Your applications for permits are acceptable, however we changed the land list in one application to agree with the maps.

RE: Application for Permit

Ed S. Covington
125 East 2nd North
Rexburg, Idaho

Dear Mr. Covington:

Returned herewith are the two applications for permit to appropriate subterranean water, which with attached check marked void, you submitted to this office, for further information.

You should show the amount of water claimed. The maximum amount is one miner's inch or one fiftieth of a cubic foot per second for each acre. One application shows 579 acres total for which the amount of water can be 579 miner's inches or 11.58 cubic feet per second, or a lesser amount of water. The other application lists 670 acres; however the map shows an additional 320 acres. We do not know whether that was an oversight or intentional. The amount of water seems rather large for one well.

The fee for each application is \$5.00 for the first cubic foot per second plus \$0.25 for each additional cubic foot per second or fraction thereof. The fee for 11.58 cubic feet per second is \$7.75.

The answer to 5 would be irrigation or other uses. Under 7 describe the works, such as drilled well, pump and ditches or sprinkler system. Under 8 show estimated cost. Answer 9 and 13.

Kindly complete the answers under 2, 5, 7, 8, 9, 13 on both applications.

We can fill in the amount on the check; however we must know the amount of water claimed.

Return the completed applications with the filing fees or blank amount check. The check should be to the order of the State Department of Reclamation.
