To: Claim No. 22-4031

From: Ernest Carlsen ^{ERC}

RE: Winter diversion.

Although records for Water District 01 indicate traditionally no canal diversions were recorded for the non-irrigation season one would not expect diversion flows to increase after September 30 and then to decrease prior to May 1 or the beginning of the irrigation season. This being the case, available records from the Water District could be valuable as a means of comparison. The data below was obtained from the Water District's annual reports showing diversion flows for random years on May 1 and September 30, or as specified.
