STATE ENGINEER'S OFFICE

Regulations as to Change of Point of Diversion.

Section 3247 of the Revised Codes provides that a person entitled to the use of water, may change the place of diversion if others are not injured by such change. The Board of Irrigation has adopted the following regulations as to procedure under said section:

The person desiring to change point of diversion must file with the State Engineer an affidavit describing his water right, setting forth his intent to change point of diversion and the reasons for such change, together with an averment that no one will be injured thereby and that deponent will make such change at his own risk.

The point to which it is desired to change the place of diversion must be described as follows:

When the amount claimed does not exceed 25 cubic feet per second and point of diversion will be on surveyed land, locate same by giving the legal description of the 40 acre tract in which it will be situated. If upon unsurveyed land, give approximate distance to mouth of stream from which water is claimed or to the mouth of some creek flowing into said stream. Where there is more than one point of diversion, describe each separately and specify the amount claimed from each.

Where the water claimed exceeds 25 cubic feet per second, locate the point to which it is desired to change the place of diversion as follows:

If upon or near surveyed land, tie point of diversion by course and distance to section or quarter section corner. If said point will be more than two miles from the corner of a public survey, the tie may be made to the mouth of the stream from which the water is claimed or to the mouth of some creek flowing into said stream.

The affidavit must be accompanied by maps in duplicate, showing the following details:

1. If for irrigation and domestic use:
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches, including laterals delivering water within one mile of each 160 acre tract of the land to be irrigated.
 - (f) Lands to be irrigated to be shown by cross-hatching, outlining, or coloring.
2. If for other than irrigation and domestic purposes:
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches.
 - (f) Point or points of use.
 - (g) Point or points of return to stream after use.

If application is for more than 25 cubic feet per second, the maps must be prepared from actual survey and must be certified to by the engineer in charge of survey, in the following form:

I hereby certify that this map was prepared from an actual survey made by me _____ 191_____, and correctly shows position of points indicated thereon.

Engineer.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

MEMO

Idaho Falls, March 18, 1925

Mr. C. A. Bauer,

Box 27,

Sugar City, Idaho.

DEPARTMENT OF RECLAMATION

FILE

*With Notice to
Change. P.O.D.*

Dear Sir:

As I understand it you have requested permission to divert all the water decreed to your land through the Stewart ditch and have filed a notice to this effect with the State Commissioner of Reclamation. Since you are not proposing to irrigate any land except that to which this water has been decreed, the transfer can be recognized without any further formalities and I will instruct the deputy watermasters to make delivery upon the above basis. The 1910 decree as supplemented by the order of Judge Stevens dated December 17, 1913 indicates that your lands in the SW $\frac{1}{4}$ of Sec. 25, T. 7 N., Range 40 E. are entitled to the following water rights:

200 inches with a priority date of May 1, 1883

400 inches with a priority date of Apr. 1, 1898.

Sincerely yours,

G. Clyde Baldwin
Watermaster.CC to Mr. McClelland
Mr. Swendsen

June 25, 1924.

Re: District 36.

Mr. G. Clyde Baldwin,
Watermaster,
Idaho Falls, Idaho.

Dear Sir:

Conrad A. Bower has filed affidavit of notice of intention to change point of diversion of his decreed water right as defined in the Rexburg Decree, from the Pioneer Ditch to the point of diversion of the Stewart Ditch, reason given for such change being that he is unable to irrigate from the Pioneer Ditch on account of his land being too high.

This affidavit has been filed and recorded and thus remains a matter of record in this office.

Very truly yours,

Director of Water Resources.
