3. kwalker 3/2/2004 Status

Comment: This permit still needs to be field examined and licensed even though it was partially decreed in SRBA. Decree contains condition A01 which allows us to complete the statutory procedure. Decree record has been changed to show as a draft license so we can go forward with licensing the permit.

2. kwalker 5/10/2004 License Review

Comment: This permit was decreed in SRBA with condition A01 allowing us to complete the licensing procedure. In review of this permit I found that the source is an unnamed spring trib. to Marys Creek pursuant to topographical map DD11. Have made this correction to right.
