deep, 40 rods long, carrying about 1 ft. of water to place of use, and how much water have you seen being so conveyed?

Ans. They will carry safely about 5 feet of water on account of its great fall. I have seen that much water going through.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. It is used for irrigation purposes. It has been used to irrigate a portion of this land for about 8 years. It is used to irrigate the SE¼ Sec. 33; and W¼ Sec. 34, Twp. 4 S. Range 19 E. B. L. Each of these three forties has about 25 acres of land so irrigated. It is in alfalfa, clover and grain.

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The soil is a sandy loam and it should have one inch of water to the acre for its successful and profitable cultivation.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None at all.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. The first water was taken out and used on a portion of this land to raise crops 9 years ago and has been used each season since that time. A portion of it has been in alfalfa for about 7 years. It is now in alfalfa, wheat and clover. 12 inches of water are claimed from the unknown stream and the remainder from the slough.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Frank M. Davis,
Richfield,
Ida.
Dear Sir:—

Boise, Idaho,

Under the terms of your Permit No.-----**12879**-----, you are required to complete your diversion works on or before Sept. 24, 1918. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

FRED A. WILKIE
