Re: Vallivue Middle School Modernization

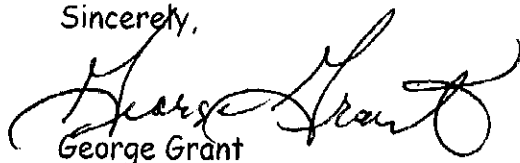

Dear Mr. Nelson,

Thank you for your consideration of the well applications for the Vallivue Middle School modernization project. We understand that the review and processing of these applications requires a considerable amount of time and effort; but the construction of these wells will occur on school property and a student safety issue arises if the construction takes place during the school year.

In order to avoid the potentially dangerous situation of drilling in close proximity to students we would like to be able to complete construction of the wells during the summer break (June 7- August 20, 2004).

Any effort that can be made to speed the review process in order to allow for earlier approval and start of construction would be greatly appreciated.

Sincerely,

George Grant
Assistant Superintendent
