

Comment Report

37-20550

1. jfreitag 6/8/2004 Legal Notice Remarks

Comment: Application is for several new ponds dug in natural swales.
Located 9 miles east and 7 miles south of Fairfield, Idaho

2. jfreitag 6/8/2004 Comment/Analysis

Comment: Application is for several new ponds dug in natural swales.. Brockways
analysis shows total use to be less than 2,500 gpd -see attached brockway narrative-

Application 37-20551 is for the same purposes as this application. Permits 37-8778,
8779, 8780, and 8781 are also existing on this property for stockwater and stockwater
storage. Possible stacking of domestic/stockwater rights exists.

There are also transfer applications filed to account for irrigation around the ponds.

3. kwalker 7/22/2004 Permit Review

Comment: Recommend approval with limit of 13000 gallons per day. Application falls
within ESRPA moratorium area, trust water area and Big Wood River GWMA.

4. kwalker 7/22/2004 Amount of Water

Comment: In review of this application it was determined that the use may be as much
as 12,998 gpd. The stock would drink $1038 \times 12 \text{ gpd} = 12,456 \text{ gpd}$. The pond
evaporation determined by Brockway is 542 gpd. $12,456 + 542 = 12,998 \text{ gpd}$ which is
less than 13,000 which can be allowed under domestic exemption. Recommend
approval with limit of 13,000 gpd.
