Dear Sirs:

Quite a while ago we wrote you asking for the Affidavit of Publication for the above named water permit. The State of Idaho has written us for this, as they cannot process any further proving up of the water permit until they received this Affidavit.

I have contacted Mr. O.J. Salisbury and he said that he had paid you for the publication soon after it was published.

Would you kindly forward it by return mail.

Re: Permit No. G-30213
Salisbury Corporation

Dear Mr. McEldowney:

I am enclosing sworn statements of the Salisbury Corporation by Jim Salisbury, President, in duplicate and sworn statements of two witnesses in duplicate proving up on the well. This is Well No. 2.

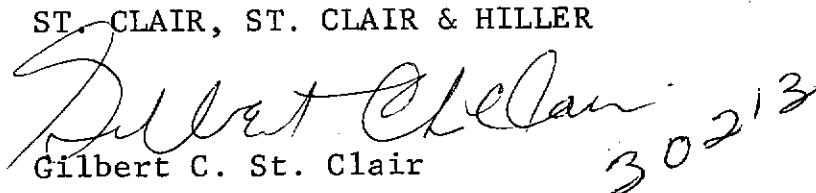

I held the hearing at the Salisbury ranch and interviewed the witnesses and holder personally. Incidentally, I am well familiar with the place and while there, went over all the property affected by the well and was amazed at the turf for pasture that is building up through their system of ditches and also witnessed the well in operation.

This, of course, in that territory near Henry's Lake is a long range proposition as the ground is rather porous and it does take time to build up the pasture turf. Cattle was on the pasture grazing. I was well pleased with the progress that has been made and know that it will continue to progress as the well, irrigation and ditch system is used over the years.

You could send the final approval through this office if you wish. Also, I suppose there is a bill for the publication that we should have, as Mr. Salisbury said that he does not recall having received it.

Very truly yours,

Re: Permit # G-30213

Gentlemen:

Enclosed please find Form #36 in duplicate and Form #11
as to the publication.

The pump can be used interchangeably with Well #2 and #1
but as I understand, R.E.A. Power is only into Well #2 and
works have been completed insofar as irrigation parts and
water put to a beneficial use, so I am assuming that we can
only prove up on Well #2.

If otherwise, we would appreciate your changing our notices
so as to conform to the Salisbury's best advantage and in
accordance with the regulations. If you would insert the
date for the hearing, then I will be able to be in Fremont
County at the Salisbury Ranch at the proper time.

Please note that we have cut down the cubic feet per second
from 17.3 to 5.575 as this well produces 2500 gallons per
minute for certain periods and it will deliver 2750 gallons
per minute but the motor and pump are not designed for this
larger amount, although the well is capable of delivering this
higher quantity without drawing down.

Would you please publish in the St. Anthony Chronicle and if
possible, August 8, 15, 22, and 29, 1968.

Re: Application No. ~~G-26249~~
Salisbury Corporation

Dear Sirs:

In accordance with our conversation last week in Boise, I am writing on behalf of the Salisbury Corporation, Box 396, Idaho Falls, Idaho, for 17.3 c.f.s. of water for irrigation purposes.

To supplement our letter of May 16, 1966, the rural REA have now informed us that they will put in a power line for the operation of the pumps to be attached to the wells which have already been completed under the aforesaid permit. However, it will take some time before this can be done and they, as well as we, are uncertain as to the exact time that the line can be put in.

If we were to complete the development as required by the permit, being September 28, 1966, it would be necessary for the Salisbury Corporation to use propane or propane-butane or gas, and upon the REA furnishing the power to reconvert this would add considerably to the expenses of the operation.

We are therefore again requesting an extension of time for two years, until September 28, 1968, and will complete the construction just as soon as REA does construct the power lines.

You indicated that if these additional requests for the extension were given in writing, that this extension could be given.

Thanking you, we are

Very truly yours,

Gentlemen:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 30213 are due not later than Sept. 28, 1966

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Dear Mr. St. Clair:

We have your letter of May 16, 1966 in which you request an extension of time for completion of works under Permit No. G-28245. From a check of our files we assume you are referring to Permit No. G-30213 which covers the diversion of 17.3 c.f.s. of water by Salisbury Corporation for irrigation purposes.

We do not find in your letter sufficient grounds for this office to grant an extension of time on this permit. In fact, you indicate that the work can easily be completed. We therefore suggest you proceed to complete the development and prepare to make proof by September 28, 1966.

Dear Sirs:

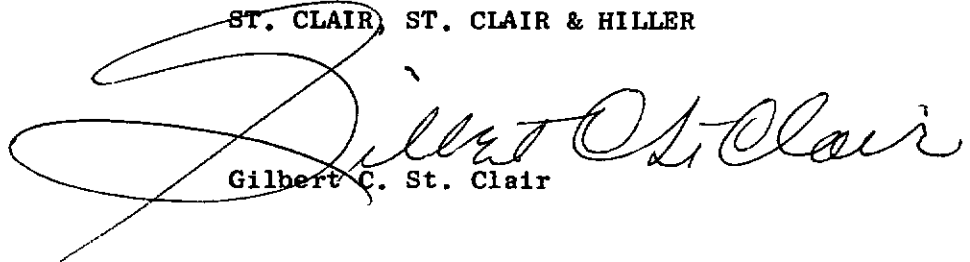

The above application was supposed to be completed on or before September 28, 1966. Although the Salisbury Corporation could complete the operation, they would prefer not to at this time, due to certain cattle operations and would like an extension.

Would you kindly notify us as to whether your Department would grant us an extension for a couple of years or as long as possible and if not possible, let us know so that we can proceed with completion.

Dear Sir:

In the past when we have forwarded these applications we have always been returned a signed copy of the application allowing the permit, so that the applicant may have a signed copy. It is my understanding that you keep one for your files and, therefore, we sent a duplicate so it could be signed and returned to the applicant. If you send the original back to us for the applicant, then there would be no need for the duplicate copy. However, if you retain the original then we would want the duplicate.

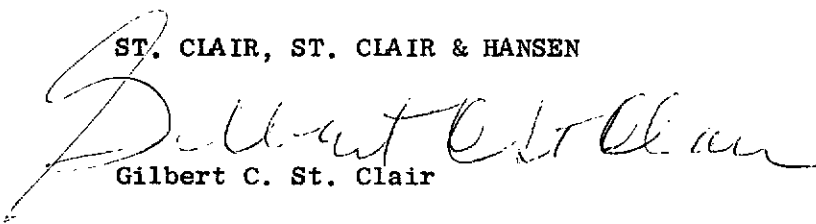

We are enclosing our check for \$1.50 for a certified copy of the original, but if the original is returned to us after being signed by the Governor, please return the check to us and ignore the duplicate.

Also please note that the name of the corporation is Salisbury instead of Salisburg.
