RE: Application for Permit No. 22-7187

Mr. Harold B. Bischoff
Rt. #1
St. Anthony, Idaho 83455

Dear Mr. Bischoff:

Because your application for permit was advertised during the flood, it seems likely that most people who would have an interest in this proposed development would have missed the legal notices in the local newspaper. We, therefore, feel that this application should be readvertised;

However, before the Department readvertises this application we need to determine if you were intending to appropriate water to supplement storage water in the Teton Reservoir, or if the water you indicated as being appurtenant to the NW $\frac{1}{4}$, Sec. 15, T. 7N, R. 41E, is Island Park storage to use through exchange. Please contact us at your earliest convenience to enable us to take appropriate action on your application.

If you have any other information or have additional questions, please feel free to contact me.

Very truly yours,

RONALD D. CARLSON

RE: Application for Permit No. 22-7187

DATE: July 8, 1976

We have recommended approval for the above referenced application, but with the Teton Dam some other considerations might be made at your end before final approval.

1. Advertisement and protest period were during the Teton flood and the cleanup. Obviously, few people, if any, read this notice in the newspaper.
2. The southern boundary of the property to be irrigated is separated from the Teton River by a graveled county road. Elevation of this property ranges from 5,000 to 5,020 feet. Elevation of the Teton River is 5,000 feet at the southeast corner of the described property. The property location is approximately seven miles from the Teton Dam. This places the property at the mouth of the Teton River Canyon. It is our understanding that this area is now a large gravel alluvial fan.
3. Without the dam to regulate the Teton River during the irrigation season, I doubt that this permit would find approval with earlier right holders on the Teton River.
