Subject: Transfer for Water Rights 63-9658, 63-8402, and 63-8402 for Lakewood #4 Homeowners Association

Dear Mr. Nelson;

We agree with Lakewood #4 Homeowners Association that it will be much better to drill a new well on their land, than to solve their water problems by digging up and repairing the existing water delivery system. We would like to avoid the removal of trees and damage to the landscaping that will occur in our area if the repair is done. If the new well is completed before the next irrigating season this damage would be avoided.

It would be greatly appreciated if approval of the water rights transfer for them can be made in time for them to accomplish this.

Yours Truly,

Terry Robb
President

Lakewood Associations
