We cannot say now just when this will be, as it
is customary to combine as many such examinations as
possible in one trip- in order to save expense.

But Mr. Tolman will try and contact Mr. Ripplinger
at the time set for examination, so that he may show
him over the grounds.

Re: Permit # 19330
Carl Ripplinger

Dear Mr. Spofford:

Mr. Ripplinger handed me your letter of March 7th concerning the foregoing permit. I note from your said letter that your field engineer reported that Mr. Ripplinger irrigated 25 acres with the water applied for and that you will allow him five-tenths of a second foot of waste water from Horseshoe Creek for said 25 acres.

Mr. Ripplinger feels that this is wholly inadequate; that he irrigated a larger acreage than indicated in this report and also uses the amount of water applied for at the outset, namely 160 inches.

It appears that your field engineer came at the low water season, according to Mr. Ripplinger's report to me, and did not get a true picture of the actual situation that obtains during the irrigation season. Therefore, he desires to have another examination made during the main irrigation season, to wit, during the month of July. He also stated that the examination was made while he was away and that he did not have an opportunity to go over the ground with said engineer.

If it is possible to have another examination made, kindly let me know, indicating when it would be convenient for your field engineer to make such examination.

Very truly yours,

Dear Mr. Ripplinger:

We now have on file the report of our Field Engineer on examination for beneficial use under the above numbered permit.

This report shows that you are irrigating 25 acres distributed in four 40-acre tracts in the SE $\frac{1}{4}$ Section 26, Township 5 North, Range 44 East, B. M.

Therefore, upon receipt of the statutory fee of \$8.00, a license will be issued for five-tenths of a second foot of waste water from Horse Shoe Creek.

Dear Mr. Ripplinger:

This will acknowledge receipt of the deposition of the holder, depositions of two witnesses, and the affidavit of proof of publication from the Teton Valley News, Driggs, Idaho, all in connection with beneficial use proof under the above numbered permit.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this Department. We are unable to say just when this examination will be made, since the Department has but one Field Engineer, who makes examinations all over the State.

However, Mr. Tolman, Field Engineer for the Department, will try and contact you at the time he makes the examination, so that you may arrange to show him over the grounds.
