Dear Mr. Linderman,

Thank you for your response to our letter requesting proof or extension.

In reviewing your request for an extension of time you stated that 2 of the 10 wells for permits 22-7137 thru 22-7146 have been completed, and that all of these permits are an interconnected system. We find, however, that when the permits were filed that no reference was made nor did the permits show that they were interconnected.

Idaho Code, Section 42-204 requires that a permit holder make due diligence toward developing their water permit and allows the Department to grant one extension if it can be determined that due diligence has been made.

Since you mentioned that only two out of the 10 proposed wells have been drilled we feel that more information is required.

At present you have 10 separate water permits that are not interconnected. It appears that perhaps your best alternative is to submit an amendment on each permit adding the points of diversion of the wells you have already drilled, in addition to other points of diversion that you plan to drill. Each permit would then have all of the wells shown and would show interconnection between them.

If you do not agree with this alternative please contact us so some other solution can be reached.

Since proof to beneficial use on these permits was due last July your prompt attention to this matter is necessary so that action can be taken.

I am retaining the requests for an extension in your permit file and I am enclosing 10 amendment forms for your convenience. I will be happy to go over any questions you may have. You can reach me at 334-4162.

If we have not heard from you within 20 days after receipt of this letter the Department will be required to initiate action to lapse 8 of your permits pursuant to Section 42-218, Idaho Code.

JIM JOHNSON
