Subject: Richard Porter – Water Right Transfer Documents

Dear Dan:

Enclosed please find the following documents related to a proposed transfer of 3 acres of water right by Richard Porter.

1. An original transfer application signed by both Richard Porter and Shari Porter.
2. Proof of ownership for the land proposed as the new place of use following transfer. The proof of ownership consists of a tax notice.
3. A letter from Mr. Porter describing past water use on the lands proposed as the place of use following the water right transfer. The letter indicates that the lands do not receive live water from a canal company. Instead, some portions of land have been irrigated in the past with either wastewater or rental pool water that is pumped from the slough located immediately south of the proposed place of use. A small portion of the place of use has been irrigated with groundwater pumped from the domestic well.
4. An aerial photo showing the proposed place of use. Mr. Porter reviewed the photo and agrees that the area outlined in green shows the approximate location proposed for irrigation.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan, P.E., P.G.
