*Re: Application for Exchange of Water*

Dear Applicant:

You organization filed an application to exchange water regarding water right nos. 65-3222 and 65-8290. Processing of the application continues. Due to an advertising error in the original legal notices published in June, a correction legal notice was published earlier this month. This should not cause any undue delay of the exchange application.

Several items need to be clarified in the exchange application as noted below.

1. Why has the exchange been filed? What problem(s) will be solved if the application is approved?
2. Is the pump already authorized for use under another water right? If so, please identify that water right.
3. What steps will be taken to prevent injury to any users of the PTR system if a reduction in use from Scriver Creek is accompanied by an equal level of use from the river?

Your reply will help clarify the application. Final action on the exchange application will not occur until remaining items related to a pending transfer application together with more complete ownership documentation are clarified as discussed in my letter to you dated May 27, 2003.

Please submit the above requested information within sixty (60) days of the date of this letter. If the information is not timely submitted, the application will be removed from the records of this agency. Thank you for your attention to these matters, and please do not hesitate to contact me if you need any help.

Sincerely,

Steve Lester  
Water Rights Supervisor
