NOTICE OF
PROPOSED AMENDING
OF WATER PERMIT

Notice is hereby given that Amended
Permit No. 21-7030 in the name of Lynn
Loosli was issued for the diversion of
8.00 c.f.s. of water from Conant Creek
tributary to Falls River with point of
diversion within the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 16,
NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 17, T. 8N, R. 43E,
B.M., Fremont County; to be used for
the irrigation of 550 acres from May 1 to
Oct. 31 within the W $\frac{1}{2}$ E $\frac{1}{2}$, W $\frac{1}{2}$, Sec.
16, SW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec.
17, T. 8N, R. 43E, B.M.

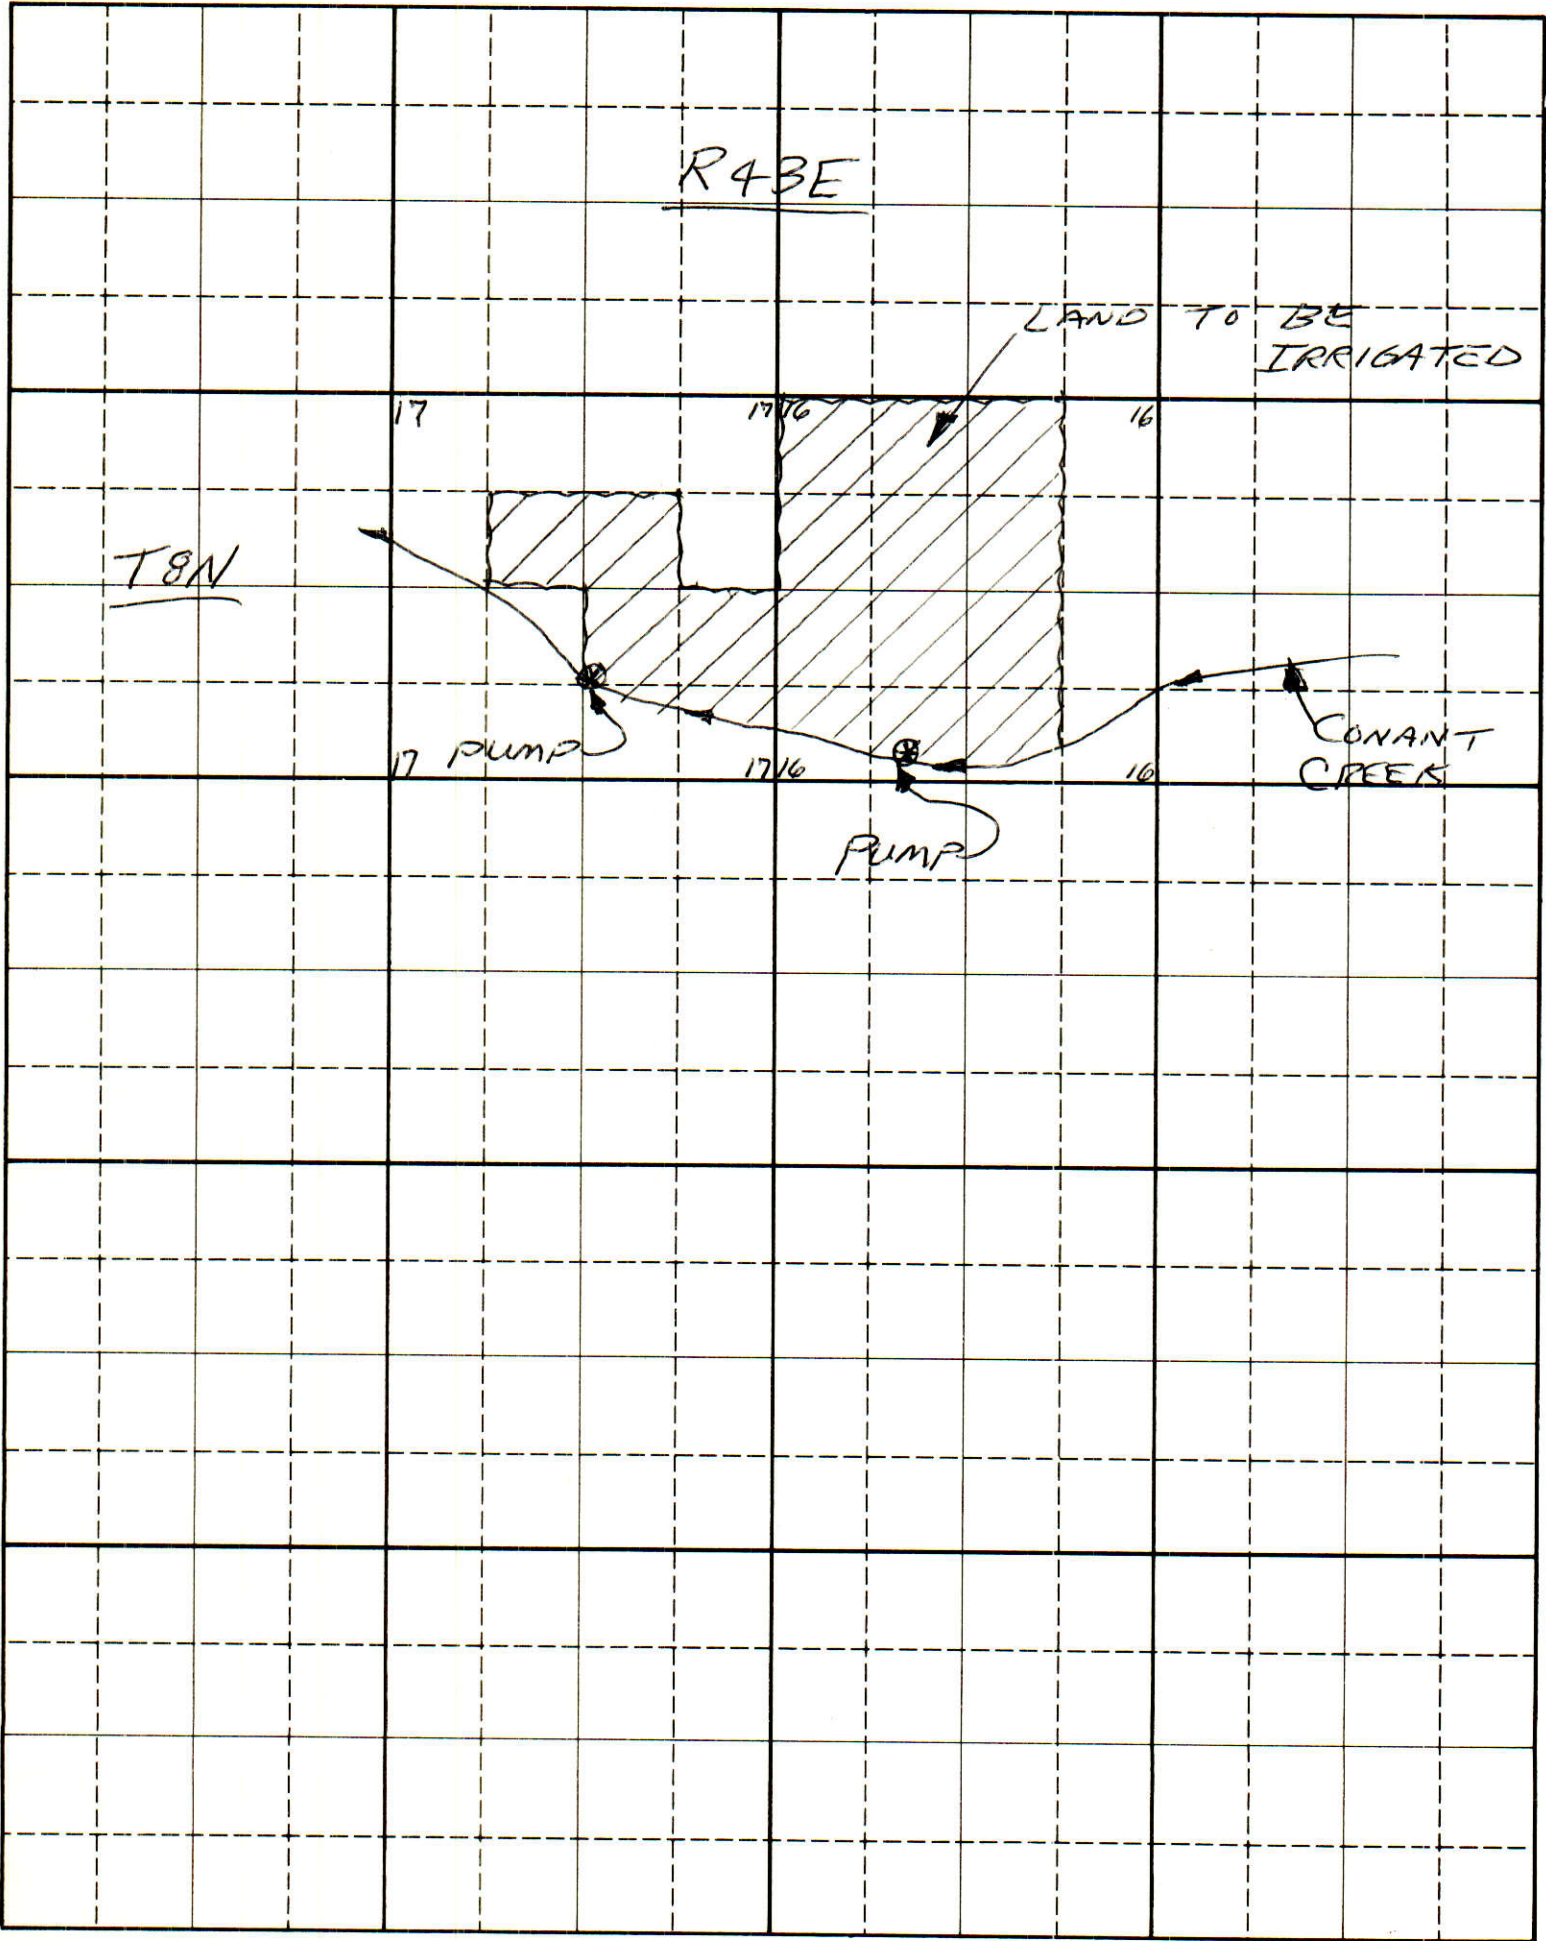

The permit holder now proposes to
amend Permit No. 21-7030 changing the
points of diversion to the SW $\frac{1}{4}$ SE $\frac{1}{4}$,
Sec. 16, SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 17, T. 8N, R.
43E, and the place of use to the NE $\frac{1}{4}$,
E $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$,
SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 16, S $\frac{1}{2}$ NE $\frac{1}{4}$,
E $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 17, T. 8N, R. 43E, B.M.

Any protest to the proposed amending
of the permit must be filed with the
Idaho Department of Water Resources,
1515 Lincoln Road, Idaho Falls, Idaho,
83401, on or before August 15, 1977.

Department of Water Resources

WATER RIGHT LICENSE

License of Water Right No. 21-7030 Priority October 5, 1973 Amount 8.0 cfs

THIS IS TO CERTIFY, that Lynn Loosli
of Ashton, Idaho, has complied with the terms and conditions of Permit
No. 21-7030 issued pursuant to Application for Permit dated October 5, 1973,
and has submitted proof to the Department of Water Resources on June 25, 1975,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 8.99 cfs of water from Conant Creek,
tributary to Fall River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>May 1</u> to <u>October 31</u> at <u>8.0</u> cfs and <u>400.0</u> acre feet		
	from _____ to _____ at _____ cfs and _____		
	from _____ to _____ at _____ cfs and _____		

(both dates inclusive)

Subject, however, to the condition that no more than 8.0 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
400.0 acre feet per year, said waters to be diverted within the SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 16; SE $\frac{1}{4}$ SE $\frac{1}{4}$,
Section 17; Twp. 8N, Rge. 43E in the County of Fremont

Description and location of place of use:

Twp.	Range	Sec.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				Totals
			NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$

		17			40	40									37			5	122

Total number of acres irrigated 550

See attached sheet for conditions.

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use herein described, as provided by the laws of Idaho.

Witness the seal and signature of the Director, affixed at Boise, Idaho, this 26th day of August, 19 82.

Director

CONDITIONS OF LICENSE 21-7030

1. Totalizing measuring devices of a type approved by the Department shall be maintained as a part of each of the two diversion works.
2. Use of the water under this license is subject to the control of the watermaster of State Water District No. 01, Snake River. Water shall not be diverted under this license unless all prior rights are satisfied or are expected to be satisfied on the Snake River system. Specifically, water must be flowing unused past Milner Dam and all prior valid recorded rights on the Henry's Fork must be satisfied or expected to be satisfied. Diversion of water using this license shall only be made after receiving written notice from the watermaster of District 01 that the above conditions are satisfied at the time the diversion is taking place. The license holder is to pay to the Water District any costs associated directly with the distribution of water under this license.
3. Water diverted under this license shall provide no more than 400.0 acre feet per annum.

APPLICATION FOR AMENDMENT

Permit No. 21-7030

Comes now Lynn Loosli of (address) _____

Ashton, Idaho, and represents to the Director of
the Idaho Department of Water Resources;

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho No. 21-7030, and requests that the permit and permit map be changed as follows:

1. Point of diversion: SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 16 Twp. 8N.
Rge. 43E, B.M., County of Fremont. Other points of diversion:
SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 17, T. 8N, R. 43E, B.M.

2. Period and nature of use: (irrigation, domestic, stockwatering, industrial, etc.)

NO CHANGE

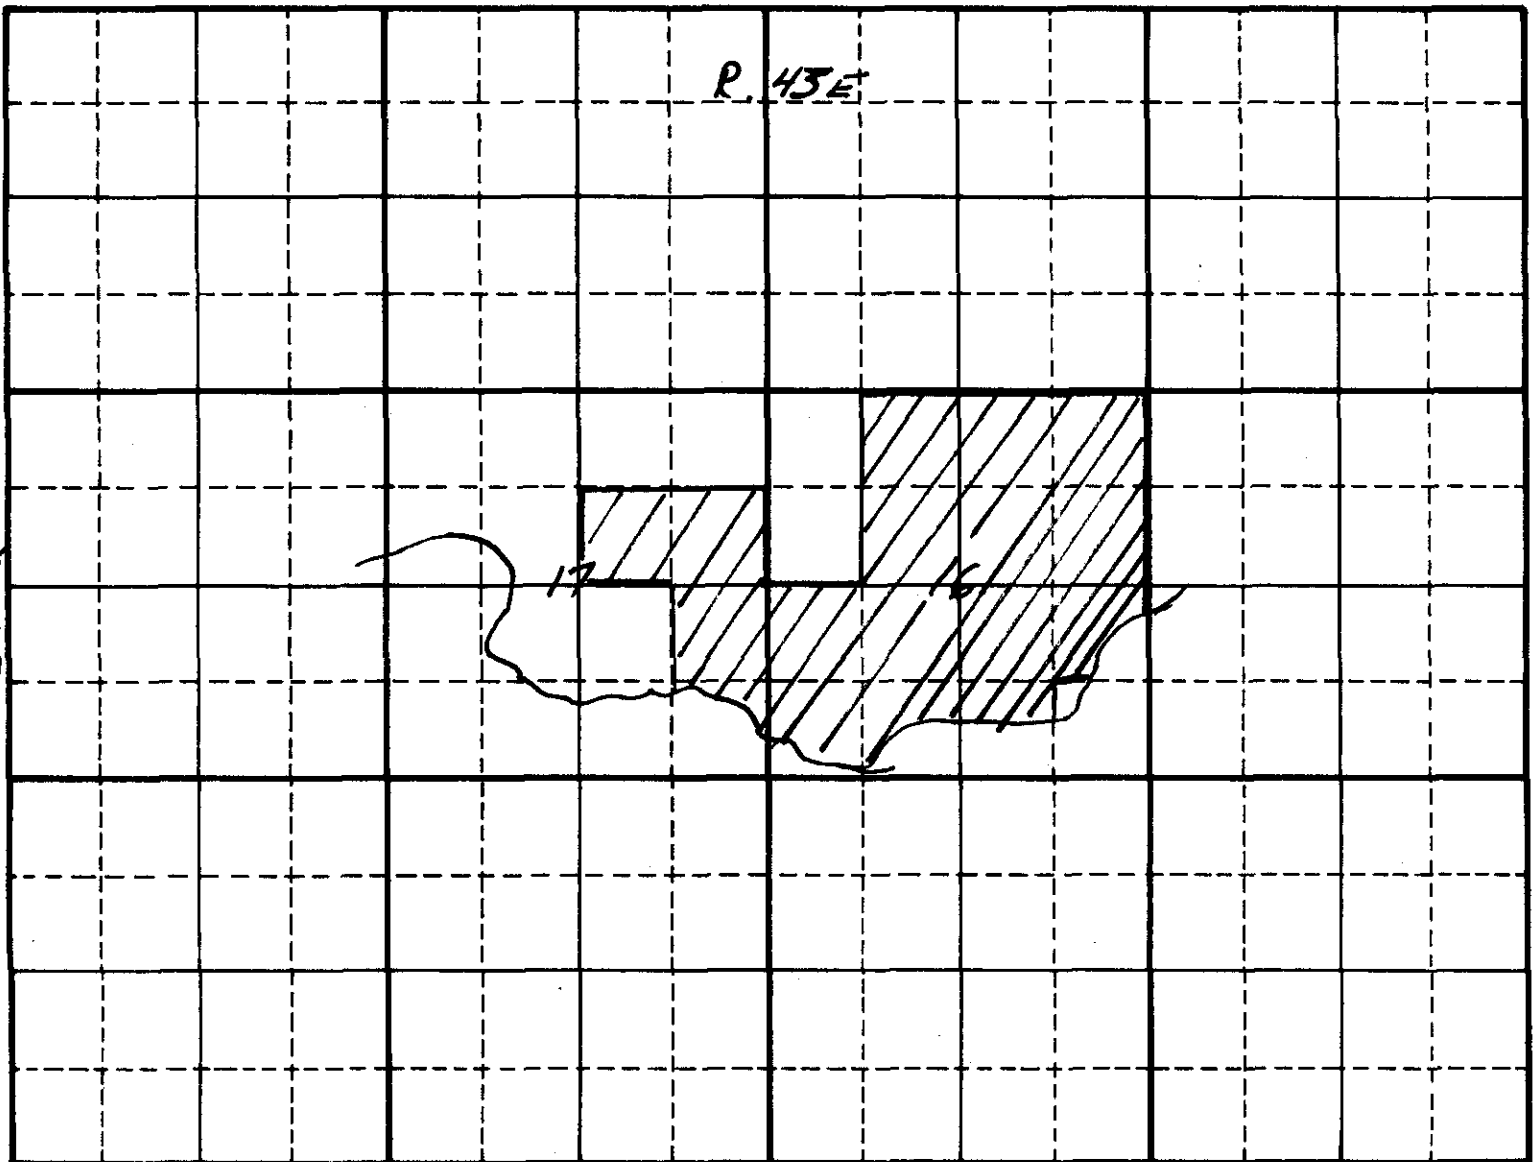

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre feet per annum)

3. Place of use or land to be irrigated:

[illegible]

Total number of acres to be irrigated	550
---------------------------------------	-----

Complete the following map by showing land and point of diversion as proposed by this amendment. Show 40-acre subdivisions, townships, ranges and ditches.

Scale: 2 inches equal 1 mile

That no one will be injured by such change, and that such change will be made at permit holders own risk.

Any protest to the proposed amending
of the permit must be filed with the
Idaho Department of Water Resources,
1515 Lincoln Road, Idaho Falls, Idaho,
83401, on or before August 15, 1977.

C. J. HARRIS, ASSESSOR

Published in the Ashton Herald,
Ashton, Idaho, weekly 28th August,
1977.

BEFORE THE DEPARTMENT OF WATER ADMINISTRATION

OF THE

STATE OF IDAHO

IN THE MATTER OF Application for Permit)
No. 21-7030 in the name of LYNN LOOSLI)

MEMORANDUM DECISION
AND ORDER

On October 1, 1973, Lynn Loosli of Ashton, Idaho, filed Application for Permit No. 21-7030 to appropriate 4.0 cfs of water and/or 400 acre feet of water from Conant Creek, tributary to Fall River, with a point of diversion in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 16 and NW $\frac{1}{4}$ -SE $\frac{1}{4}$, Sec. 17, Twp. 8 N, Rge. 43 E, B.M., Fremont County, to be used from May 1 to October 31 for the irrigation of 550 acres. On October 5, 1973, Lynn Loosli amended the application to 8.0 cfs and/or 400 acre feet. Notice of the amended application was published in the Fremont County Chronicle News at St. Anthony, Idaho, on October 11 and 18, 1973.

The Department received a protest against issuance of this permit from the directors of the Fall River Irrigation Company on October 23, 1973.

A conference was held to consider the protest against issuance of permit on Application No. 21-7030 on January 23, 1974, at St. Anthony, Idaho. The applicant was present and represented himself. The protestant, Fall River Irrigation Company, was represented by spokesman W. Ross Davis. In addition, representatives from several other canal companies, irrigation companies, and irrigation districts diverting waters of the North Fork of the Snake River and tributaries were present.

The protestant and the applicant agreed to allow the Department of Water Administration to render a decision based upon statements made at the conference, information in the Department's official records, and the Department's understanding of the law. The Director of the Department of Water Administration made the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. Conant Creek is a continuously flowing stream in the reaches upon which the proposed diversion is to be made. The proposed diversions are near the confluence of Conant Creek with Fall River and are downstream from other recorded rights on Conant Creek but upstream from diversions from Fall River, including the diversion of the protestant, Fall River Irrigation Company.
2. The waters of Conant Creek are a part of the Upper Snake River System and are subject to the provisions of the decree of the Snake River and its tributaries in the cause entitled "Rexburg Irrigation Company, et al, vs. Teton Irrigation Canal Company, et al" and supplemental actions.
3. Conant Creek lies within the administrative jurisdiction of the watermaster of the State Water District No. 01, Upper Snake River and tributaries.
4. At times during the irrigation season there is water available in Conant Creek and the associated Upper Snake River System in excess of that required to supply the beneficial

requirements of those diverting water under valid, existing water rights. During such times, the water supply at the proposed point of diversion is sufficient for the purposes intended. Normally, these periods occur only during the peak runoff in May and June. Crops grown in the area of the proposed use can be matured in most years without irrigation, but water applied through irrigation can be beneficially used to increase yields. The applicant has 248 acre feet of water per year of Island Park Reservoir storage water which he proposes to exchange for water to be diverted from Conant Creek to supplement the supply.

5. The lands sought to be irrigated are dry lands to which no other water rights are now appurtenant.

6. The waters which are the subject of this application are public waters of the State of Idaho which may be appropriated under the provisions of state law.

CONCLUSIONS OF LAW

1. The waters of Conant Creek in excess of that needed to supply the beneficial requirements of those diverting under valid, existing rights are subject to appropriation and the Department of Water Administration may issue a permit to appropriate such waters.

2. The watermaster or his authorized deputy is responsible for distribution of water in accordance with recorded rights on the Upper Snake River and tributaries, including Conant Creek.

3. The applicant can put the waters sought to beneficial use.

4. The applicant is entitled to a permit from the State of Idaho to divert the unappropriated water of Conant Creek.

ORDER

IT IS, THEREFORE, ORDERED and Application for Permit No. 21-7030 is hereby APPROVED subject to the following conditions:

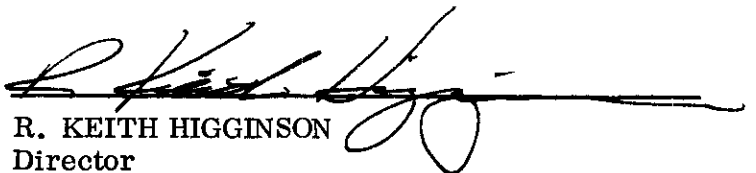

1. That diversion of water under this permit is subject to all prior existing water rights.

2. That proof of construction of works and application of water to beneficial use shall be submitted to the Department of Water Administration on or before July 1, 1975.

3. That a totalizing measuring device of a type approved by the Department shall be installed and maintained as part of each of the diverting works.

4. That use of the water under this permit is subject to control of the Water District No. 01 watermaster. Water shall not be diverted under this permit unless all prior rights are satisfied or are expected to be satisfied on the Snake River System. Specifically, water must be flowing unused past Milner Dam and all prior valid recorded rights on the Henrys Fork are satisfied or expected to be satisfied. Diversion of water using this permit shall only be made after receiving written notice from the Water District No. 01 watermaster that the above conditions are satisfied at the time the diversion is taking place. The permit holder is to pay to the Water District any costs associated directly with the distribution of water under this permit.

Dated this 28 day of June, 1974.

**NOTICE OF APPLICATION
FOR WATER PERMIT**

Notice is hereby given that Lynn Loosli,
Idaho, has on 10/1/73 submitted applica-
tion No. 21-7030 for a permit to appropriate
8.0 cubic feet per second and/or 400 acre feet
per annum of water from Conant Creek
tributary of Fall River by means of pump
and pipeline within the SE1/4SW1/4, Sec. 14,
NW1/4SE1/4, Sec. 17, T. 4N, R. 43E, S. 14,
Fremont County, to be used from May 1 to
Oct. 31 for the irrigation of 350 acres within
the W1/2NE1/4, W1/2, W1/2SE1/4, Sec. 16,
SW1/4SE1/4, SE1/4NW1/4, SE1/4, Sec. 17,
T. 4N, R. 43E, S. 14.

If issued, this permit will be subject to
all prior water rights. Protests against the
granting of the permit must be filed with the
Idaho Department of Water Administration,
1835 Lincoln Road, Idaho Falls, Idaho, 83401
on or before October 23, 1973.

RE: Permit No. 21-7030

Lynn Loosli
Ashton,
Idaho 83420

Dear Mr. Loosli:

A representative of this Department has made an examination of the works covered by your Permit No. 21-7030, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 8.0 cfs Source: Conant Creek trib. to Fall River

The maximum quantity diverted shall not exceed 400.0 acre feet
per year.

Point(s) of diversion: SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 16, Twp. 8N, Rge. 43E, SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 17,
Twp. 8N, Rge. 43E, Fremont County

Beneficial use: Irrigation of 550 acres within the NE $\frac{1}{4}$, E $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$,
SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 16; S $\frac{1}{2}$ NE $\frac{1}{4}$, E $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 17; Twp. 8N, Rge. 43E

Priority date established: October 5, 1973

Conditions (if any): see attached list

If you do not concur with these findings please contact us within 10 days, otherwise
a water license will be issued as set forth above.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

JJ:kw

CONDITIONS OF LICENSE 21-7030

1. Totalizing measuring devices of a type approved by the Department shall be maintained as a part of each of the two diversion works.
2. Use of the water under this license is subject to the control of the watermaster of State Water District No. 01, Snake River. Water shall not be diverted under this license unless all prior rights are satisfied or are expected to be satisfied on the Snake River system. Specifically, water must be flowing unused past Milner Dam and all prior valid recorded rights on the Henry's Fork are satisfied or expected to be satisfied. Diversion of water using this license shall only be made after receiving written notice from the watermaster of District 01 that the above conditions are satisfied at the time the diversion is taking place. The license holder is to pay to the Water District any costs associated directly with the distribution of water under this license.
3. Water diverted under this license shall provide no more than 400.0 acre feet per annum.

WITHDRAWAL
OF PROTEST

With the understanding that the amendment of Permit 21-7030 will not increase the amount of land irrigated or the amount of water used we agree to withdraw our protest against the granting of this amendment. We further understand that this will correct the records of this right & that the present lands will still be irrigated.

Signed at St. Anthony this
22nd day of Sept. 1977

Conant Creek Canal

RECORDED

Sept. 22, 1977

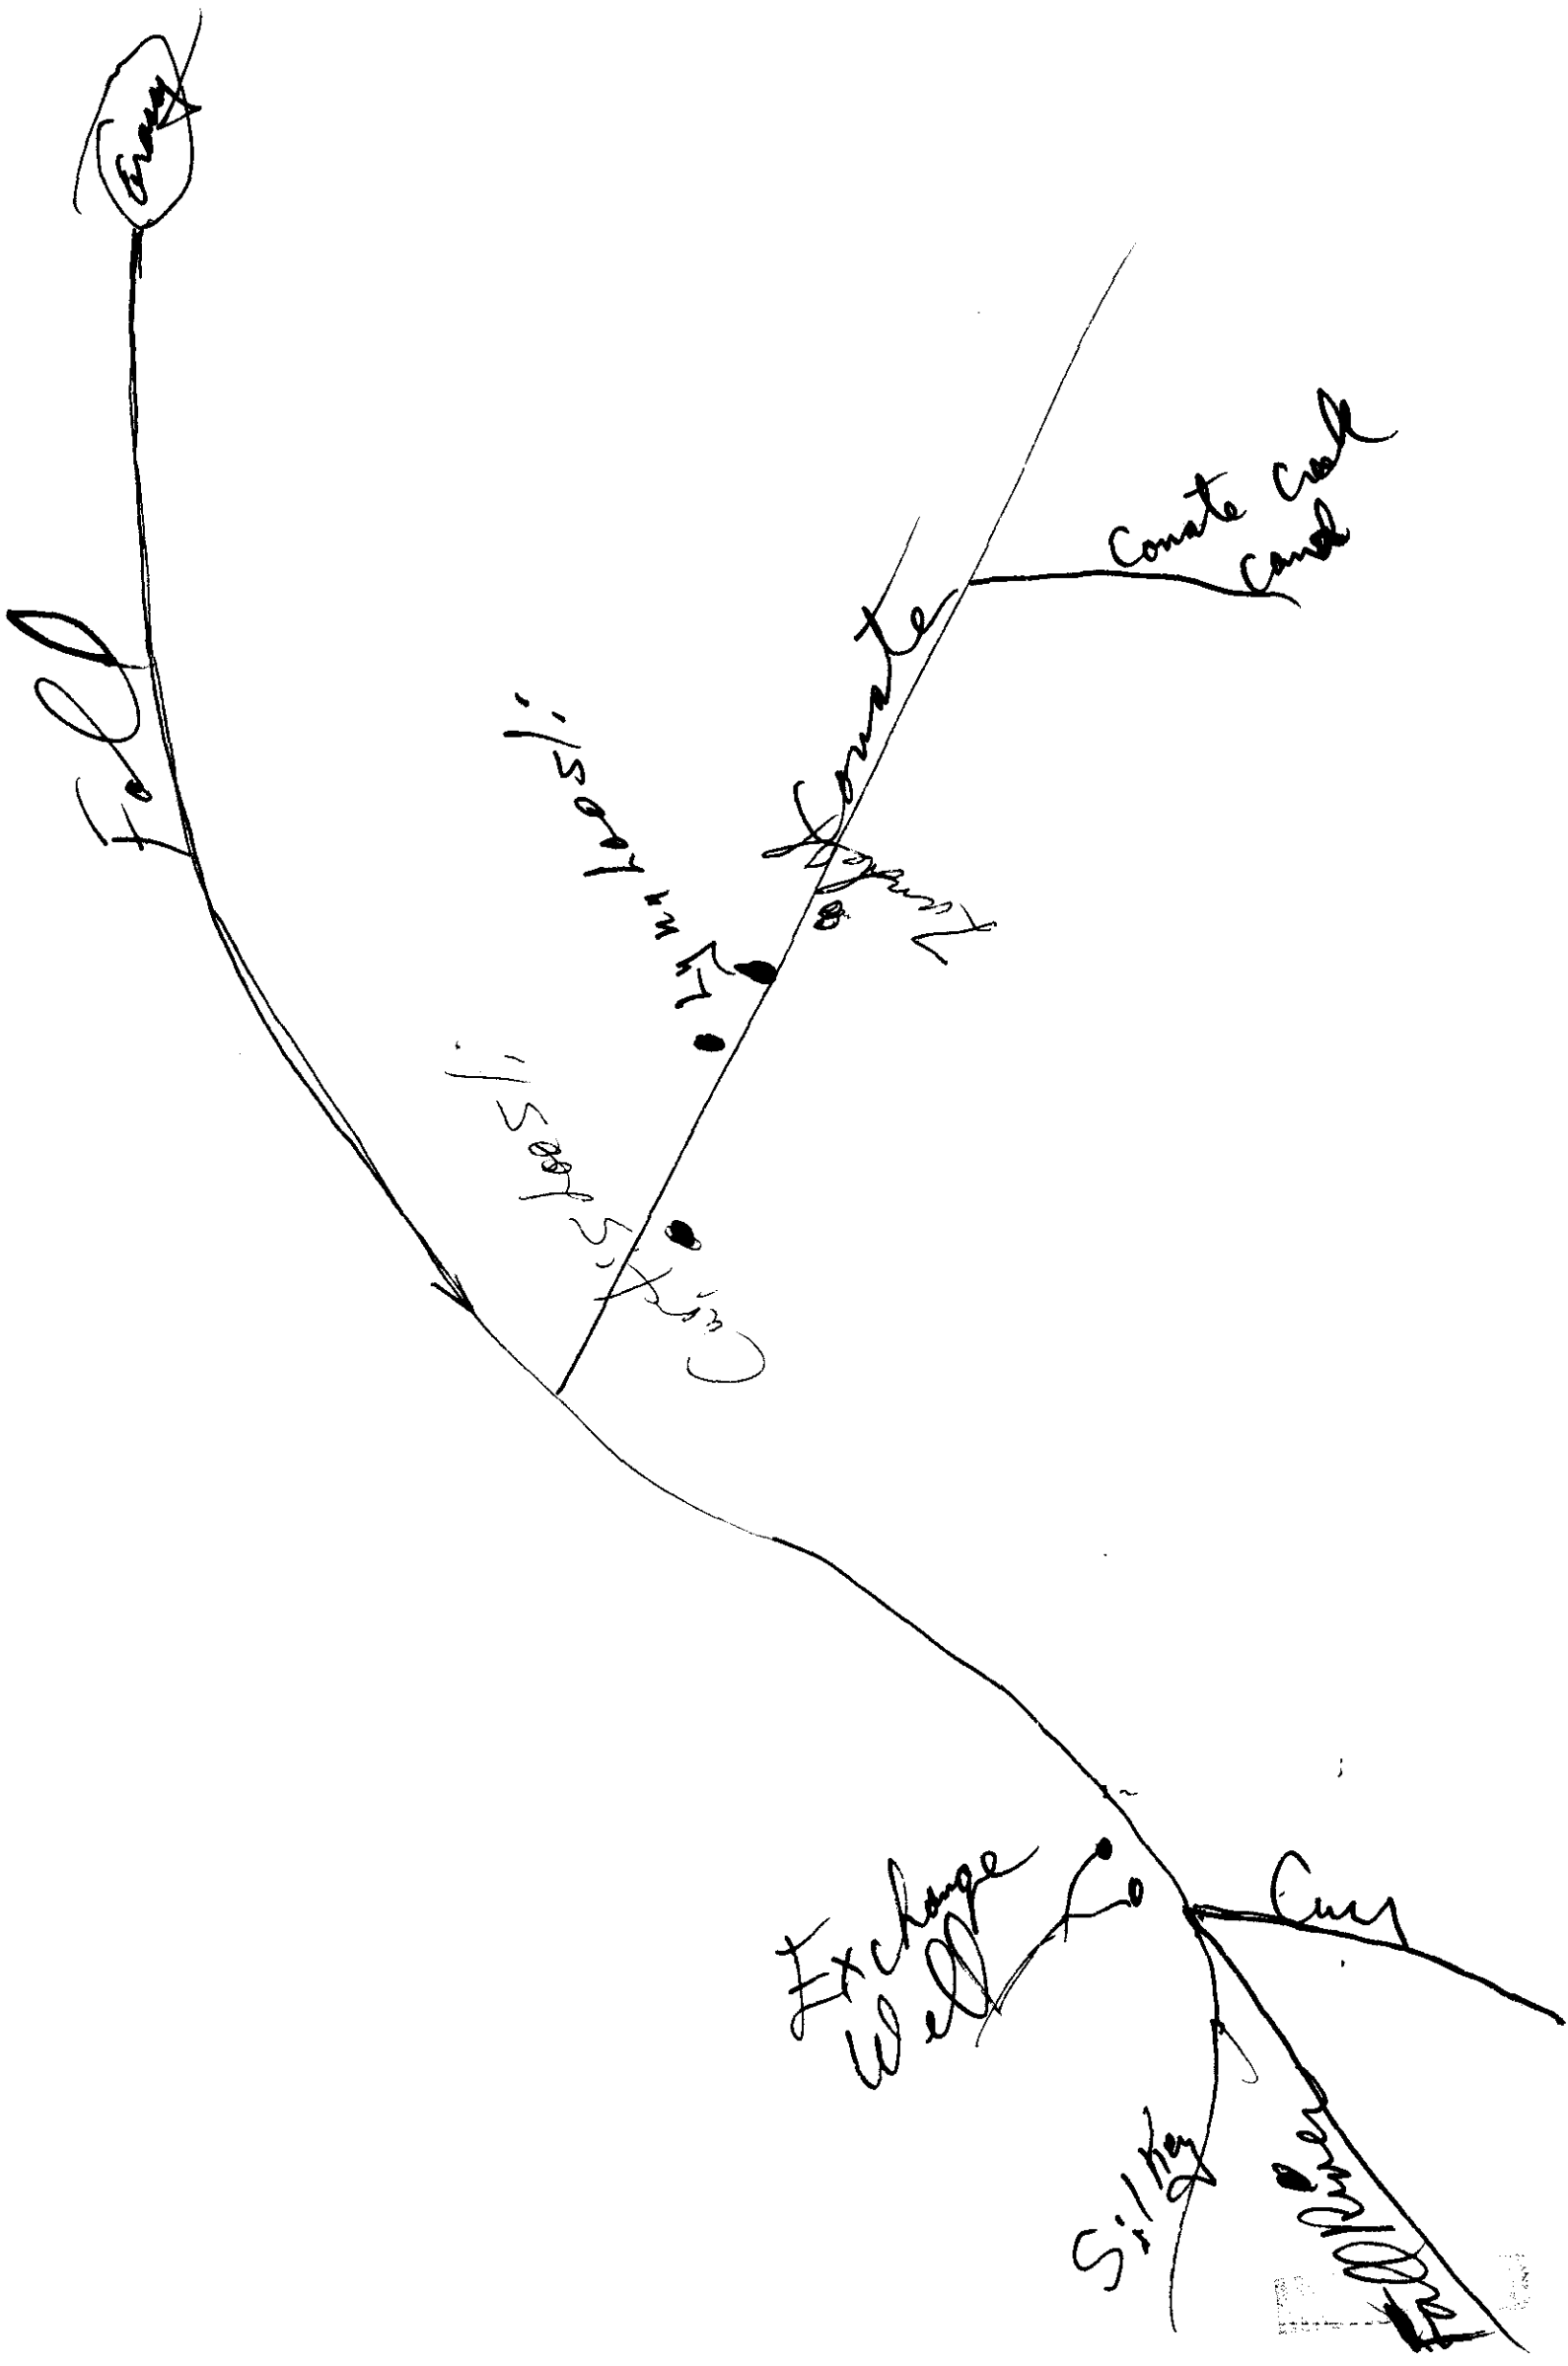

Amendment 21-7030

Lynn Loosli - Applicant

Ray Rigby Atty - Conant Creek Canal

- Amendment filed to correct legal descriptions.
- Homer Jones - Permit was issued Predicated on 248 AF of Island Park Storage as a supplemental supply.
- Lynn - was going to transfer water from farmers but agreement could not be reached. Water was transferred from Silkey ditch. (Exchange 21-2156B)
- Conant Creek - Is storage water transferred into system equal to other storage in system?
- Conant Creek contends that acreage has been expanded above that described in application.

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

In the Matter of Protests Against Approval
of Amended Permit No. 21-7030 in the Name
of LYNN LOOSLI and Application for Permit
No. 21-7132 in the Names of LYNN LOOSLI
&/or CURTIS LOOSLI &/or LEON MARTINDALE

NOTICE OF CONFERENCE
AND/OR HEARING

On July 14, 1977, Lynn Loosli, applied to the Department of Water Resources to amend Permit No. 21-7030; and Lynn Loosli, Curtis Loosli and/or Leon Martindale filed with the Department an application to appropriate the public waters of the State of Idaho. On August 3, 1977, both of these applications were protested by Homer Jones on behalf of the Conant Creek Canal Company.

The Department has set the matter of protests for conference and/or hearing for Thursday, September 22, 1977, at 9:00 a.m., in the Courtroom of the Fremont County Courthouse, St. Anthony, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestant may allow the Department without prejudice to dismiss the protests or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 1st day of September, 1977.

RE: Application for Permit No. 21-7030/21-7130/21-7132

Conant Creek Canal Company
Homer Jones, President
Ashton, Idaho 83420

Dear Mr. Jones:

Your protests against the approval of the above referenced applications have been received and copies have been sent to the applicants. The Department suggests you contact the applicants directly in an effort to determine what is proposed by the applications and to attempt to resolve the protests.

If you do not advise us within twenty (20) days that the protests have been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

If this office can be of further assistance, please contact us.

Sincerely,

RONALD D. CARLSON
Supervisor

AUG 8 1977

OF THE
STATE OF IDAHO

Department of Water Resources
Eastern District Office

IN THE MATTER OF THE APPLICATION OF)
LYNN LOOSLI TO AMEND PERMIT 21-7030)

) PROTEST

COMES NOW, CONANT CREEK CANAL COMPANY and protests the granting of the above referred to application on the following grounds:

1. The proposed use by the applicant will reduce the quantity of water under existing water rights.

2. The proposed water supply is insufficient for the purposes intended.

3. The change will constitute an enlargement in the use of the original right.

4. Water rights of Conant Creek Canal Company and its shareholders will be injured.

5. Applicant is simultaneously with this application also applying for annexation of the same premises to be annexed into the Fremont-Madison Irrigation District, and if both permits were granted, the storage water for existing users of Conant Creek and the Conant Creek Canal Company would still have to come from Conant Creek, which would be insufficient to satisfy the natural flow and storage rights of the present users of Conant Creek and Conant Creek Canal Company, and would therefore jeopardize existing rights.

WHEREFORE, Protestant asks that the Department not grant said application.

DATED this 3rd day of August, 1977.

Re: Permit No. 21-7030

Lynn Loosli
Ashton,
Idaho 83420

Dear Mr. Loosli:

One of the conditions of approval of your water Permit No. 21-7030 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before July 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

MEMORANDUM

RECEIVED

Department of Water Administration

TO: Bob Fleenor
FROM: Norm Young
DATE: June 21, 1974
RE: Applications for Permit No. 21-7023 & 21-7030

I am forwarding herewith the Applications for Permits with proposed memorandum decisions for Farrel Black Ranch, Inc. and Lynn Loosli. You will note that I have removed any reference to requiring a supplemental source from the Lynn Loosli memorandum decision. This is a result of discussions with the farmers during a recent field visit to the area and my telephone conversation with Russell Hillman, a Fremont County Agent. Apparently, crops, even potatoes, can be matured on most years without irrigation. Irrigation merely increases the yield. Therefore, if economics are not a factor in determining beneficial use, earlier irrigations probably can be considered to be a beneficial use if they only increase yield.

If you feel the memorandum decisions are inadequate, please make the necessary comments and return them to me for further review.

NCY

I DON'T SEE ANY REASON FOR THE DELAY BY
SENDING THESE BACK OVER TO NORM - LETS
ISSUE THEM,

21 7000

MEMORANDUM

TO: Norm Young
FROM: R. Keith Higginson
RE: Application for Permit No. 21-7030, Lynn Loosli
DATE: May 29, 1974

Your recent memorandum to Bob Fleenor requested answers to certain questions regarding exchanges of water, particularly the application of Lynn Loosli. After discussing this with Nathan, our answers to your questions are as follows:

(1) An approved exchange application is necessary for Lynn Loosli to pump Conant Creek water. The water cannot be handled internally by the Fremont-Madison Irrigation District.

(2) New land, of course, can be added to the district, provided the district takes proper steps in accordance to the provisions of the Idaho Code. The land does not need to be added to the district, however, if an exchange of water is approved.

(3) The exchange application can be filed by Lynn, since he is the one proposing to make use of water from Conant Creek. He can indicate that the water to be exchanged is 248 acre-feet of storage water, which he is entitled to receive from the Fremont-Madison Irrigation District.

(4) The application for permit and application to exchange cannot be combined for this project. He needs the application to appropriate for the early spring runoff waters which are not currently appropriated, and he needs the exchange in order to cover water used during the remainder of the season when the stream flow is fully appropriated.

21 7030

cc: Bob Fleenor

MEMORANDUM

RECEIVED

Department of Water Administration

TO: Bob Fleenor

FROM: Norm Young

RE: Application for Permit No. 21-7030 LYNN LOOSLI

DATE: May 13, 1974

This application was filed on October 5, 1973, at the request of the Department, when they became aware of a new irrigation pump installed by the applicant on Conant Creek. Issuance of permit was protested by Fall River Irrigation Company and a conference was held on January 23, 1974, at St. Anthony, Idaho to consider it. At this well attended meeting, many Upper Snake River water users expressed their belief that even on wet years water was not available in excess of existing rights for a sufficient period of time to produce irrigated crops and that on dry years no excess water would be available at any time.

The applicant said he had storage rights that he would use on the new lands to supplement the permit to make the project feasible (See attached sketch). Both the applicant and the protestants agreed to allow the Department to reach a decision on the application without a formal hearing. A decision has not been issued because of the desirability of acting simultaneously on the application for permit and any application for exchange of the applicant's storage rights for Conant Creek water that may be filled. The applicant has obtained releases of storage water from two canals (See attached letter). He is willing to file an application for exchange, if it is necessary, to legally pump the storage water; however, there is a question whether he, Madison-Fremont Irrigation District or Bureau of Reclamation should file the application. My understanding of the ownership of Island Park Reservoir storage water is as follows:

- (1) The storage license was issued by the Department to the USA Bureau of Reclamation.
- (2) Madison-Fremont Irrigation District apparently hold all storage space by contract or other arrangements with the Bureau.
- (3) Madison-Fremont Irrigation District sells storage water to individuals, evidencing a right by a letter.
- (4) Each year Madison-Fremont Irrigation District allots to the various canal companies within the district storage water based upon the holding of the individuals in the canal company and the per cent the reservoir is filled.

I met with Madison-Fremont Board of Directors last week. They do not want to file an exchange for Mr. Loosli's rights, particularly because the new lands are outside of the irrigation boundaries. Also, many board members believe their own water uses would be impaired by the change. Any distribution of storage water within the district boundaries, they believe, is their responsibility and approved exchanges are not required.

21 7030

Bob Fleenor
Page 2
May 13, 1974

I need help on the following questions:

1. Is an approved exchange necessary to pump Conant Creek water as storage water, or can Madison-Fremont handle it internally? No
2. Can the new land be added to the district, and does it need to be for an exchange to be approved? Yes
No - if it
is paid
3. If an exchange application is needed and appropriate, who should file it, Bureau of Reclamation, Madison-Fremont, or the individual? Loose
4. Could the application for permit and the application to exchange be combined for a project of this type? No - we
need
both

No.

Exchange is between already
existing water right.

Application is for a new
appropriation not connected
to the exchange. Bob

RE: Field Trip on Conant Creek, Squirrel Creek, and Fall River Area

DATE: June 19, 1974

Visited Conant Creek, Squirrel Creek, and Fall River area with Art Larsen and Andy Anderson on June 12, 1974.

Pumps Observed - Conant Creek

1. Curtis Loosli - NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 17, T. 8N, R. 43E - 100 acres, approximately 70 Hp pump (Water Right ?) (Installed about 15 years ago.)
2. Lynn Loosli - SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 17, T. 8N, R. 43E - 320 acres, 250 Hp pump installed 1973. (Application for Permit No. 21-7030.)
3. Lynn Loosli - SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 16, T. 8N, R. 43E - 380 acres, no pumps installed yet but pump bases and diversion sump recently completed (June, 1974), 300 Hp pump anticipated, (Application for Permit No. 21-7030.)
4. Conant Creek Canal (Zundel Shares) - installed 1973 - Hp ??, SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 15, T. 8N, R. 43E. (Approved Transfer.)
5. Martin Bergmen - SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 15, T. 8N, R. 43E - Hp estimated at 200, installed 1962. Pumping storage water from Bergmen Lake.

Pumps to be Installed

Squirrel Creek

1. Kurt Kandler - NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 17, T. 8N, R. 44E - Mainline pipe at site. REA power being brought in, potatoes planted. Pumps will be in Squirrel Creek but claims to be pumping Boon Creek Canal waste water (per telecon June 17, 1974.) (Application for transfer was filed on June 18, 1974.)
2. Squirrel Creek Canal (Ada Carlson shares) - SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 8, T. 8N, R. 44E. Application for transfer will be filed.
3. Hal Harrigfeld - NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 8, T. 8N, R. 44E. Application for Permit No. 21-7036.

Fall River

1. Paul Bolland - NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 34, T. 9N, R. 44E. Claim No. 21-4020 and application for transfer. Pump pad bulldozed into river and mainline in process of being installed. Potatoes planted.
2. Curtis Loosli - Sec. 8, T. 8N, R. 43E. It is my understanding that these pumps were installed in 1974 but we did not see them. No application filed to date.

CONVERSATION MEMORANDUM

DATE June 19, 1974

NOTE: MR. HILLMAN REQUESTED THAT THIS CONVERSATION
BE KEPT CONFIDENTIAL.

FILE 21-7036 & 21-7030

NAME OF PARTY Russell Hillman, Fremont County Agent

EMPLOYEE Norm Young *NCY*

RE: Water Requirements of crops in upland areas of Fremont County.

1. Potatoes

- a. Can be grown on many years without irrigation, typical
dryland yield might be 125 sacks per acre.
- b. Area is capable of producing yields of 250-300 sacks per
acre with adequate irrigation.
- c. Normal full supply irrigation requirement is about 14 inches
applied to crop. Typically, this would be seven irrigations
of 2 inches each. First irrigation would be 30 days after
planting (about June 15 to July 1) with subsequent irrigations
every one to two weeks until about August 20.
- d. An irrigation or two before July 1 would benefit potatoes
even if no further irrigation were available but unlikely
if it would be economically justifiable.
- e. Potatoes are only crop economically justifiable to pump for.

2. Alfalfa

- a. Without irrigation one cutting of about one ton per acre.
- b. With full irrigation two cuttings of about two to two and half
ton per acre.
- c. Irrigation would be beneficial even if only before July 1.

3. Spring and Fall Small Grains

- a. Dryland yield - 30 to 40 bushels per acre.
- b. Fully irrigated yield - up to 80 bushels per acre.
- c. No further irrigation needed after July 1 if soil profile
full.

June 3, 1974

Mr. Lynn Loosli
Ashton
Idaho 83420

Dear Mr. Loosli:

I received today a memorandum from our State Office answering the questions which were posed by your proposed use of water from Conant Creek in exchange for Island Park storage water. I have been advised that it is necessary for you to have an approved exchange and that you, as the water user, should file the exchange rather than the Madison-Fremont Irrigation District, the space holder. Any Application for Exchange filed with this Department will be advertised in the local newspaper and interested parties that feel that they may be injured by the exchange may have an opportunity to file a protest. It is not appropriate to file an exchange in combination with an Application for Permit.

As you will recall, this office had partially completed an Application for Exchange form and had forwarded it to the Madison-Fremont Irrigation District in St. Anthony, Idaho, for their signature. You may wish to obtain this application, sign it before a Notary Public and return it to this office with the filing fee of \$30.00.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

NORMAN C. YOUNG
District Engineer

MEMORANDUM

TO: Norm Young
FROM: R. Keith Higginson *RKH*
RE: Application for Permit No. 21-7030, Lynn Loosli
DATE: May 29, 1974

Your recent memorandum to Bob Fleenor requested answers to certain questions regarding exchanges of water, particularly the application of Lynn Loosli. After discussing this with Nathan, our answers to your questions are as follows:

(1) An approved exchange application is necessary for Lynn Loosli to pump Conant Creek water. The matter cannot be handled internally by the Fremont-Madison Irrigation District.

(2) New land, of course, can be added to the district, provided the district takes proper steps in accordance to the provisions of the Idaho Code. The land does not need to be added to the district, however, if an exchange of water is approved.

(3) The exchange application can be filed by Lynn, since he is the one proposing to make use of water from Conant Creek. He can indicate that the water to be exchanged is 248 acre-feet of storage water, which he is entitled to receive from the Fremont-Madison Irrigation District.

(4) The application for permit and application to exchange cannot be combined for this project. He needs the application to appropriate for the early spring runoff waters which are not currently appropriated, and he needs the exchange in order to cover water used during the remainder of the season when the stream flow is fully appropriated.

cc: Bob Fleenor

21 7030

MEMORANDUM

TO: Bob Fleenor
FROM: Norm Young
RE: Application for Permit No. 21-7030 LYNN LOOSLI
DATE: May 13, 1974

This application was filed on October 5, 1973, at the request of the Department, when they became aware of a new irrigation pump installed by the applicant on Conant Creek. Issuance of permit was protested by Fall River Irrigation Company and a conference was held on January 23, 1974, at St. Anthony, Idaho to consider it. At this well attended meeting, many Upper Snake River water users expressed their belief that even on wet years water was not available in excess of existing rights for a sufficient period of time to produce irrigated crops and that on dry years no excess water would be available at any time.

The applicant said he had storage rights that he would use on the new lands to supplement the permit to make the project feasible (See attached sketch). Both the applicant and the protestants agreed to allow the Department to reach a decision on the application without a formal hearing. A decision has not been issued because of the desirability of acting simultaneously on the application for permit for any application for exchange of the applicants storage rights for Canant Creek water that may be filled. The applicant has obtained releases of storage water from two canals (See attached letter). He is willing to file an application for exchange, if it is necessary, to legally pump the storage water; however, there is a question whether he, Madison-Fremont Irrigation District or Bureau of Reclamation should file the application. My understanding of the ownership of Island Park Reservoir storage water is as follows:

- (1) The storage license was issued by the Department to the USA Bureau of Reclamation.
- (2) Madison-Fremont Irrigation District apparently hold all storage space by contract or other arrangements with the Bureau.
- (3) Madison-Fremont Irrigation District sells storage water to individuals evidencing a right by a letter.
- (4) Each year Madison-Fremont Irrigation District allots to the various canal companies within the district storage water based upon the holding of the individual in the canal company and the per cent the reservoir is filled.

I met with Madison-Fremont Board of Directors last week. They do not want to file an exchange for Mr. Loosli's rights, particularly because the new lands are outside of the irrigation boundaries. Also, many board members believe their own water uses would be impaired by the change. Any distribution of storage water within the district boundaries, they believe, is their responsibility and approved exchanges are not required.

Bob Fleenor
Page 2
May 13, 1974

I need help on the following questions:

1. Is an approved exchange necessary to pump Conant Creek water as storage water, or can Madison-Fremont handle it internally?
 2. Can the new land be added to the district, and does it need to be for an exchange to be approved?
 3. If an exchange application is needed and appropriate, who should file it, Bureau of Reclamation, Madison-Fremont, or the individual?
 4. Could the application for permit and the application to exchange be combined for a project of this type?
-

March 22, 1974

Mr. L. C. Anderson, Treasurer
Fremont-Madison Irrigation District
St. Anthony, Idaho 83445

Dear Andy:

I was pleased to receive your letter dated March 19, 1974 indicating that Lynn Loosli has received permission to transfer storage water from the Farmers Own Canal and Silkey Ditch to use on his development from Conant Creek. Because this change in location of use of the stored water requires that water will be pumped from Conant Creek and is not water that is being released directly from storage, an application for exchange needs to be filed with this department to make the change official. This document needs to be on record with the department before final action can be taken upon Lynn Loosli's application for permit.

I have prepared the necessary application form which I believe adequately describes the proposed exchange. This form should be signed by an elected official of Fremont-Madison Irrigation District and returned to this office for processing. There is a \$30.00 filing fee which must accompany the application. I am sure that you will wish to coordinate this filing with Mr. Loosli. Upon receipt of the application, the department will proceed to advertise it as specified in Section 42-240, Idaho Code.

Your cooperation concerning this matter is greatly appreciated, and I will be most happy to answer any questions you may have concerning this request.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Department of Water Administration
Eastern District Office

Gentlemen:

We have this day received permission by letter to transfer one hundred twenty five (125) acre-feet of storage from the Farmers Own Canal and one hundred twenty three (123) acre-feet of storage from the Silkey Ditch to be pumped out of Conant-Fall River to be credited to Lynn Loosli. Mr Loosli will furnish this office with a daily pump record same will be computed by this office and charged to his storage rights.

This should be sufficient information for your office so that a permit will be issued to Mr Loosli.

Sincerely

FREMONT-MADISON IRRIGATION DISTRICT

March 8, 1974

Re: Application for Permit No. 21-7030

Mr. Lynn Loosli
Ashton
Idaho 83420

Dear Mr. Loosli:

This office is in receipt of your letter of January 29, 1974, describing the water rights that you control. The Department has reviewed this information and appreciates your sending it. The Department's review of your application has also involved a review of available data to determine how often water is available to supply new appropriation from the Upper Snake River and its tributaries. Data now available indicates just as had previously been brought out by you and others at the hearing at St. Anthony, that excess flows probably occur only during the early part of the irrigation season and then not on every year. It also appears, again just as had been previously discussed, that a project relying on a 1974 natural flow right is not feasible, if prior rights are to be protected. To have adequate water, a project would, therefore, appear to need another supply, such as, from storage.

Based upon this premise, the Department will need more specific information concerning which storage or other rights will be available for use on the land covered by the present application. Also, if the use of these rights on the land in question will involve the filing of transfers or exchanges to allow the water to be taken from Conant Creek, the necessary documents should be filed to allow the present application to be fully evaluated.

Your cooperation in this matter has been greatly appreciated. If I can help you in any way in developing the information we need to complete the processing of this application, do not hesitate to contact me.

Very truly yours,

NORMAN C. YOUNG
District Engineer

INTER-DEPARTMENT MEMO — 1

RECEIVED

DATE February 20, 1974

FROM Bob Fleenor

FEB 21 1974

TO Norm Young

Department of Water Administration
Eastern Division, CSWPA

SUBJECT

It appears that in only 9 out of the last 41 years that water was available in June, and 14 out of the 41 years that it was available in May.

The releases past Milner were used to satisfy downstream rights of Idaho Power.

Bl
21 7030 SIGNATURE

Reaches 26 and 28 - Snake River near Shelley and Blackfoot: The Upper Snake Watermaster attempts to maintain approximate minimum flows past Shelley and Blackfoot on Snake River for irrigation below these points. To simulate actual operation, a flow at Shelley of 5000 cfs was selected for May through July, 4000 cfs in August, 3000 cfs in September, and 2000 cfs in October. At Blackfoot, a flow of 1400 cfs was established in July and August and 1000 cfs in September. For other months, Shelley flows alone are controlling. From November to March, a 2300 cfs minimum was selected for Shelley. In years of good runoff, this flow is greatly exceeded.

Reach 38 - Snake River at Milner: The various entities which manage the Snake River presently consider any and all water passing Milner Dam as "waste". The flows at Milner are, therefore, kept as small as possible while still satisfying downstream power rights held by Idaho Power Company. From November through March assigned flows range from 300 to 500 cfs to model this operation. In most years, these flows are exceeded at Milner because of either power releases at American Falls for the Minidoka power plant or flood releases above Boise combined with natural inflow not storable at American Falls.

Unless flood releases are being spilled at American Falls, flows past Milner in May and June are almost zero as a result of the filling of upstream reservoirs. In July, August, and September, about 300 cfs passes Milner in average or good water years to satisfy the Idaho Power Company storage release of 45,000 acre-feet from American Falls Reservoir. However, in short water years, this right is usually not exercised and flows approach zero.

VERIFICATION

Indicators and control data were changed until the operation study produced a reasonable reproduction of the 1959-1968 historical data. In

ASHTON, IDAHO

29 January 1974

Department of Water Adminis
Eastern District Office

JAN 30 1974

CERTIFIED
SEED POTATOES

Dear Mr. Young,

At our last meeting you wanted to know what water I had. I have 8.0 sec ft June 1 1890, 2.5 sec ft 1892, 1.9 sec ft 1892, and 3.0 sec feet 1894. I also have about 800 shares in the Farmers and Marysville canals which are 1895 and 96 rights. I also have long term leases on land that has additional natural flow and an abundance of Fremont Madison storage water. I have 938 Acre feet of Fremont Madison storage water. Curtis my brother has even more water that is available if needed to justify this project.

I would like to point out that 1/2 of this project was under operation last year and there was ample water in that below ave year. In the 20 years I have been farming including last year I have never had to rent any additional storage water. Since I have converted all my existing flood water systems to sprinkler so I feel I have gained enough water to bring this land under water.

I realize that an extremely dry year when the resevoirs don't fill I could be in a bind. Since I haven't had to rent water even when I flooded I will still be in a better shape than in the past. Since we are experiencing a larger than normal snow fall this winter next year will be more than adequate. With Teton Dam coming on the system in 1975 with its guarente fill there will be plenty of water in are area.

As to the Conet Creek peoples objection, The creek had more than ample water last year. I am at the end of the creek so there is no way I can take water from them. The creek was damed near dry at severa1 locations for diversions but springs further down produce more water. I have designed the system with 4 small pumps so when there is abundant water I can water heavy but during low water one pump could be used to finish a crop. A very large spring at the head of my property flowed enough water last year to run my system. I realise I can never expect prior rights to turn water down to fill my right.

As to users down strem if there is an extremely dry spell and I have used up my storage and none is available I realize my pumps can be shut off.

Sincerely

21 7030

Lynn Loosli

BEFORE THE DEPARTMENT OF WATER ADMINISTRATION
OF THE
STATE OF IDAHO

In the Matter of Protest Against Approval)
of Application for Permit No. 21-7030)
in the name of LYNN LOOSLI)
_____)

NOTICE OF CONFERENCE
AND/OR HEARING

On October 1, 1973, Lynn Loosli, Ashton, Idaho, filed with the Department of Water Administration an application to appropriate the public waters of the State of Idaho. On October 17, 1973, the Department received a protest against approval of said application from the directors of the Fall River Irrigation Co.

The Department has set the matter of protest for conference and/or hearing for Wednesday, January 23, 1974, at 9:30 a.m., in the Courtroom of the Fremont County Courthouse, St. Anthony, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Administration. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestants may allow the Department without prejudice to dismiss the protest or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 20th day of December, 1973.

RONALD D. CARLSON

Assistant to the District Engineer

21-7030 - Lynn Loosli

Courtroom, Fremont County Courthouse, St. Anthony, Idaho

January 23, 1973 - 9:30 am

Re: Application for Permit No. 21-7030

Dear Mr. Loosli:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 21-7030. You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required. (Section 42-202, Idaho Code)

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Re: Application No. 21-7030

Mr. Floyd Law
St. Anthony,
Idaho 83445

Dear Mr. Law:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Re: Application No. 21-7030

Mr. Dyle B. Peterson
St. Anthony,
Idaho 83445

Dear Mr. Peterson:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Fremont County Chronicle News
Box 568
St. Anthony, Idaho 83445

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(signature of claimant)

Very truly yours,

NORMAN C. YOUNG
District Engineer

Re: Application for Permit No. 21-7030

Mr. Lynn Loosli
Ashton,
Idaho 83420

Dear Mr. Loosli:

Attached herewith is departmental receipt No. 10374 in the amount of \$40.00 for amending the above referenced application for permit. We have changed the rate of diversion in Item 5 to read 8.0 c.f.s. for irrigation purposes and/or 400 acre feet per annum.

I appreciate your cooperation in this matter. You can expect to see this advertised in the Fremont County Chronicle News on October 11 and October 18, 1973. If you have any questions, please do not hesitate to contact this office.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Mr. Lynn Loosli
Ashton,
Idaho 83420

Dear Mr. Loosli:

Attached herewith is departmental receipt No. 10368 in the amount of \$55.00 for your application for permit which was received in this office under the above date.

Enclosed is the retyped application for permit that we discussed in our telephone conversation this afternoon. If you agree with it, please sign your name on page 3 exactly as it appears in Item 1 (Lynn Loosli). I have completed Item 3a and Item 8b to agree with the map presented on your original application. I have added in Item 4 that the rate of diversion will be 4 cubic feet per second and as you requested, also listed the 400 acre feet per annum. Approximately 8 c.f.s. is required to run your system; therefore, you may wish to amend your application to increase the rate to 8 c.f.s. This would require an additional filing fee of \$40.00.

Please sign the retyped application and return it to this office as soon as possible, if everything is satisfactory.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Lynn Loochi

Sept. 28, 1973

Dear Norman

I waited till now to file to make certain there was enough water in Conant creek. There was plenty of water this year. By only planting $\frac{1}{4}$ of the ground to potatoes in one year I should have ample water. There will always be ample early water to use on grain & hay.

Sincerely

Lynn Loochi
