Describe the reason for the proposed changes

The original well is still working fine, but a new well has been drilled in a different location to satisfy concerns about groundwater contamination from the land application of commercial waste water from Glanbia Foods. Rather than abandon the original well, I want to keep it connected to the system in case the other well goes dry. Water is used only in my home; irrigation is from canal shares.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
