SUBJECT: Review and Recommendation

The purpose of this transfer was to tie together wells and place numerous rights into a PPU. Also several pivot corners were to be dried up to allow two pivots in the W $\frac{1}{2}$ Section 22, T11S, R21E to be covered that do not have water rights (Note some lands covered by application 45-07494 currently being held due to moratorium). There was some confusion on the application as to how many wells there were in the proposed system. After field investigation it was found that 11 wells exist. All wells have been GPS'd and are tagged. Based on field review and GPS analysis one well needs to have its legal description changed as indicated below.

The transfer application was advertised without protest.

The above "T" records have been created but in reviewing the corresponding adjudication records it was found that several of the records are combined into other numbers as noted above. In creating GIS shape files and associated tables I used the referenced AJ numbers so approval of this transfer should be done to correspond to the AJ numbers.

No new wells are requested to be drilled in this transfer but it is noted that two of the wells as noted below do not currently have pumps installed. Part of the reason for this is that some of the land has been in set-a-side for many years and is now coming out of that program. The approved wells for

use under this transfer should be as listed in the following table:

Tag No.	QQQ	Sec	Twp	Rge	Remarks
A0005217	NENENW	14	11S	21E	Presently no pump on well
A0005219	SENENE	14	11S	21E	
A0005264	NWNWNE	23	11S	21E	
A0005263	NENESW	23	11S	21E	
A0005262	SESESW	23	11S	21E	
A0005221	NWSWNE	13	11S	21E	Tract corrected due to GPS & F.E. Presently no pump on well
A0005258	SWNWSW (LT3)	19	11S	22E	
A0005250	NENENW	19	11S	22E	
A0005249	NENENE	19	11S	22E	
A0005225	NWNWSW	17	11S	22E	
A0005224	NWNWSW	17	11S	22E	

Recommendation

I recommend that this transfer be approved subject to the following conditions:

- The approved points of diversion are as listed above.
- The approval should be granted based on AJ numbers.
- No new wells authorized to be drilled pursuant to this approval.
- All rights when combined shall not exceed 50.08 cfs and 16113.4 afa for irrigation of no more than 4269 acres.
- Subject to SRBA.
- Measure and Report Use

This day I phoned Bob Kuman and discussed with him the number of wells in his system. We went over each one and concluded there are only 9 wells currently with pumps and two that do not have pumps. There are 2 total of 11 wells. He indicated there are only one well in NWSW Sec 19.

I told him I would correct the transfer application to reflect what we found in the field and confirmed by the phone conversation.
