Dear Sir:

When we filed on the water rights for our irrigation well we filed for 220 inches; however, when our water was measured we weren't pumping that much. At the present time we believe that we're pumping more water than we were when it was measured by your office. -- Would it be possible for you to re-measure our water? I would appreciate advance notice as to when you could do this as the electricity is now turned off. I would need to contact the Utah Power & Light Company.
