***RE: CORRECTIONS FOR APPLICATION FOR TRANSFER AND
AMENDMENT OF PERMIT***

Dear Mr. Schuman:

Through my telephone conversations with you and Vic Conrad, I discovered that the ownership of the water rights involved in these applications has changed. In order to process the applications, we will need the following corrections made:

TRANSFER:

- 1.) The new name and address for the current owners will need to be inserted on the application for transfer. The applicant will also need to supply a list of the corporate officers. This list must include the person signing the application.
- 2.) The map for the transfer shows the NWSW Section 11 Township 4N Range 5W was part of the industrial use land application system. However, this legal description was not included in the land list on page 1 of the application. Please include this legal description on page 1 or remove it from the map.
- 3.) The application was signed by Ronald Graves, whom I assume is not associated with the new owners. Please have a current corporate officer who is included on the list of corporate officers sign the application.
- 4.) Ownership documentation was supplied in the change of ownership of this water right at the time of the sale of the property for Section 10 T4N R5W, the current place of use description on the water right. However, the lands in Section 8, Section 11, and Section 17 T4N R5W were not associated with the water right during the ownership change process. Therefore, we will need ownership documentation showing that you have the authority to include those lands on the water right. This ownership documentation can be a Sales Agreement, Warranty Deed, Land Lease Agreement, or some other sort of legal documentation showing you own or lease the land.

AMENDMENT OF PERMIT:

- 1.) The new name and address for the current owners will need to be inserted on the application for transfer. The applicant will also need to supply a list of the corporate officers. This list must include the person signing the application.
- 2.) The map for the transfer shows the NWSW Section 11 Township 4N Range 5W was part of the industrial use land application system. However, this legal description was not included in the land list on page 1 of the application. Please include this legal description on page 1 or remove it from the map.
- 3.) The application was signed by Ronald Graves, whom I assume is not associated with the new owners. Please have a current corporate officer who is included on the list of corporate officers sign the application.

Please ensure that all changes to the application are initialed and dated by a corporate officer. Once the corrections are made please return to the application to the above address C/O Dan Nelson. This will ensure that the application will continue process from this point forward and will not be re-entered into the beginning of the review process again.

The Department will hold further processing of your application for 30 days to allow submittal of the required information. Additional time may be granted by the Department upon receipt of a written request and sufficient justification for an extension. After that time, if adequate information is not received, the Department will issue a preliminary order to reject or deny the application.

If you have any questions or concerns please contact me at the above address.

Respectfully,

Daniel A. Nelson
Sr. Water Right Agent
