RE: TRANSFER APPLICATION AND FIELD EXAM

Dear Mr. Shuman:

Enclosed you find a copy of my field exam for water right 63-31640, and the transfer application for water rights 63-31640 and 63-10727.

The field exam has been sent to our State Office for final licensing. Licensing of 63-31640 will need to be completed prior to processing the transfer application. The enclosed Field Report is my recommendation after my tour of your plant's operation. The final licensing decisions may or may not reflect all of my recommendations. I have been in contact with our State Office staff, and this permit will be licensed as soon as possible to allow us to proceed with your transfer application.

During my field visit, I discussed the need to withdraw the application for amendment submitted by your organization on permit 63-31640. The reasoning for this was that proof of beneficial use had already been submitted, and the development period for this permit had expired. Therefore, the permit cannot be altered until it is licensed. Once licensed, the application could be changed with a transfer. During my field visit we added this water right onto your existing application for transfer form with 63-10727. I have included a copy of your transfer application with this letter with the changes we made during my visit.

I will apply the fee from the withdrawn application for amendment to the transfer and refund any difference to your office once I receive the withdrawal form from your office. I have enclosed a generic withdrawal form if you wish to use it.

If you have any questions or concerns please contact me at the above address.

Respectfully,

Daniel A. Nelson
Sr. Water Right Agent
