on the *Lilium*. One of the *Lilium*, which was reported as being one of the most common species found in the area, was found to be a very rare species. It was found in the same place as the other two species, but it was found in much smaller numbers. The reason for this may be due to the fact that it is a very rare species, or it may be due to the fact that it is a very small plant.

RE: WATER RIGHTS 22-07636/22-07637

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed licenses confirming that water rights have been established in accordance with the permits referenced above. The license are preliminary orders issued by the Department pursuant to section 67-5243, Idaho Code. They can and will become final orders without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

MICROFILMED

JAN 08 1999

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one

(21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

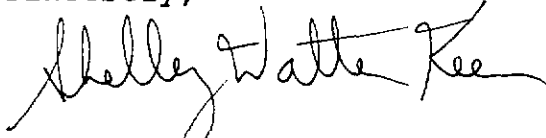

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency

action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have questions, please contact me at (208) 327-7946.

Sincerely,

Dear Permit Holder(s):

I previously forwarded to you Applications for Amendment so that you could amend your permits to depict your water rights as they have actually been developed.

As of this date, I have not received these amendments. If I do not receive the amendments within 14 days, Water Right Licenses will be issued for less than could have been allowed. In case the amendment forms I sent you have been misplaced, new ones are enclosed. Please note that the filing fee for these amendments is \$50.00 each (total fee required is \$100.00).

RE: WATER RIGHTS 22-07636/22-07637

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permits referenced above prior to issuing water right licenses. By issuing a license, the Department confirms that a water right has been established in compliance with the terms of the permit. The examiner who verified your water use reported that you developed more points of diversion than were described on your permits. Therefore, before a license can be issued, your permit must be amended to include the additional point(s) of diversion.

The enclosed Application for Amendment forms describe the additional point(s) of diversion and other information that will be included on the licenses when they are issued. In some cases, the reference to multiple points of diversion is contained in the list of conditions of approval and remarks on the last page of the amendment form. Please review the amendment carefully. If you concur with the information presented, please sign the forms and return them with the \$100.00 (\$50.00 per amendment) filing fee within 14 days.

Also, please note that some of the proposed conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is 208-327-7946.

RE: Telecon

On this date, Mr. Pehrson called in response to my latest letter. He stated there are six small cabins that should be recognized along with the lodge. He said small lawn areas are irrigated along with the in-house domestic use. The volume calculation will allow 1.2 af/cabin added to the 2.2 af for lodge use.

Mr. Pehrson went on to say that currently the new #1 well is the primary source for all uses, with the other wells able to be used for backup. They are considering drilling another higher-production well like the new #1 so that their backup supply will equal normal production. I told him if they decide to do so and if their intention is not to add diversion rate, they can apply for a transfer of water rights to add a point of diversion and the transfer would be the means to identify all the wells for all three rights.

Dear Mr Pehrson:

On August 6, 1998 I sent a letter to you requesting information for the aforementioned permits. I have not yet heard from you regarding this matter. I will finalize the licenses and send them up for administrative signature as shown on the attached table if I have not heard from you within ten (10) days. Note that our recommendations include no cabins associated with the lodge well, a total of 44 homes plus the lodge, and no irrigation from the lodge well.

If any of this information is incorrect, I urge you to contact me immediately. Your prompt attention will be appreciated. You may contact me direct at (208)327-5452.

RE: Permit Nos. 22-07635, 22-07636 and 22-07637

Dear Mr. Pehrson:

We are in the process of reviewing the above referenced permits for licensing. Attached is a listing showing our recommendations for licensing under each of the permits. I have also enclosed copies of the subdivision plat map and our examiner's diagram of the system which I've used in my review to show how the recommendations were arrived at. There are a couple of pieces of information that I need clarification on from you so that I can wrap up my review and proceed with preparation of licenses.

First, it appears that there are two cabins associated with the lodge well. Are there cabins that use the same source (lodge well) and if so, how many?

Second, there is irrigation of approximately two acres occurring around the lodge area. Which well is used for this irrigation?

Finally, the total number of lots/homes under these rights is 45 plus the lodge. Have we missed anything?

If you can answer my questions by simply making notes on the maps and returning them to me, that would be fine. Feel free to call me if that would be easier or drop me a line in the mail. I'll hold off doing any further review for 15 days to allow you to respond to my questions. Thank you for your assistance in this matter.

Sincerely,

RE: Field Exam Recommendations (22-07635, 22-07636, 22-07637)

A copy of the following final recommendations were sent by fax to Skip Jones for review and comment. I was unable to determine how the examiner came up with 69 homes on this system; only 45 lots are recommended as shown on the subdivision plat map attached to the field report and also the map used with the original application filings. I spoke with Skip on June 25 and he said he was okay with the recommendations. He felt that since we would solicit amendments for two of the three and issue all licenses as preliminary orders, it would be up to the right holder to dispute the recommendations and come up with evidence to disprove what we've recommended. He has no information to contradict my recommendations.

WATER SYSTEM IS FOR DOMESTIC AND IRRIGATION USE;
A TOTAL OF 45.8 ACRES OF IRRIGATION, THIS PERMIT IS
FOR 16.9 ACRES; 69 HOMES SITES ARE ON SYSTEM OF WHICH
17 HOMES ARE ON THIS PERMIT.

TOTAL WATER
THE SYSTEM HAS SEVERAL WELLS:

NEW PRIMARY WELL #1	20HP SUBMERSIBLE
(LODGE BACKUP) OLD WELL #1	3 HP " JACK 221
WELL #2	USED A 3 HP SUB.
WELL #3	BACKUP WELL SYSTEM 10 HP SUB.

LODGE WELL — NOT ATTACHED TO COMMON SYSTEM.

WATER DISTRIBUTION STARTS AT PRIMARY WELL #1 AND
IS DISTRIBUTED BY A 4" PDC MAIN LINE THAT FOLLOWS
THE SUBDIVISION ROADS; LINE PASSES THE FRONT OF ALL
LOTS. (3) 1,000 STORAGE TANKS AND 6 PRESSURE TANKS
ARE PART OF THE DISTRIBUTION MANIFOLD SYSTEM

RE: PERMIT NO. 22-07636

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Rita Fleck

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P22-07636

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

This Permit is

APPROVED

Date

April 23, 1990

If approved, this permit authorizes the construction of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

Drilling Permit No. 22-90-Z-002

Water Right No.

REQUEST FOR CONSIDERATION OF A DRILLING PERMIT

Teton Valley Lodge, Teton Water Park Applicant, requests issuance of Drilling Permit prior to approval of a water right. The request is made for the following reason(s):

Because of the failure of two of our wells, which
no longer produce water at this time on the south
of our Subdivision, and because we must be
supplying water to the homes by May 26th, 1990.
We are requesting an expedited drilling permit at
this time. We have previously made attempt to
salvage these two wells we are abandoning unsuccessfully.
Applicant understands that the drilling permit does not constitute a water right and does not authorize diversion or use of water from the well.

Applicant acknowledges that by accepting a drilling permit and commencing construction he accepts all risk that the well may not ultimately be approved for use.

ACTION OF DEPARTMENT OF WATER RESOURCES

This Permit is approved Date 3-20-90

If approved, this permit authorizes the construction of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

RE: Application for Permit No. 22-7636

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Teton Valley News on March 1 & 8, 1990. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor

RE: Application for Permit No. 22-7636 & 22-7637

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your application for water right permit. The application has been assigned the above identification number. Please refer to this number in all future correspondence.

The Department can not proceed with the processing of your application at this time. It seeks the appropriation of water within the area covered by the civil suit of Idaho Power Company vs. Idaho Department of Water Resources, et al., Ada County Civil No. 81375 (Swan Falls Suit). Until there has been a final resolution to this suit and rules and regulations promulgated for this area has been suspended. During the interim, your application will be held in this office.

The staff in our office will be glad to answer any questions you have concerning the above matter.

Respectfully submitted,

Harold W. Jones

RE: Applications for Permit and
Notice of Claim to a Water Right

Dear Harold:

We are enclosing with this letter three work copies of Applications for Permit which you apparently sent to our client, Mr. John K. Pehrson. We have filled in the amounts of the acreages and water use as nearly as we can in yellow spaces.

We are also enclosing Mr. Pehrson's Notice of Claim to a Water Right for his domestic well with the modifications respecting irrigation.

What can we do to get you to correspond directly with us rather than sending these matters to Mr. Pehrson?

Yours very truly,

Kent W. Foster
