FROM: Allen Merritt

DATE: August 2, 2002

TO: Transfer File No. T69913

In the name of: Blue Lakes Country Club

Water Right(s): 36-2083B

SUBJECT: Review and Recommendation

This transfer proposes to add a point of diversion to the right. The right was originally split off from the old license in the SRBA since these 2 acres were irrigated from a portable pump at the time but now it is irrigated via the same pump that 36-2083A is watered. The source description on the application indicates springs; however the other rights list the source as Alpheus Ck. It must be noted that Alpheus Ck is comprised of numerous springs sources and to be consistent the record should reflect it as Alpheus Ck as the other rights.

The application was processed without protest.

I recommend the application be approved with the following conditions:

WATER RIGHT NO. 36 2083B

- T18 Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.

- R04 Use of water under this water right will be regulated by the watermaster of State Water District No. 130.
- GEN The point of diversion in Section 28 is located on the outlet stream from Blue Lakes which is a portion of what is locally known as Alpheus Creek. The point of diversion in Section 33 is located on a stream whose source is numerous springs and the stream is a portion of what is locally known as Alpheus Creek.
- T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
