PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 22-07661 Telephone No. 208-356-7574
2. Name(s) of Permit Holder(s): Steeple Canyon Farms Inc.
3. Mailing Address: 49 E Sunset Circle, Rexburg, Id. 83440
4. Source of Water: Groundwater If GROUNDWATER (well), Date Drilled: mo. 5 / yr. 92
 - a. Well Driller: HIGH PLAINS DRILLING Drilling Permit Number: 22-92-E-0053
 - b. **OPTIONAL:**
Pump Horsepower: 400 Pressure (psi): 5/15 lbs Dynamic pumping level (ft): ?

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): _____ Stockwater (No. and type of stock): _____

Irrigation (No. of acres): 1820 Other: _____

6. Total rate of diversion and/or volume for which proof is submitted: 6.00 cfs OR _____ acre feet

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)
(This question is **not optional**. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required? Yes X or No _____
Has the measuring device been installed? Yes X or No _____

Flow Measurement Port: Is a flow measurement port required? Yes X or No _____
Has the measurement port been installed? Yes X or No _____

8. Fee Enclosed: \$ 225.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Mike Stevens & Phil Stevens Telephone Number: 356-7574/458-4288

Address: 49 East Sunset Circle, Rexburg Idaho 83440

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Signature of permit holder: Steeple Canyon Farms Inc.

APPLICATION FOR AMENDMENT OF A PERMIT

To change the point of diversion and/or the place of use.

Comes now Stevco Canyon Farms Inc Phone 458-4469
of (address) HC 60 Box 1099 Newdale Id 83436, and represents to the
Director of the Idaho Department of Water Resources:

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho
No. 22-07661, and requests that the permit and permit map be changed as follows:

1. Point of diversion: SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 13, Township 6N, Range 42E, B.M.,
County of Madison. Other points of diversion: _____

2. Period and nature of use: (irrigation, domestic, stockwatering, industrial, etc.)

Amount 6.00 for Irrigation purposes from 1 April to 1 Nov (both dates inclusive)
(cfs or acre feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre feet per annum)

3. Place of use or land to be irrigated:

See attached sheets

TWP	RGE	SEC	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				TOTALS

CONDITIONS OF APPROVAL

Amendment of Permit No. 22-07661

1. The previous conditions as set forth in Permit No. 22-07661 must be met.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of water Resources.
3. Construction of the well must comply with Idaho well construction standards.
4. Prior to the diversion of water under this right, a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 22-07661

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

REXBURG ID 83440

PROOF DUE NOTICE

RE: PERMIT NO. 22-07661

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1995. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Amendment Conditions

=====

The Application for Amendment of the above referenced permit is to be approved with the following conditions:

Approved provided the conditions as set for in Permit No. 22-07661 are met.

A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.

Construction of the well must comply with Idaho well construction standards.

Prior to the diversion of water under this right, a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 22-07661

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

INDEXED

SEP 25 1990

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

Mr. Gary Spackman
MANAGER, WATER RIGHTS PERMIT SECTION
Idaho Department of Water Resources
1301 North Orchard Street
Statehouse Mail
Boise, ID 83720

RE: APPLICATION FOR PERMIT NO. 22-761 22-7661

Dear Mr. Spackman:

Applicants for the above Permit brought your letter of July 25, 1990, to this office and asked that I respond. I will respond making reference to your requests item by item.

Firstly, with regard to Paragraph 4,5,3,1,2, see Exhibits "A" and "B". The proposed well is right near the North section line of Section 14, Township 6 North, Range 42 East, Boise Meridian, in Madison County, Idaho. As can be seen from the Exhibit, to the best of Applicants knowledge, there are no wells within a half mile radius of the proposed well. There is a domestic well owned by Frank Stevens a little less than a mile away from the proposed well, and there is an irrigation well owned by the Applicant a little over a mile away from the proposed well. The proposed well should effect neither of these wells.

With regard to Paragraph 4,5,3,1,3 in your requests, Applicant simply states that at the present time, they do not intend to employ any particular design, construction, or operation techniques to eliminate adverse impact on other water rights. No such design, construction, or operation techniques are necessary because Applicant does not anticipate that this well will impact any other water rights. If there is any impact to other water rights, it would be to their benefit rather than to their detriment. At the present time, Applicants are diverting water for irrigation purposes from Canyon Creek. This surface diversion is not sufficient to properly irrigate their crops on "low water" years. Initially, the proposed well would be used to supplement that water right and would therefore tend to lessen the demand on Canyon Creek.

SEP 25 1990

With regards to Request 4,5,3,2,1. Applicants would submit that the original Application is for 6 CFS to will be used from April 1, through November 1. If in fact, the proposed well delivers this 6 CFS that would amount to approximately three

Mr. Gary Spackman
Page -2-
August 23, 1990

thousand seven hundred (3,700) Gallons per minute or roughly twelve (12) acre feet per year. This, of course, would be the peak diversion amount. The maximum period of use would be April 1, to November 1. However, except for the extremely dry years, irrigation from this diversion would not get underway until the middle of May and would terminate sometime prior to the 15th of September. However, on those extremely dry years it may become necessary to irrigate slightly in the month of October to provide moisture to condition the potatoes properly for digging. The Applicants raise grain and potatoes. The grain requires water in the early part of the irrigation season, generally before the potatoes, and the potatoes are irrigated in the later part of the irrigation season. Generally the only time that both crops need significant irrigation water at the same time, is during the month of July. Thus, the peak use will generally occur between the last few days of June and the first few days of August.

With respect to Paragraph 4,5,3,2,2 in your requests, Applicants simply indicate that the information concerning the property of the aquifer in which the water is to be taken, is not yet available to them. Applicants indicate that the well is presently being drilled, and that a sufficient supply of water for irrigation purposes has not yet been found. The well drillers are keeping a log with required information showing the different strata. A sufficient amount of water for their irrigation purposes has not yet been found. When that information becomes available, Applicant will supplement this response.

With respect to Paragraph 4,5,3,4,2 of your requests, Applicant would indicate that their present intention, as stated before, is to supplement their current water system. They hope that the well is sufficient to do that. Furthermore, they are in hopes that the well will provide sufficient water for them to expand their irrigation system. If the well is initially used for supplementary water, the cost would simply be the cost of drilling the well, which will not be accurately determined until the necessary depth of the well is determined and the cost of the pump. As explained in the Application the well would simply pump water into a holding pond that is already in existence. If Applicants are able, as a result of this well, to expand their irrigation system, they could potentially add three (3) more irrigation circles at an approximate cost of Sixty Thousand Dollars (\$60,000.00) to Seventy Thousand Dollars (\$70,000.00) each. However, they will not be able to make that determination until they are able to complete the well and determine the amount of water it procudes.

Sincerely,

R. J. Hooopes, Esq.

which to submit the information upon request by the applicant and upon a showing of good cause.

Failure to submit the required information within the time period allowed will be cause for the director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late. The director will provide opportunity for hearing as provided in Section 42-1701A, Idaho Code.

- 4,5,2. For protested applications or protested permits being reprocessed, the information required by Rule 4,5,3. may be requested by the director to be submitted within 30 days after notification by the director, may be made a part of the record of the hearing held to consider the protest, or may be made available in accordance with any pre-hearing discovery procedures.

Failure to submit the required information within the time period allowed will be cause for the director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late.

- 4,5,3. Information to be submitted

The following information shall be submitted for applications to appropriate unappropriated water or trust water and for permits being reprocessed for trust water. The additional information submittal requirements of this rule are waived for filings which seek to appropriate five (5) cfs or less or storage of five hundred acre-feet (500 A-F) or less and for filings seeking reallocation of trust water which the director determines will reduce the flow of the Snake River measured at Murphy Gauge by not more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than 200 acres will be irrigated. However, the director may specifically request submittal of any of the following information for any filing, as he determines necessary.

- 4,5,3,1. Information relative to the effect on existing water rights, Section 42-203A(5)(a), Idaho Code, shall be submitted as follows:
- 4,5,3,1,1. For applications appropriating springs or surface streams with 5 or fewer existing users, either the identification number, or the name and address of the user, and the location of the point of diversion and nature of use for each existing water right shall be submitted.
- 4,5,3,1,2. For applications appropriating groundwater, a plat shall be submitted locating the proposed well relative to all

SEP 25 1990

existing wells and springs and permitted wells within a one-half mile radius of the proposed well.

- 4,5,3,1,3. Information shall be submitted concerning any design, construction, or operation techniques which will be employed to eliminate or reduce the impact on other water rights.
- 4,5,3,2. Information relative to sufficiency of water supply, Section 42-203A(5)(b), Idaho Code, shall be submitted as follows:
 - 4,5,3,2,1. Information shall be submitted on the water requirements of the proposed project, including, but not limited to, the required diversion rate during the peak use period and the average use period, the volume to be diverted per year, the period of year that water is required, and the volume of water that will be consumptively used per year.
 - 4,5,3,2,2. Information shall be submitted on the quantity of water available from the source applied for, including, but not limited to, information concerning flow rates for surface water sources available during periods of peak and average project water demand, information concerning the properties of the aquifers that water is to be taken from for ground-water sources, and information on other sources of supply that may be used to supplement the applied for water source.
- 4,5,3,3. Information relative to good faith, delay, or speculative purposes of the applicant, Section 42-203A(5)(c), Idaho Code, shall be submitted as follows:
 - 4,5,3,3,1. The applicant shall submit copies of deeds, leases, easements or applications for rights-of-way from federal or state agencies documenting a possessory interest in the lands necessary for all project facilities and the place of use or if such interest can be obtained by eminent domain proceedings the applicant must show that appropriate actions are being taken to obtain the interest. Applicants for hydropower uses shall also submit information required to demonstrate compliance with Sections 42-205 and 42-206, Idaho Code.
 - 4,5,3,3,2. The applicant shall submit copies of applications for other needed permits, licenses and approvals, and must keep the department apprised of the status of the applications and any subsequent approvals or denials.
- 4,5,3,4. Information Relative to Financial Resources, Section 42-203A(5)(d), Idaho Code, shall be submitted as follows:
 - 4,5,3,4,1. The applicant shall submit a current financial statement certified to show the accuracy of the information contained

therein, or a financial commitment letter along with the financial statement of the lender or other evidence to show that it is reasonably probable that financing will be available to appropriate the water and apply it to the beneficial use proposed.

- 4,5,3,4,2. The applicant shall submit plans and specifications along with estimated construction costs for the project works. The plans shall be definite enough to allow for determination of project impacts and implications.
- 4,5,3,5. Information Relative to Conflict with the Local Public Interest, Section 42-203A(5)(e), Idaho Code, shall be submitted as follows:
 - 4,5,3,5,1. The applicant shall seek comment and shall submit all letters of comment on the effects of the construction and operation of the proposed project from the governing body of the city and/or county and tribal reservation within which the point of diversion and place of use are located, the Idaho Department of Fish and Game, the Idaho Department of Health and Welfare, Division of Environment, and any irrigation district or canal company within which the proposed project is located and from other entities as determined by the director.
 - 4,5,3,6. The following information Relative to the Public Interest Criteria of Section 42-203C(2), Idaho Code, shall be submitted by an applicant seeking reallocation of trust water for a project which the director determines will reduce the flow of the Snake River by more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than 200 acres will be irrigated. The director may request any or all of the following information for any filing seeking the reallocation of trust water.
 - 4,5,3,6,1. A project design and estimate of cost of development shall be submitted. For applications appropriating more than 25 cfs, or 10,000 AF of storage, or generating more than 5 megawatts, the information shall be prepared and submitted by a qualified engineer licensed under the provisions of Chapter 12, Title 54, Idaho Code, unless waived by the director. The design shall be definite enough to reflect the project's impacts and implications as required in subsequent rules.
 - 4,5,3,6,2. If the project proposes development for irrigation purposes, information shall be submitted on crop rotation, including acreages, for lands when newly developed.
 - 4,5,3,6,3. Information shall be submitted concerning the number and kinds of jobs that will be created or eliminated as a direct result of project development including both the

RE: Application for Permit No. 22-7661

Dear Applicant(s):

NOTICE OF PENDING ORDER VOIDING APPLICATION

On January 26, 1990, you filed with the Department of Water Resources an amended application to appropriate water number 22-7661, proposing the diversion of 6.0 cubic feet per second from ground water for irrigation purposes.

On June 13, 1990, the Department requested that you submit additional information regarding the proposed project. As of this date, the Department has not received the requested information. Pursuant to Rule 4,5. of the Water Appropriation Rules and Regulations, the Department may void the record of applications for which requested information is not submitted.

The purpose of this letter is to request that you withdraw your application or explain why the Department should not void your application. Enclosed is a withdrawal form that should be signed and returned to me, unless you have some explanation that would prevent the Department from voiding your application.

If you fail to respond to this inquiry within thirty (30) days of the date of this letter, the Department will act to void your application. The application will be voided on the grounds that requested information was not submitted.

Sincerely,

MICROFILMED

RE: Application for Permit to Appropriate Water No. 22-7661

Dear Sirs:

You filed application no. 22-7661 with the Department of Water Resources seeking appropriation of 6 cubic feet per second from ground water for irrigation of approximately 1820 acres. It appears that the proposed system consists of three irrigation circles and hand lines, and that some of the water is already provided by Canyon Creek Canal Company.

As part of the application processing, our Eastern Regional staff requested that you submit information pursuant to Rule 4,5. of the Water Appropriation Rules and Regulations. I have enclosed a copy of the pertinent rules for your reference.

To date, the Department has not received a response to its request for submittal of information. We cannot approve your application until the information is submitted. In fact, failure to submit the requested information could jeopardize the validity of your application.

Please submit all information required by Rule 4,5. on or before July 1, 1990. Failure to do so may result in the voiding of your application.

Respectfully,

GARY SPACKMAN, Manager
Water Right Permits Section

ACT OF DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 3-5-90

If approved, this permit authorizes the construction of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS: This drilling permit is conditioned to show that there is no authorization for diversion and use of water until the water right application is approved. The applicant by accepting this drilling permit and commences construction acknowledges that he accepts all risk that the well may not be approved for use.

Signature of Authorized Department Representative

Eastern Regional Manager

EXTENSION OF DRILLING PERMIT

Extension approved by _____ Approval Date _____

This extension is good for 60 days beyond the above extension approval date.

ADDENDUM TO DRILLING PERMIT

1. APPLICATIONS, AS NECESSARY, ARE ON FILE SEEKING AUTHORIZATION TO USE THE WELL FOR THE PURPOSE FOR WHICH IT IS BEING DRILLED.
2. THERE ARE NO APPARENT REASONS THAT THE PENDING APPLICATIONS WILL NOT BE APPROVED AUTHORIZING USE OF THE WELL.
3. THE APPLICANT HAS REQUESTED BY LETTER THROUGH HIS AGENT THAT EXPEDITED APPROVAL IS NEEDED FOR IMMEDIATE CONSTRUCTION.
4. THE DRILLING PERMIT IS CONDITIONED TO SHOW THAT THERE IS NO AUTHORIZATION FOR DIVERSION AND USE OF WATER UNTIL THE WATER RIGHT APPLICATION IS APPROVED.
5. THE APPLICANT BY ACCEPTING THIS DRILLING PERMIT AND COMMENCES CONSTRUCTION ACKNOWLEDGES THAT HE ACCEPTS ALL RISK THAT THE WELL MAY NOT BE APPROVED FOR USE.

RE: APPLICATION FOR PERMIT NO. 22-7661 (STEVCO CANYON FARMS, INC.)

Dear Mr. Hoopes:

This letter is to confirm the content of our discussion February 8, 1990 in connection with the above referenced application.

Our regional office in Idaho Falls has advised that the application will be advertised in March and that the drilling permit will be issued shortly after the protest period is over if no protests are filed. The drilling permit will be conditioned as previously discussed with you that issuance of the drilling permit does not authorize the diversion and use of water from the well.

Please feel free to contact me if you have additional questions.

Sincerely,

L. GLEN SAXTON, Chief
Water Allocation Bureau

RE: Application for Permit No. 22-7661

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Rexburg Standard Journal on. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor

RE: PERMIT NO. 22-07661

Dear Mr. Jones:

On behalf of my clients, let me express my appreciation to you for meeting with us earlier this afternoon. As we discussed, they are most anxious to begin drilling as soon as possible.

Please consider this letter formal request for expediting procedure where this Permit is processed out of sequence. This is necessary because the proposed well will initially be assessed to supplement and existing irrigation system. The existing irrigation system obtains its water from the Canyon Creek Canal Company out of Canyon Creek. On short water years, which this appears to be, there is insufficient water in Canyon Creek Canal to irrigate the crops adequately, or in some cases, to irrigate them at all. The applicants feel that an emergency exists and drilling must start as soon as possible.

Thank you very much.

Sincerely,

R. J. Hoopes, Esq
