CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. A measuring device of a type approved by this Department shall be maintained as a part of the diverting works.
6. Use of water under this water right will be regulated by the watermaster of State Water District No. 01.

RE: Water Right Permit No. 22-7288

Robert R. Ricks
Rt. 1
Sugar City, ID 83448

Dear Mr. Ricks:

We are in receipt of the licensing amendment and \$20.00 fee that was requested in our correspondence of March 8, 1990. However, in a review of the licensing amendment before sending the file in for signature, we have determined that our initial pre-license correspondence was in error. Pursuant to a review of the decree issued on September 4, 1986, in the case of Robert R. Ricks vs. Ronald D. Carlson et al., we found that most of the water use recommended by our examiner was previously decreed under Rights 22-4012A and 22-4012B.

Please be advised that we have found that this permit should only be licensed for 43 acres. Enclosed for your review is a revised draft license which will be recommended for signature. Please review this draft and if you do not concur with our recommendations, contact our office within ten (10) days of the date of this letter or the license will be issued as set forth on the draft.

A licensing amendment is not required for this water right subject to the above review. You will be receiving a \$20.00 refund, for the fee you submitted, under separate cover from the State Auditor's Office.

If you have any questions or comments regarding the revised review of this permit, please contact us at your earliest convenience.

Sincerely,

KAY WALKER
Technical Records Specialist

RE: LICENSING RECOMMENDATIONS

DATE: 9-MAY-1990

=====

In a review of the licensing amendment that was submitted to our office on April 3, 1990, I found that we had not recognized the decree issued on September 4, 1986 (Robert R. Ricks vs. Ronald D. Carlson et al.). The decree had not been entered into the computer system and it appears no place of use overlap review was conducted. We entered the decree into the computer and I ran a place of use overlap report which identified a large overlap with 22-4012A and 22-4012B. I found only 43 acres irrigated which were not decreed.

In light of this, I have recommended that we issue this license for 43 acres, 0.86 cfs and 150.5 acre feet. The decree shows the source as South Teton River tributary to Snake River which I have applied to this right. I have also recommended the irrigation season shown on the decree which is April 1 through November 1.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, R. Keith Higginson, of the Department of Water Resources hereby approve the above Application for Amendment for Permit No. 22-07288 with the following;

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. A measuring device of a type approved by this Department shall be maintained as a part of the diverting works.
6. Use of water under this water right is subject to control by the watermaster of State Water District No. 01.
7. The right holder must obtain adequate supplemental water for the irrigation season that natural flow is not available.
8. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.

Witness my hand this _____ day of _____, 19____.

This is a topographic map of the Sugar City, Idaho area. The map features a grid with coordinates and various geographical features. Key locations include Sugar City, Teton, Moody, and Johnson. The Teton River is shown flowing through the area, with a point of diversion marked. The Sugar City Cemetery is located in the lower left. The map includes a date stamp 'NOV 14 1991' in the bottom right corner. The map is overlaid with a grid of dashed lines, and the area is divided into numbered sections (1, 2, 3, 4, 10, 12, 13, 14, 15). The map also shows various canals, roads, and a point of diversion. The map is titled 'SUGAR CITY' in the top left corner. The map is drawn on a grid with coordinates ranging from 4882 to 4932 on the vertical axis and 4890 to 4930 on the horizontal axis. The map is dated 'NOV 14 1991' in the bottom right corner.
