STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that Margaret Hagenbarth, David J. Hagenbarth, James F. Hagenbarth
(Name of Claimant)
P. O. Box 1128 Dillon, MT 59725 Telephone No. 406 683-2163
(Mailing Address) (Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

(1) Date of priority: (When was the water first applied to a beneficial use) October 1, 1943

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

(2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)
Kick-Creek tributary to sinks

(3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

(cfs, gpd, AFA)		(Domestic, Irrigation, Stock, Etc.)		(Both dates inclusive)	
				(Mo., Day)	(Mo., Day)
Quantity	<u>3.50 cfs</u>	Use	<u>Irrigation</u>	Period of Use From <u>5/1</u>	To <u>10/31</u>
Quantity	<u>.05 cfs</u>	Use	<u>Stockwater</u>	Period of Use From <u>6/1</u>	To <u>11/30</u>
Quantity		Use		Period of Use From	To
Quantity		Use		Period of Use From	To
Quantity		Use		Period of Use From	To

(4) 3.55 cfs TOTAL QUANTITY USED.
(cfs, gpd, AFA)

(5) A) Point of diversion: (Location of point where water is diverted from its source)
SW ¼ NE ¼, Sec. 11 Twp. 13N Rge. 40E B.M., County of Clark
Additional points of diversion:

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. Dike 5 feet high & 6 feet wide diverts water into ditch with course running west for 1 mile. Ditch splits-one ditch runs east 3/8 mile into series of dikes, other ditch runs southwest 3/8 mile into main ditch.

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

T	R	SEC.	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
13N	40E	10													2				2
		11									38	25	40	40	40	40	40	36	299
		12									3	36	5						44
		14	3	10			17	8											38
13N	40E																		
		10													X				
		11									X	X	X	X	X	X	X	X	
		12									X								

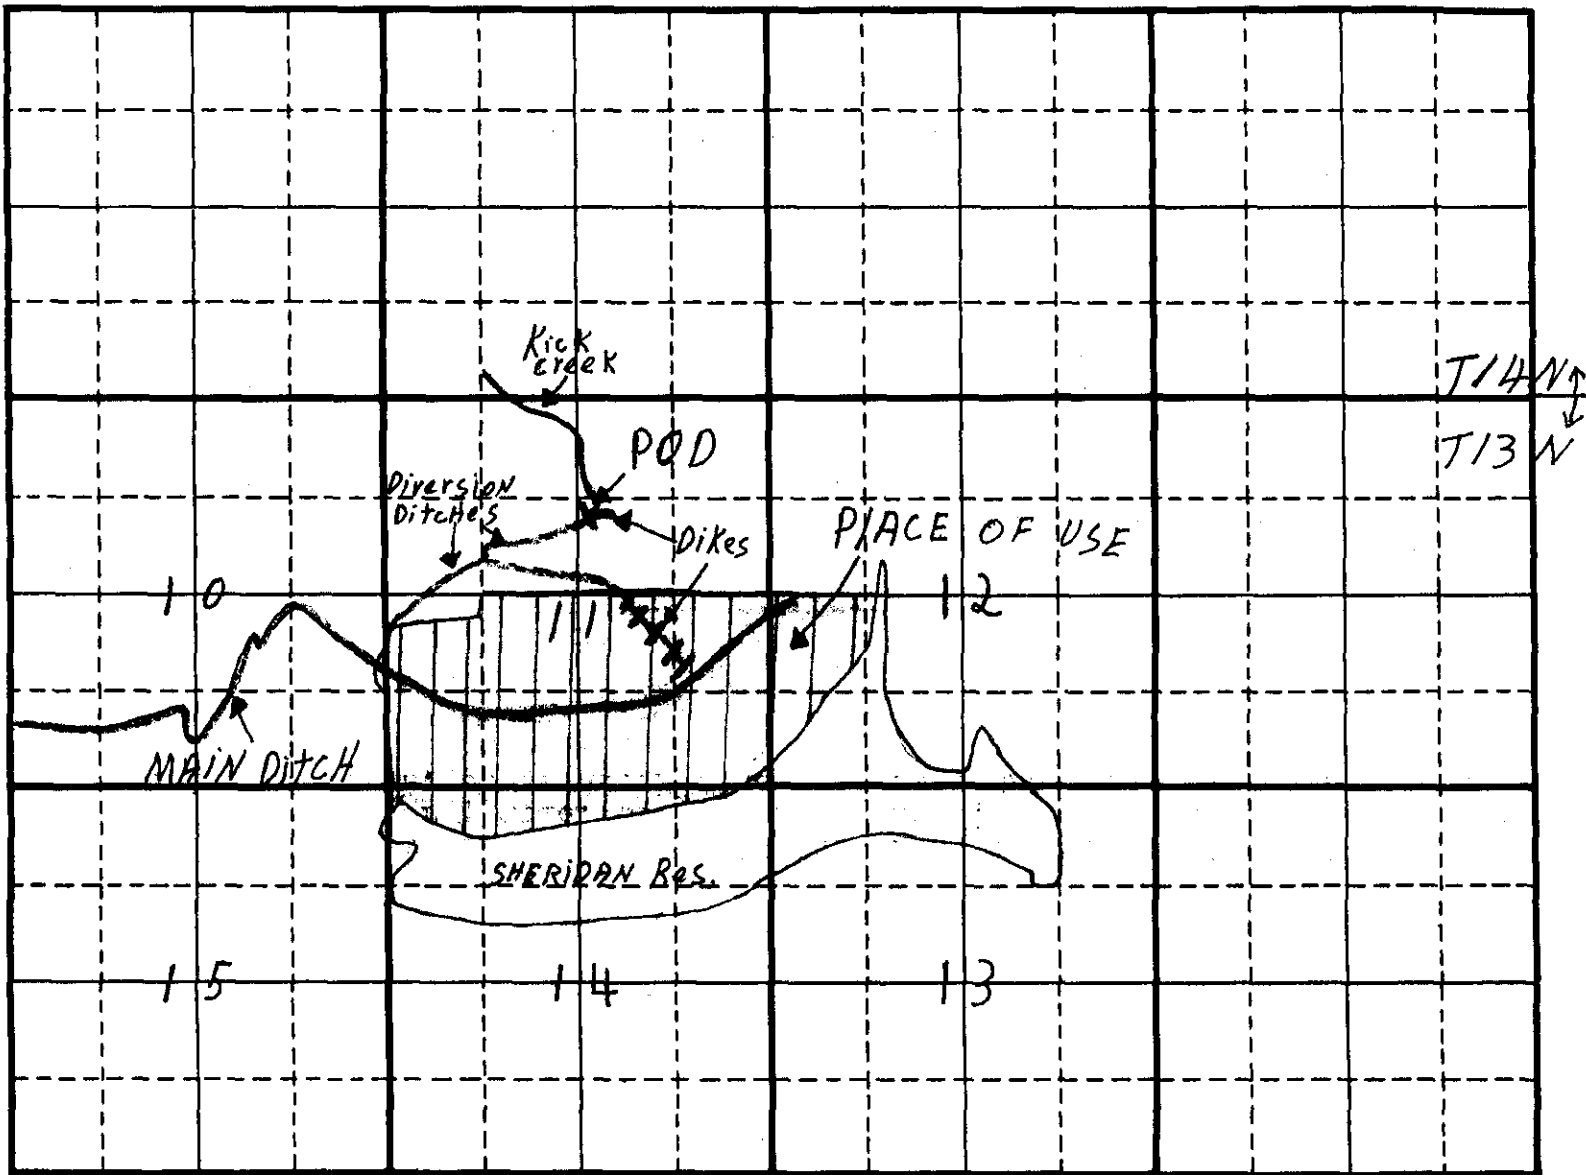

No. of acres 383

B) If water is used for other than irrigation, fully describe that use, being as specific as possible: Water is used for stockwater in the 40's above marked by an X.

NOTE: Include here the type and number of stock watered: 1000 head of pairs or yearlings-cattle

(7) If you are claiming water as a member of an organization, list name of organization:

(8) Remarks Attachments A, B, and C.

Scale: 2 inches equal 1 mile.

A F F I D A V I T

STATE OF MONTANA)
County Of Beaverhead) ss.

James F. Hagenbarth, being first duly sworn upon oath,
deposes and says:

That I am of legal age and a landowner in Clark County, Idaho. Under Idaho Law (Idaho Code 42-243) I am required to record any surface water put to a beneficial use by me or my predecessors before May 20, 1971, if said use is unrecorded. It is my intention in the affidavit to claim a water right which was established by my predecessor, D. V. Hagenbarth. As a claimant of this water right and also the person completing the required form, I will attest to and explain the proof presented.

A brief history of the water and the land on which it is beneficially used is vital to understanding the evidence presented to substantiate this claim. In the late 1930's, my Father, D. V. Hagenbarth, began acquiring land throughout Clark County. He put together a livestock operation that was based in Clark County, Idaho in the summer and Beaverhead County, Montana in the winter. In the early 1940's Mr. Hagenbarth began to improve

RECEIVED

undeveloped rangelands in the Sheridan Creek and Antelope Flat Areas of Clark County (T13N,R39E & T13N,R40E). This improvement consisted of eradicating sagebrush and wyethia and developing an irrigation system which would put the available water to beneficial use irrigating these reseeded rangelands.

In the above described area of Clark County, the snow pack is quite heavy as is the spring run-off. During the spring run-off, every draw carries a flow of water, some flows larger than others. This early water lasts only for a few days. In this area there are only two creeks that maintain a yearlong flow to downstream users, Sheridan Creek on the east and Ching Creek on the west. The distance between these two creeks is 9.5 miles. Between the Sheridan Creek and Ching Creek drainages, the only creek of record which delivers water to the downstream users is Dry Creek. Dry Creek supplies high water to the Camas Creek drainage in District #31. Said right ceases when Dry Creek no longer flows into Spring Creek. Dry Creek usually ceases to flow into Spring Creek by mid June. Other than Dry Creek, several small streams lie between Sheridan Creek and Ching Creek. These streams are Scalp Creek, Moose Creek, Mud Creek, and Kick Creek. Scalp and Moose Creek are in the Camas Creek drainage and have filings on their flows belonging to me. Mud Creek and Kick Creek are in the Sheridan drainage and there are no filings of record on their flows. Except for a few days in the spring during peak run-off, the flows of these named streams never are tributaries to either Sheridan or Camas Creek on a regular basis. Several small springs lie between Sheridan Creek and Dry Creek and these spring's flows are never tributaries to Sheridan Creek. The fact that the flows from these small streams and springs never reach a live stream on a regular basis is very common in this area because of the porous soils and the vast lava fields. Consequently, with the exception of Dry Creek, all the sources of water between Sheridan Creek and Ching Creek are tributaries to sinks. I own two recorded rights on Dry

Creek, #31-2274 and #31-2275. The water used under License #31-2275 supplements water claimed in this filing.

The water being claimed in this filing is put to beneficial use by a sub-flood irrigation system installed by my Father in the early 1940's. This system is centered around a large heavily diked low gradient ditch which begins at a diversion on Dry Creek in Section 9, T13N, R40E and meanders easterly through Sections 9, 10, 11, and 12 in Township 13 North, Range 40 East. Several secondary low gradient dikes and ditches were constructed to further disperse the water throughout the lands serviced by this system. The slow moving water in these ditches, along with several permanent and temporary dams or dikes, forces the system's water out onto the surrounding lands in a sub-flood combination. This system was designed to handle both large and small flows of water efficiently and with little labor or maintenance. When the spring run-off ceases, this system combines small flows from several sources and uses then more efficiently than if each source was used by itself.

In Attachment B of this filing (Paul Gneiting Affidavit), Mr. Gneiting attests to the fact that he helped Mr. Hagenbarth construct this system in 1942 and 1943, and that the system was completed in September of 1943. It becomes obvious that the unrecorded sources of water diverted and used by this system were diverted no later than October 1, 1943. Therefore October 1, 1943 is the date of first use or priority date in this filing.

In Attachment B, Mr. Gneiting also explains the system and how it works. He mentions further that the sources of water used by the system decrease in flow radically after spring run-off and barely reach the system. This would substantiate that these flows of water are absorbed by the surrounding lands and are therefore tributaries to sinks.

The water which flows into this irrigation system is not only put to beneficial use for irrigation, but also stockwater. The main ditch crosses several pastures and the livestock use this water.

I-6

The use right claimed in this filing is for water which flows in Kick Creek and is diverted by a dike into a ditch in the NWSWNE of Section 11, T13N,R40E. As explained by Paul Gneiting in Attachment B, Kick Creek's flow is diverted above the irrigations system's main supply ditch. Kick Creek water is used to irrigate lands lying above the main ditch via a series of smaller ditches and dikes. After being used on lands above the main ditch, Kick Creek water flows into the main ditch and throughout the remainder of the system, being supplemented by water from other sources within the system. Kick Creek is small and has a drainage of approximately 700 acres lying in Sections 2 and 3 in T13N,R40E and Sections 34 and 35 in T14N,R40E.

The place of use is clearly identified on the claim form and an Attachment C (map). The place of use is owned by the claimants. Attachment C was included to give a better understanding of how the system is geographically laid out and works. This map enables one to more accurately describe the entity of the system. The flows claimed for irrigation from Kick Creek are the maximum early spring flows. These flows decrease considerably as previously discussed.

After a careful analysis of the above mentioned attachments and an understanding of the history and use described, it becomes obvious that Kick Creek's flow was put to a beneficial use by D. V. Hagenbarth via the sub-flood systems described above. The use of Kick Creek's flow began on October 1, 1943 and has continued into the present. As successors in interest to D. V. Hagenbarth, the claimants, Margaret Hagenbarth, David J. Hagenbarth, and James F. Hagenbarth, have the right to claim and use this water for irrigation and stockwater as provided for under Idaho State Law.

Attachment B

A F F I D A V I T

STATE OF MONTANA)
ss.
County of Beaverhead)

Paul Gneiting, being first duly sworn upon oath, deposes and says:

That I am sixty-nine (69) years of age and now a resident of Silver Bow County, Montana, and make this affidavit at the request of the Hagenbarth Family relative to the history and use of irrigations waters in the Sheridan Area, Clark County, Idaho. On September 26, 1983 I made an inspection trip to the Sheridan Area to ensure that the facts addressed in this affidavit are accurate in relation to the irrigation system I helped install in the early 1940's.

In the spring of 1938 I came to Glen, Montana and was employed by D. V. Hagenbarth, who at that time was managing Consolidated Farms in the Glen Area and also owned lands in Clark County, Idaho. The first years of my employment were spent in the general operation and development of Mr. Hagenbarth's ranches in Montana and in Idaho. During the 1950's and until 1959, I assumed management of Mr. Hagenbarth's ranches in Montana. I was employed by Mr. Hagenbarth until the spring of 1959 when I purchased a ranch north of Melrose in Silver Bow County, Montana. I still own and operate this ranch.

During the spring, summer, and fall of 1942 and 1943, I assisted Mr. Hagenbarth in developing an irrigated pasture system in the Sheridan Area. This development work included reseeding and installing a sub-flood irrigation system in Sections 10, 11, 12, 14, and 15 in Township 13 North, Range 40 East, B.M.. The

I-6

MICROFILMED

irrigation system was designed to handle the heavy spring run-off and also the waters which flow from Dry Creek, Mud Creek, Kick Creek, and several springs which lie in Sections 10 and 11 in Township 13 North, Range 40 East. The construction of this system was completed in September of 1943 and the sources of water were turned into the system.

A heavily diked slow moving ditch was used to carry the majority of the water from its sources. This main ditch began in Section 9 at a diversion on Dry Creek and had a course which ran easterly across Sections 9, 10, 11, and 12 in Township 13 North, Range 40 East. Below this main ditch several dikes and secondary slow moving ditches were constructed to spread these waters throughout the pasture system. On Kick Creek I constructed a dike and diverted Kick Creek's flow into ditches which irrigated lands lying above the main ditch in Section 11, T13N, R40E. The waste water then flowed into the main ditch and throughout the remainder of the system.

This irrigation system was designed to spread the available water in slow moving ditches throughout the pasture system. The water in these ditches would sub-irrigate the surrounding lands, especially when dams were installed at various locations to slow the flow and make the ditches bank full. This sub-flood system was designed to handle large or small amounts of water with a minimum of labor or maintenance. After the spring run-off, the amount of water available from the various sources sharply declined, and the system picked up those small amounts and pooled them so they could be used effectively.

It was my observation while working in the Sheridan Area in the 1940's, that the sources of water used by this irrigation system, especially Mud Creek and Kick Creek, radically decreased in flow shortly after the spring run-off. The flows of Kick Creek and Mud Creek barely made it to the main ditch by summer's end.

After my trip to the Sheridan Area in the fall of 1983, it was evident to me that the system is still being used as

I constructed it in the early 1940's. There are a few minor changes because of the construction of a new road through the area, but these changes are insignificant.

To: Keen, Shelley
Cc: Ruberry, Allen; Carlsen, Ernie
Subject: Renumbering Basin 31 claims

Hello Shelley,

Allen Ruberry has identified several 4000 series SRBA claims that are in the wrong basin. They were initially given Basin 31 numbers and are actually in Basin 21. The numbers are:

A31-04129	Pod is	13N 40E 10 NWNESE	21-04170
A31-04130		13N 40E 10 SESW	21-04171
A31-04131		13N 40E 10 NWSE	21-04172
A31-04132		13N 40E 11 SWNE	21-04173
A31-04133		13N 40E 09 SESE	21-04174
A31-04134		13N 40E 10 SESW	21-04175

Renumbered to Basin (21)
03-23-2000
JK

We can assign these claims 10,000 numbers unless you prefer to have your section assign them new 4000 series numbers.

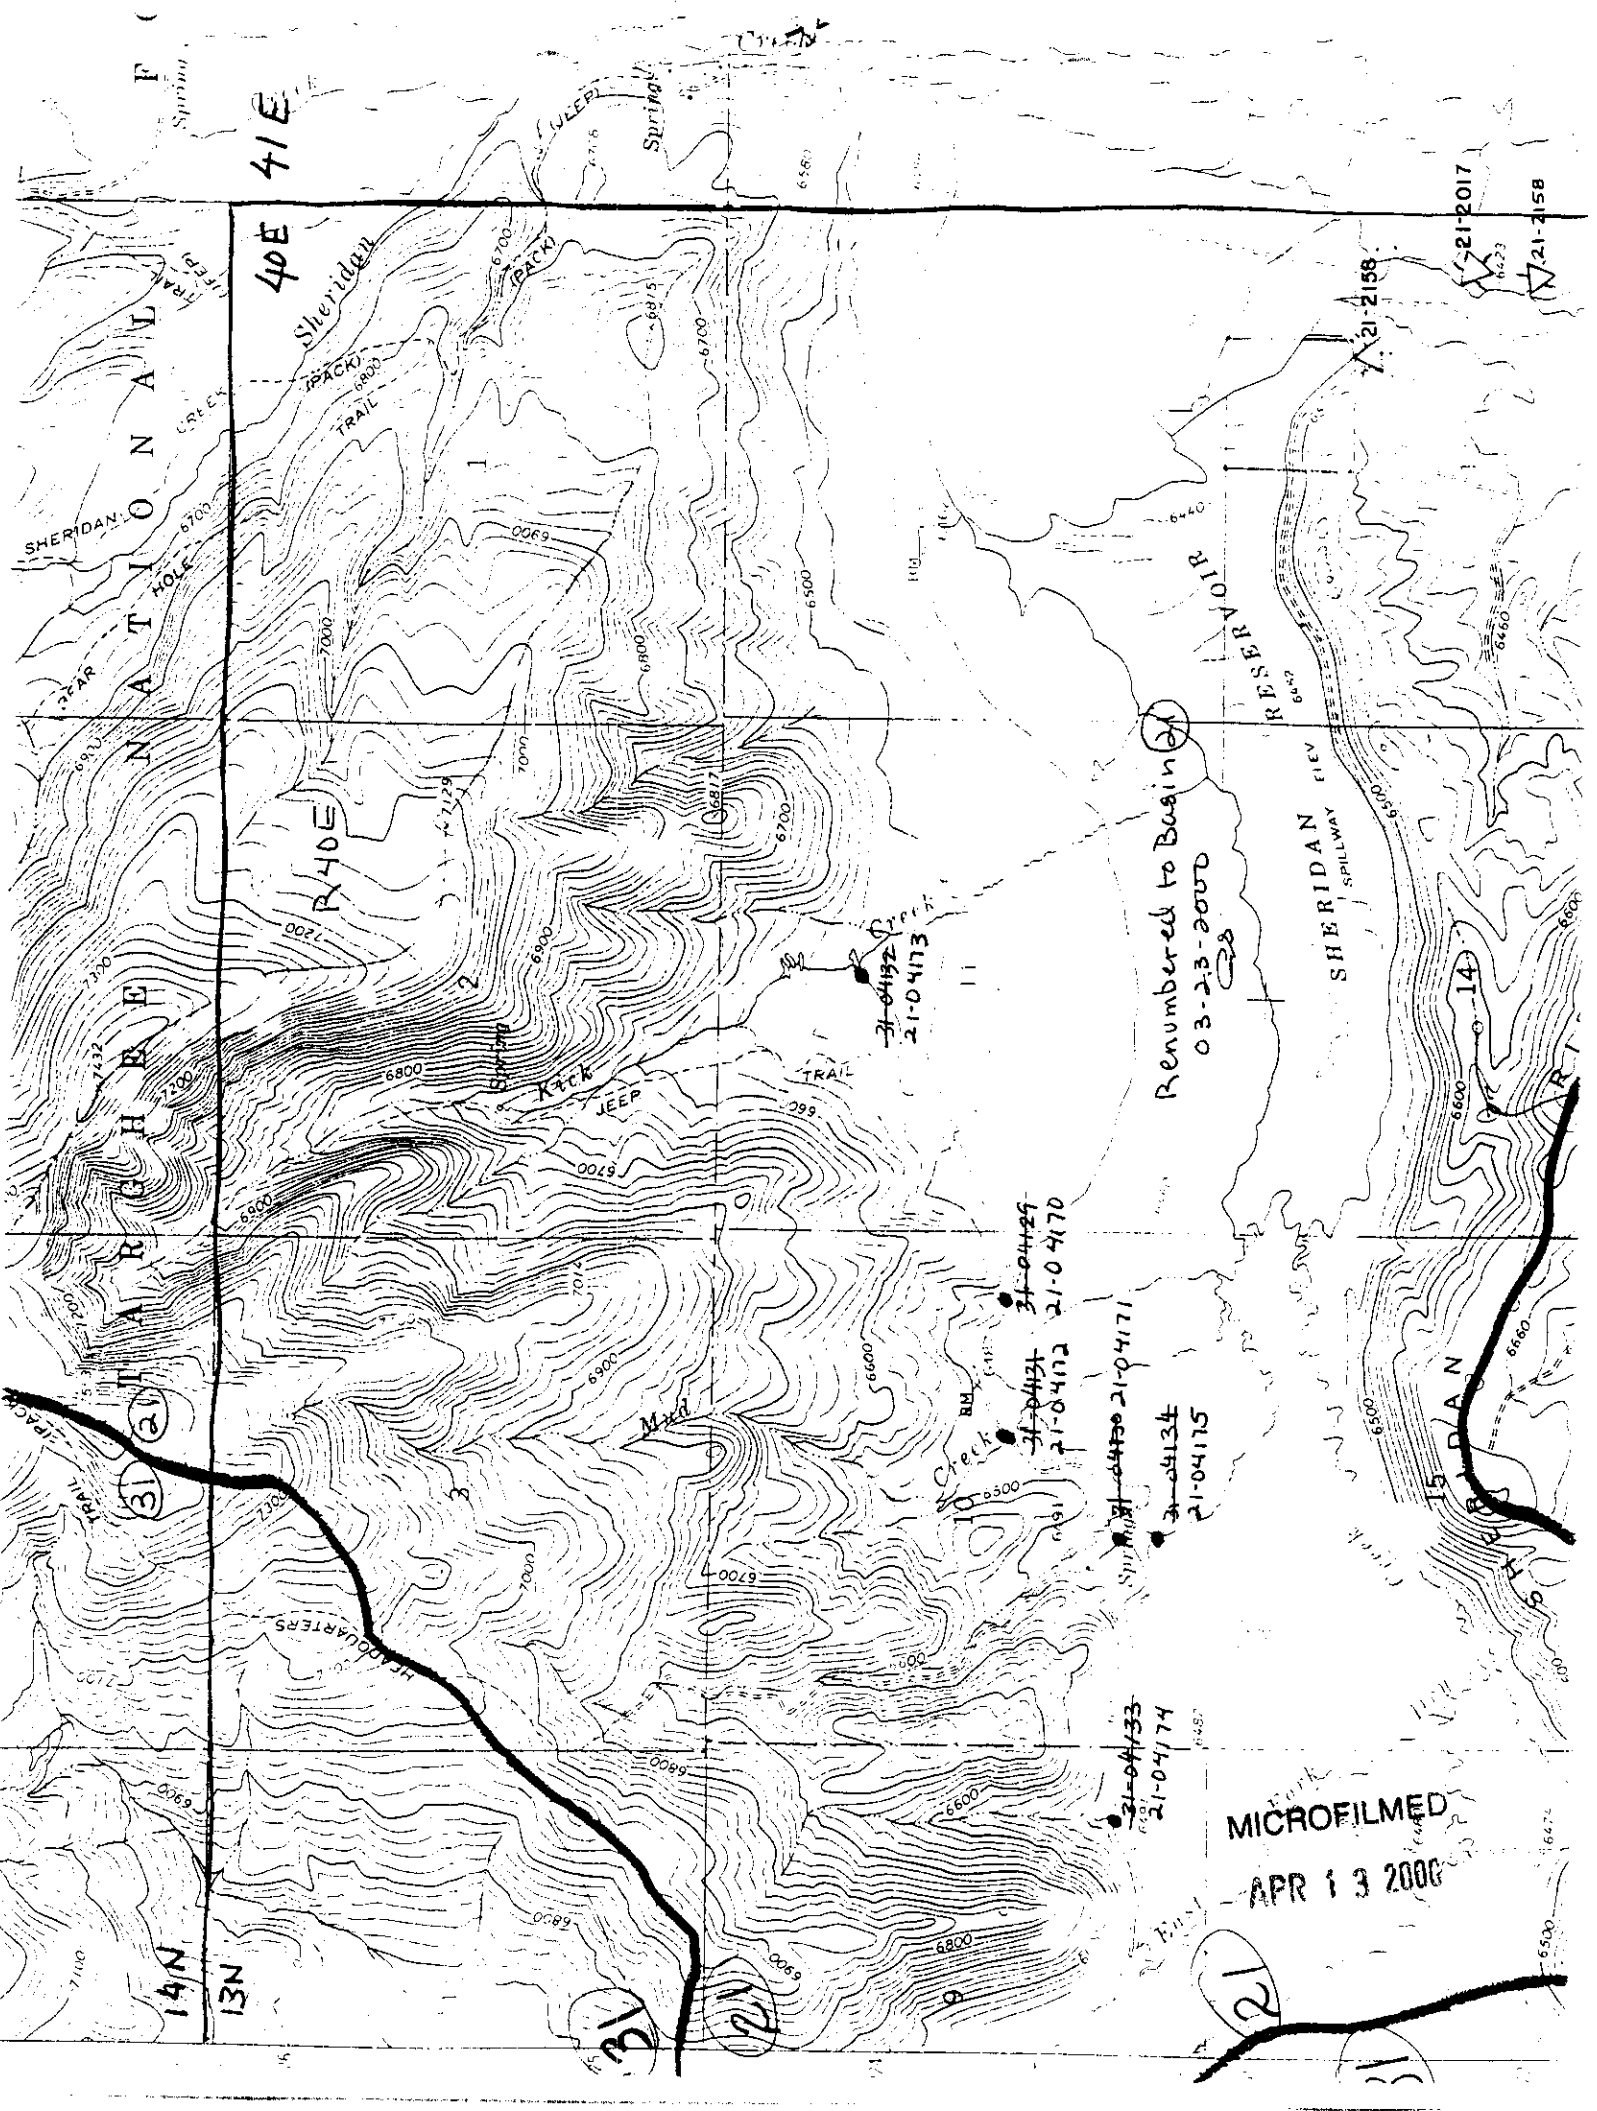

Ernie

Richard,

Please pull these files and map the points of diversion from the claim forms on a map showing the basin boundary. Thanks.

Shelley

RE: Claim No. 31-4132

Dear Claimant:

The Department of Water Resources has completed the advertising of your claim to a water right, and no further action is authorized under Section 42-243 and 42-244, IDAHO CODE. Your claim will be retained in our files and will be available at any time for use by you or the court.

The filing and advertising of the claim does not confirm the water right claimed, but will serve to record and preserve the information and the evidence which you included in your claim.

If, at a later date, you find that you have additional information or supporting evidence that you would like to have included with the claim, you may have that information or evidence added at any time. Please refer to the claim identification number when corresponding with this office.

We are enclosing a copy of your claim for your records. If you have questions, or if this office may be of further assistance, please feel free to contact us.

Yours truly,

RONALD D. CARLSON
