EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the Department, but you must within sixty (60) days of the date of this letter return to the Department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the Department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the Department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water right examiners will be available from this Department when examiners have been certified.

If your permitted use, in fact, has already been examined by the Department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the Department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following Department office:

Dear Mr. Linderman,

Thank you for your response to our letter requesting proof or extension.

In reviewing your request for an extension of time you stated that 2 of the 10 wells for permits 22-7137 thru 22-7146 have been completed, and that all of these permits are an interconnected system. We find, however, that when the permits were filed that no reference was made nor did the permits show that they were interconnected.

Idaho Code, Section 42-204 requires that a permit holder make due diligence toward developing their water permit and allows the Department to grant one extension if it can be determined that due diligence has been made.

Since you mentioned that only two out of the 10 proposed wells have been drilled we feel that more information is required.

At present you have 10 separate water permits that are not interconnected. It appears that perhaps your best alternative is to submit an amendment on each permit adding the points of diversion of the wells you have already drilled, in addition to other points of diversion that you plan to drill. Each permit would then have all of the wells shown and would show interconnection between them.

If you do not agree with this alternative please contact us so some other solution can be reached.

Since proof to beneficial use on these permits was due last July your prompt attention to this matter is necessary so that action can be taken.

I am retaining the requests for an extension in your permit file and I am enclosing 10 amendment forms for your convenience. I will be happy to go over any questions you may have. You can reach me at 334-4162.
