REQUEST FOR EXTENSION OF TIME

To provide additional time in which to submit proof of beneficial use for a water right permit

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time in which to complete development of a water right under the provisions of Section 42-204, Idaho Code.

Permit No. 22-07626

Name(s) of Permit Holder: Ultimate Direction, Inc.

Post Office Address: P. O. Box 341, Rexburg, ID 83440

Telephone No. 356-0385

Date Proof is Due: June 1, 1990

Describe what work has been completed toward the development of this water right: We installed a pressure tank
(This must be filled out! If no work has been completed, show "none".)

and connected our main building (employing 50 people) to the existing well. However, there later developed a need to drill a new well within the same 10 acres. Problems included a dispute with the neighbor as to ownership of the well and test showing the present well is contaminated.

Costing $1,500.00 approximate

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Rather than litigate with the neighbor, we conceded his ownership and are temporarily paying for use of the well. We need our own well and a better well. Operating capital was in short supply in starting and expanding the new business. We also explored alternatives of seeking extension of city water to the premises and including fire protection from the new well. We now must proceed but need the additional time to complete the new well.

Permit holder(s) request an extension to June 30, 19 91.

Gentlemen:

Re: Permit No. 22-7626

The department received the proof of beneficial use form and fee on July 16, 1991. On July 25, 1991, the Department issued an Order reinstating the permit with an advance in priority. Enclosed is a copy of an Order correcting the priority date.

It seems that the priority had been advanced previously when the department granted a request for extension of time. That advance date was not taken into consideration when calculated the new priority date.

If you have any questions, please contact me.

Sincerely,

RITA I. FLECK

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 22-07626

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
