ORDER ADVANCING
DATE OF PRIORITY

This matter having come before the Department of Water Resources (Department) as a result of preparing Permit No. 22-7466 for issuance of a license, the Department finds, concludes and orders:

FINDINGS OF FACT

1. The Department approved Application for Permit No. 22-7466 to appropriate the public waters of the State of Idaho with a proposed priority of JULY 11, 1983.

2. On JANUARY 26, 1987 the Department advised the permit holder that a license examination fee was required before an examination could be conducted to confirm the extent of use developed under the permit. The examination fee was due on MARCH 27, 1987.

3. The license examination fee was received on JUNE 09, 1987, 74 day(s) late.

MICROFILMED

Dear Sir,

Re: Well at
R2 BOX 140 A
Reynolds, Id 83440

We sold the house, at R2 BOX 140 A. TO Greg & Joan Warrnell Aug of 86

We purchased the property May 5 1979 from Mr. Ken Phillips of St. Anthony Idaho they told us they built the house in 1976

We never knew the flow rate of the well.

We did not know if the Phillips had procured a permit or not. They still own the adjoining property to the west of above

I paid for permits two different times I left all the papers with permit # & set there at the house.

Dear Permit Holder:

On January 26, 1987, this Department sent you a certified letter explaining the recent statutory changes in the licensing procedure that will pertain to the above referenced permit. The new statutes provide the permit holder with a choice of who will perform the licensing field examination. You may either choose a certified water rights examiner from the private sector, or select the Department. If you elect to have the examination done by the Department there is now a fee for this service based on the amount of water being diverted.

The letter advised you had a period of 60 days to notify the Department of your decision. You were to notify the Department by returning the examination fee information form which accompanied the certified letter and the appropriate examination fee, provided you wanted the Department to do the examination. As indicated in the certified letter, failure to return the form and submit the examination fee, within 60 days would cause the priority of your permit to be advanced.

Our records indicate you did not respond within the 60 day period. Starting with March 27, 1987, the priority of your permit will be advanced one day for each day your response is late. Failure to submit a completed examination fee information form, with the examination fee, by March 27, 1988, will result in the permit being lapsed.

As always our staff is available to assist you or answer questions concerning the above matter. For your convenience, we have enclosed another examination fee information form.

Respectfully submitted,

Dear Permit Holder(s):

This office acknowledges receipt of the Assignment of the above referenced permit to you. Enclosed for your records is a copy of the permit.

As new owners of the permit, you are required to submit either an EXAMINATION FEE or a statement from a certified examiner that he has been retained to do a field examination of your water use.

Enclosed is a copy of the EXAMINATION FEE NOTICE sent to the previous permit owner. Please read and take proper action. You should note that the notice was sent on January 26, 1987 and after 60 days a day of priority of your permit is lost for every day the fee or statement is not received by this office.

In order to keep this permit in good standing, you must respond to the Examination Fee Notice as soon as possible. If you have any questions regarding this matter, please feel free to contact us.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the Department, but you must within sixty (60) days of the date of this letter return to the Department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the Department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the Department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water right examiners will be available from this Department when examiners have been certified.

MICROFILMED

JUL 01 1987

If your permitted use, in fact, has already been examined by the Department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the Department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following Department office:

Eastern Region

Dear Permit Holder:

We acknowledge receipt of your statement submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this department.

A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office by phone at 525-7161 or in person in the third floor State Office Building, 150 Shoup, Idaho Falls, Idaho.

Sincerely,
s/HAROLD W. JONES

Dear Permit Holder:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please note that one of the conditions of approval is that the diversion of water under this permit is subject to the control of a State Watermaster. The reason for this is that some hydrologic studies of rivers in the state indicate that wells constructed in the sand and gravel aquifers of the river areas may intercept water that otherwise would have entered the river. However, the extent of the alluvial material thickness is not known nor is the precise degree of interference of wells with surface water flows. Studies do indicate that as much as 50% of the water diverted from a well located one mile from the river would have reached the river if impermeable layers of clay on hard rock do not separate the river from the aquifer from which the well is producing.

The information available to us at this time does not warrant refusing to issue you a permit but does merit cautioning you that any permit issued by the Department cannot deprive water users, with earlier rights, of their water supply.

The reason for conditioning the permit and explaining the potential interference problem is to make you aware that future tests may definitely show that diversion of water from your well should be administered together with the older surface water priorities of the river and its tributaries. If this were to occur, it would essentially mean that there would not be water available for a diversion from your well since the surface water system is fully appropriated. By locating your well as far from the river as possible and by casing out upper water producing zones as the well is constructed, you may be able to reduce the amount of interference with the river.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is the statement of beneficial use that must be submitted when your project is completed.

Watermaster Control Recommendation

Pursuant to review of this application, I recommend that it be subject to watermaster control because of the close proximity of the well to the river and the shallowness of the well itself. ⁽²¹⁾

Dear Cindy:

According to the provisions of the agreement signed October 25, 1984, applications limited to certain beneficial uses are eligible for dismissal from Ada County Civil Case 81375.

Based on our understanding of the definition "consumptive domestic" and "non-consumptive commercial, municipal, and industrial", we have identified applications that appear to comply with the criteria essential for dismissal. A profile of each application is enclosed for your consideration.

We are proceeding with the publication of notices advising these applications have been filed, but will continue to withhold other administrative action pending notification from your office that an application has been released.

Respectfully submitted,

ERNEST CARLSEN
Assistant Regional Supervisor
