1. kwalker 5/10/2004 License Review

Comment: This right was previously decreed in SRBA with condition A01 which allows IDWR to complete the license procedure.

In review of the field exam I noticed that the wildlife use may have been removed but in talking with examiner it was not her intention to remove this use. The right covers use for 1000 range cattle and wild horses, the horses being under wildlife use.

Added government lots to the place of use per arc view update.

Recommending licensing once we receive a signed amendment form.

- no pld overlap

2. kwalker 3/2/2004 Status

Comment: Even though a partial decree was entered on this permit, we still need to complete statutory procedures and issue a license on the development. Partial decree status has been changed to draft license. Field examination needs to be completed and submitted to state office.
