

## **Comment Report**

**37-8195**

**1. kwalker 4/8/2004 Status**

Comment: This application was found on vault shelves without ever being acted upon. The application was amended in 1989 to change the use to municipal rather than domestic, irrigation and municipal as originally submitted. Application is located in Big Wood River GWMA, Snake River Moratorium area, and minimum streamflow area for 37-8258.

**2. kwalker 4/8/2004 11:17:37 AM Special Administration Area Notes**

Comment: This application is located within the Big Wood River GWMA (Municipal uses exempt with limit of 1/2 acre per dwelling, no parks or common areas), Trust Water Area & ESRPA (allow use of community wells so long as use does not exceed 1/2 acre per dwelling, no large common areas). There is also a minimum instream flow right in the area of the wells under this application but since this is groundwater application it should not affect a minimum instream flow right.

**3. kwalker 4/8/2004 Development of Water**

Comment: The City of Ketchum has tried to submit proof on this application twice and both times it was returned since we cannot accept proof on an application. The first time was in 9/1988 - proof returned. In 1989 IDWR received response to Trust Water Questionnaire and the form states that the diverting works were completed on 7/22/1987. In 11/1994 proof was once again submitted for this application. That proof and fee were returned and no further action was taken on this application until we pulled it off the shelf.

**4. kwalker 6/14/2004 Permit Review**

Comment: Recommend approval of this application.
